Chapter 1. GENERAL

Section 1. INTRODUCTION

1-1-1. PURPOSE

This Order contains the approved word and phrase contractions used by personnel of the Federal Aviation Administration (FAA). It is also used by other agencies that provide air traffic control, communications, weather, charting, and associated services.

1-1-2. DISTRIBUTION

This Order is distributed to selected offices in Washington and regional headquarters; FAA Technical Center and the Aeronautical Center; all ATO service area offices and field facilities; all International Aviation Field Offices; Airport District Offices; Flight Standards District Offices; and the interested aviation public.

1-1-3. CANCELLATION

Contractions Order 7340.1Y, is cancelled.

1-1-4. EFFECTIVE DATE

This order is effective March 15, 2007.

1-1-5. SCHEDULE OF PUBLICATION AND DELIVERY DATES

a. This Order and its changes are scheduled to be published every 112 days. Effective dates will be:

PUBLICATION SCHEDULE

Basic Or Change	Cutoff Date For Submission	Effective Date Of Publication
7340.1Z Basic	11/23/06	03/15/07
Change 1	03/15/07	07/05/07
Change 2	07/05/07	10/25/07
Change 3	10/25/07	02/14/08

b. If a facility has not received the Order/changes within 5 days prior to the effective date, the facility shall notify its regional/service area office distribution officer.

1-1-6. NOTATION OF NEW ENTRIES

Additions and changes are indicated on page CAM-1-1.

1-1-7. CHANGES, ERRORS, AND OMISSIONS

To report changes to information in the Contractions Order, write to FAA, System Operations Services/System Operations Airspace and AIM Office, 800 Independence Avenue, SW, Washington, DC 20591 or call (202) 267-9224.

1-1-8. GENERAL NOTICES (GENOTS)

ICAO does not issue, modify, or cancel telephony/identifier assignments, as does the FAA through GENOTs. If there appears to be a conflict between published data and GENOT data, use the GENOT data. Then make pen and ink changes to reflect the GENOT data.

Section 2. CONTRACTIONS

1-2-1. DEFINITION

A contraction is a word, title, or phrase represented in shortened form for the purpose of brevity. Contractions facilitate communication and thus are a vital part of the Federal Aviation Administration's (FAA) everyday communications process.

1-2-2. USE OF CONTRACTIONS

a. Contractions lend freedom to communication(s) in general correspondence. Without them, written communication becomes cumbersome.

b. Contractions save space on telegraphic circuits, tabulating and computer equipments, charts, drawings and reports.

c. The International Civil Aviation Organization (ICAO) is the focal point for world-wide use in the international aeronautical community.

d. Standard ICAO abbreviations and codes are to be used, wherever possible. These are available in ICAO document 8400.

1-2-3. RULES FOR DEVELOPING CONTRACTIONS

To form or use contractions, the following rules shall apply:

a. Signs and symbols included as part of a contraction are limited to those available on FAA communications equipment.

b. Contractions composed of both upper and lower case letters cannot be used in telegraphic communications.

c. In some cases, a contraction may include letter and number combinations.

d. A contraction should retain an alphabetical similarity to the longer word or phrase.

e. Three-character contractions are no longer to be coined due to possible conflict with Location Identifiers in an automated and voice response environment.

f. Words of five letters or less are not to be contracted.

g. Excessively long contractions will not be adopted.

h. Prepositions, conjunctions, and articles should be omitted in forming contractions. The slant may be substituted, if necessary.

i. A pronounceable word should be attained, if possible, when contracting a phrase.

j. Abbreviations that are unique to a particular publication shall not be listed in this order.

k. A contraction may have more than one meaning. There are four different categories which constitutes this rational. These categories are air traffic, general, meteorological (weather) and international aeronautics (ICAO).

l. In cases where a contraction may be unfamiliar to the recipient, spell out the word or phrase the first time it is used and follow it with the contraction in parenthesis.

m. Contractions stated should read fluently with the remainder of the text. If questionable, the recipient should refer back to the originator.

n. The contractions in this order may normally be used for any derivative of the root word. If confusion would otherwise result, variations may be shown by adding the following letters to the contraction of the root word:

able	BL
al	L
ally,erly,ly	LY
ary,ery,ory	RY
ance,ence	NC
der	DR

ive	V
iest,est	ST
iness,ness	NS
ing	G
ity	TY
ment	MT
ous	US
s,es,ies	S
tion,ation	N
ward	WD

1-2-4. RECOMMENDATIONS REGARDING CONTRACTIONS

Requests for new contractions, changes, or deletion of obsolete ones may be submitted by the simplest means possible (e.g. Route Slip) to FAA Headquarters, System Operations

Services/System Operations Airspace and AIM Office, 800 Independence Avenue, SW, Washington, DC 20591. Recommendations shall include a description of the need for a proposed contraction and the frequency of its use.

Section 3. AIRCRAFT-TYPE DESIGNATORS

1-3-1. MILITARY AIRCRAFT-TYPE DESIGNATORS

a. For air traffic control purposes, only the principal elements of each military aircraft designation, Basic Mission/Type Symbol and Design Number, shall be used. The combination of these elements is limited to four (4) characters.

b. The Basic Mission/Type Symbol is an alphabetical letter denoting the primary function or capability of an aircraft. The symbols used are as follows:

A	Attack
B	Bomber
C	Cargo/Transport
E	Special Electronic Installation
F	Fighter
H [1]	Helicopter
K	Tanker
O	Observation
P	Patrol
R	Reconnaissance
S	Antisubmarine
T	Trainer
U	Utility
V [1]	VTOL and STOL
W	Weather Reconnaissance
X	Research
Z	Airship

NOTE-
The letters H and V are also used as special mission symbols (H-Rescue aircraft; V-VIP aircraft) in which case they precede the basic type symbol, e.g. HC-130, VC-137, HH-52A.

c. A Design Number is assigned to each basic airplane. Design Numbers may be 1 through 999.

NOTE-
A new Design Number will be assigned when an existing airplane is redesigned or modified, either in appearance or operation, to such extent that the new design no longer reflects the design configuration or capability.

1-3-2. CIVIL AIRCRAFT-TYPE DESIGNATORS

New designators will only be assigned to new type aircraft and to those modifications, or different models of a type, when the weight category or stopping distance group change.

1-3-3. REQUESTS FOR AIRCRAFT-TYPE DESIGNATORS

Requests for aircraft-type designators are to be submitted to FAA Headquarters, System Operations Services/System Operations Airspace and AIM Office, 800 Independence Avenue, SW, Washington, DC 20591. All requests must include enough data to substantiate the need for establishing a new aircraft-type designator. Requests concerning foreign manufactured aircraft should be submitted to the state of manufacture.

Section 4. CIVIL AIRCRAFT-COMPANY THREE-LETTER IDENTIFIER AND/OR TELEPHONY DESIGNATOR ASSIGNMENTS

1-4-1. DEFINITIONS

a. This section identifies the criteria for eligibility and procedures for requesting the assignment of an International Civil Aviation Organization (ICAO) three-letter identifier and/or telephony designator for aircraft operating agencies, aeronautical authorities, and air operational services.

b. A three-letter identifier, which when used in conjunction with the flight number, serves as the aircraft identification in the air traffic control system in flight plans, fix postings, control messages, computers, etc. When authorized, the identifier/flight number combination is used instead of the aircraft registration number. Three-letter identifiers are applicable to ICAO assignments for commercial domestic/international aircraft operations, national record communication purposes and air traffic operational service related functions.

c. A telephony designator, normally the company name or an abbreviation thereof, used in combination with the flight number is usually assigned simultaneously with the three-letter identifier and becomes the aircraft identification in all voice communications with air traffic control facilities. It is also used for telephone coordination purposes.

1-4-2. CRITERIA

a. A three-letter identifier is registered only for those aircraft operating agencies and other aircraft servicing companies which, in the opinion of the State of jurisdiction, require a specific three-letter identifier. They are assigned on a worldwide basis to an aircraft operating or servicing company for commercial domestic/international operations. ICAO three-letter company identifiers may be used on the international telecommunications service when deemed advantageous for air traffic control and operational purposes.

b. As stated in ICAO Document 8585, telephony designators “should be pronounceable and suitable phonetically in at least one of the following languages: English, French, or Spanish.” Such telephony designators should, preferably, resemble the name of the “aircraft operating companies and/or servicing authorities.” The telephony designator should consist of not more than two words and three syllables. This eliminates the amount of verbiage created on-line contributing to similar sounding telephony designator confusion. Letters are not assigned as telephony designators; however, companies which have previously been assigned letters as telephony designators will remain.

c. Three-letter identifiers are assigned to aircraft operating agencies which operate 7 or more non-seasonal international air operations per week and/or generate the appropriate flight movement messages and other related flight operations over the Aeronautical Fixed Telecommunications Network (AFTN); or, 15 or more non-seasonal domestic commercial round trip air operations per week. Aircraft operating agencies which generate less than the prescribed international and/or domestic flight operations, may be waived as deemed advantageous to the U.S. air traffic control system and operationally appropriate by FAA. Exceptions to the above criteria may be authorized on an individual basis.

d. Connection to the AFTN is a requirement established by ICAO Document 8585. According to ICAO, Annex 10, the AFTN is an integrated worldwide system of aeronautical fixed circuits providing, as part of the Aeronautical Fixed Service (AFS), an exchange of messages between aeronautical fixed stations within the network. The integrated system permits the exchange of messages between aeronautical fixed stations within the network. AFTN telecommunication service provides an electronic media for transmission of international flight movement messages for the

safety of air navigation and for regular, efficient and economical operation of air services.

1. AFTN connections are authorized only for aircraft operating and servicing agencies to introduce aircraft movement data into the air navigation system and the exchange of permissible traffic in accordance with ICAO Annex 10 and Title 14 of the Code of Federal Regulations (CFR) Part 189.

2. AFTN authorized non-FAA users are required to enter into a Memorandum of Agreement (MOA) in order to access the National Airspace System June 20, 1996. Interfacility Communications System (NICS) for transmitting non-ICAO computerized (domestic) flight movement data to the aviation industry. The use of the assigned identifier will not be approved until the MOA has been finalized. For specific details and requirements concerning MOA's contact FAA Headquarters, System Operations Services/System Operations Airspace and AIM.

1-4-3. REQUEST

a. Requests for ICAO three-letter identifiers and/or telephony designator assignments should be addressed to the appropriate FAA service area office. The service area office will ensure all documentation submitted by the applicant/company is validated before data is forwarded. It is the responsibility of the service area office to review and determine if an applicant/company meets the requirements before submitting recommendations to FAA Headquarters. When that determination is made, the request is either denied at the service area office level, or submitted to FAA Headquarters with recommendations supporting the request for approval. The service area office recommendation and all supporting documentation should be forwarded to FAA Headquarters, System Operations Services/System Operations Airspace and AIM, for coordination with and approval by ICAO.

b. Coordination of all three-letter identifiers and/or telephony designators are assigned by FAA with approval by ICAO on a worldwide basis for commercial domestic/international air traffic control operations and use in the AFTN system.

c. All telephony designator assignments endorsed by FAA are extended courtesy coordination with our military counterparts before final approval from ICAO. This procedure further reduces the elimination of duplicate and/or similar sounding military tactical telephony designator assignments, vice ICAO assignments, which have previously been authorized.

1-4-4. DOCUMENTATION

In order to determine eligibility for an ICAO three-letter identifier and/or telephony designator, the following information is required:

a. Name and address of aircraft company or servicing agency.

b. Type of aircraft operation or service provided. (A list of operators served is required for servicing operations.)

c. Intended use of AFTN for international services or operations.

d. Intended use of AFTN for domestic services or operations which require a MOA with FAA.

e. The number and type of AFTN messages generated on a daily basis.

f. A copy of the company/operator flight schedule.*

g. A copy of the FAA Certificate which authorizes the company's operations stating the 14 CFR Part under which operations are to be conducted, i.e. 14 CFR Parts 121, 125, 135 etc.*

NOTE-
14 CFR Part 91 describes general operating rules and regulations governing operation of aircraft within the U.S. including the waters within 3 nautical miles of the U.S. coast. Each person operating an aircraft in said airspace is in compliance of this 14 CFR; however, 14 CFR Part 91 operations alone are not considered criteria for eligibility.

h. Provide at least five (5) suggested three-letter identifiers and/or telephony designators in order desired.

***Not required for servicing agencies.**

NOTE-
The required administrative period for approval of a company three-letter identifier and/or telephony designator is approximately 45 calendar days. Failure to submit the proper documentation may delay approval of an assignment.

1-4-5. BASIS FOR ASSIGNMENT.

a. ICAO three-letter identifiers and/or telephony designators are assigned when it is deemed advantageous to the U.S. air traffic control system.

b. ICAO three-letter identifiers and/or telephony designators will not be assigned to eliminate problems which can be resolved by changing registration number, or similar sounding company names. However, due to the vastly growing flying aviation community, modifying a similar sounding telephony designator will not be an uncommon technique. In the interest of safety to the air traffic control system and operationally appropriate albeit FAA standards, adjustments can be made via this procedure.

c. 14 CFR Section 91.169(2)(d) (revised 1/1/91) requires when a flight plan has been activated, the pilot in command, upon cancelling or completing the flight under the flight plan, shall notify an FAA Flight Service Station or ATC facility, thus avoiding search and rescue procedures by FAA.

1-4-6. CHANGES IN COMPANY STATUS

Immediately notify FAA Headquarters, System Operations Services/System Operations Airspace and AIM, in writing, when an assigned three-letter identifier and/or telephony designator is no longer required; or, a change in the name, address, or physical location of the company occurs. Any designator released will not be reassigned for at least 60 calendar days.

Exceptions to this ruling may be modified on an individual basis. Listed below are reasons governing the notification of release:

a. Operations are permanently suspended or cancelled for any reason;

b. When combining any company names holding more than one three-letter identifier and/or telephony designator; or,

c. When the company air carrier certificate has permanently been terminated.

1-4-7. USE OF AIRCRAFT COMPANY THREE-LETTER IDENTIFIER AND/OR TELEPHONY DESIGNATOR ASSIGNMENT

a. Authorized three-letter identifiers and/or telephony designators are valid only when aircraft are flown for company business in accordance with the provisions of the 14 CFR under which an operating certificate was obtained from the FAA. The pilot will revert to standard identification procedures when using the aircraft for personal flying.

b. If the three-letter identifier and/or telephony designator is new or changed, it should be listed in the "Remarks" portion of the flight plan for at least 60 days following the effective date. In cases where there is no three-letter identifier assignment or it is used in a medical emergency, the assigned telephony designator must be listed in the "Remarks" portion of the flight plan. This requirement necessitates the air traffic controller’s correlation between the written records and radio communications.

c. The FAA Headquarters, System Operations Services/System Operations Airspace and AIM, reserves the right to revise or cancel designator assignments should confusion or misuse result within the United States. ICAO Document 8585 states in the interest of safety, simple procedures should be developed and maintained by States and aircraft operating companies/agencies for detecting, reporting and eliminating similar sounding telephonies which may cause confusion or mistakes in identification.

1-4-8. PUBLICATION OF AIRCRAFT-COMPANY THREE-LETTER IDENTIFIER AND/OR TELEPHONY DESIGNATOR ASSIGNMENTS

The effective date of an ICAO three-letter identifier and/or telephony designator assign-

ment will be established to provide adequate lead-time for entry into the Stored Flight Plan Program; and, for FAA facilities to be advised of the authorized assignments pending publication in appropriate FAA and ICAO documents.

Section 5. SPECIAL AND LOCAL TELEPHONY DESIGNATORS

1-5-1. SPECIAL TELEPHONY DESIGNATORS

a. Special telephony designators are temporarily authorized only when their assignment will necessitate "special handling" by air traffic control.

b. Special telephony designators are approved by FAA in accordance with Federal Communication Commission (FCC) Regulation 87.115.

c. Special telephony designators may be authorized a timeframe of not more than 2-years when an event is categorized for a continuous systemized operation.

d. Special telephony designators may be authorized for the following categories:

1. commemorative flights;

2. large number of aircraft participating in an organized race;

3. aircraft engaged in a systemized operational event and/or exercise;

4. aircraft operating during an emergency or disaster condition; or,

5. aircraft needing special handling for test purposes.

e. Requests will be made to FAA Headquarters, System Operations Services/System Operations Airspace and AIM, submitting the following:

1. type of flight;

2. handling required;

3. type and number of participating aircraft;

4. type of operational event; and

5. routes and duration of operation.

f. FAA Headquarters, System Operations Services/System Operations Airspace and AIM, will notify FCC of the pending assignment.

1-5-2. LOCAL TELEPHONY DESIGNATORS

a. Local telephony designators will be used only for communications with local airport traffic control towers/facilities for VFR/SVFR operations. A Letter Of Agreement (LOA) is required between the local tower/facility and the requesting company/applicant. The LOA will contain verbiage which ensures the local telephony is used only with facilities which are signatories to the agreement.

b. When a LOA expires, the local tower/facility will notify the company/applicant for renewal and submit new LOA to FAA Headquarters, System Operations Services/System Operations Airspace and AIM, for update.

c. Local telephony designators will not be used for filing flight plans nor for IFR operations.

d. Local telephony designators are approved in accordance with the FAA Order 7210.3, Facility Operation and Administration.

e. Request for local telephony designators will be reviewed by the service area office for adherence to criteria, and forwarded with recommendations to FAA Headquarters, System Operations Services/System Operations Airspace and AIM. FAA Headquarters reviews and forwards the approved assignment back to the service area office for dispersion.

Section 3. HOMEBUILTS/EXPERIMENTAL

Homebuilt and Experimental Aircraft*

Designator Criteria	Type Designator	Performance Information		
		Climb Rate (fpm)	Descent Rate (fpm)	SRS Category
Aircraft with cruise (indicated) airspeeds of 100 knots or less	HXA	500	500	I
Aircraft with cruise (indicated) airspeeds of greater than 100 knots, up to and including 200 knots	HXB	750	750	I
Aircraft with cruise (indicated) airspeeds of greater than 200 knots	HXC	1,000	1,000	I

NOTE-
**Configuration diversity and the fact that airworthiness certificates are issued to aircraft builders, vice manufacturers, necessitates the assignment of generic aircraft type designators based on cruise performance, rather than specific manufacturer and normal descriptive/performance information.*

NOTE-
*** All performance criteria has been estimated because configuration diversity precludes determining precise aircraft-specific information*
