Appendix A: List of NPIAS Airports with 5-Year Forecast Activity and Development Cost

EXPLANATION OF TERMS AND ABBREVIATIONS USED IN APPENDIX A

City The city generally associated with the airport.

Airport The official name of the airport or designated abbreviation.

LocID The unique airport location identifier for an airport.

Hub Type The term "hub" is used by FAA to identify very busy commercial service airports as measured by passenger enplanements. Primary commercial service airports are grouped into four categories. Large hubs are those airports that each account for at least one percent of total U.S. passenger enplanements; medium hubs for between 0.25 percent and one percent, small hubs for between 0.05 percent and 0.25 percent, and non-hubs for less than 0.05 percent of all enplanements, but more than 10,000 annual enplanements.

L	Large Hub
M	Medium Hub
S	Small Hub
N	Non-Hub

Role One of four basic airport service levels which describe the type of service that the airport currently provides to the community and is anticipated to provide the community at the end of the 5-year planning period. The service levels also represent funding categories for the distribution of Federal aid. New airports opening beyond the 5-year period are not shown in Appendix A; however, any 5-year costs associated with the development of these airports are included in Table 9.

P	Commercial Service – Primary
CS	Commercial Service – Non-Primary
R	Reliever Airport
GA	General Aviation Airport

Enplaned The number of revenue passengers forecast to board aircraft at the airport during the fifth year of the 5-year planning period.

Bsd Acft The number of locally owned aircraft forecast to be hangared or based at the airport during the fifth year of the 5-year planning period. ***Note:*** *In 2006, FAA began an update of the based aircraft inventory information that supports one of the entry criteria for the NPIAS. This update included verifying the N numbers of the aircraft*

that are based at an airport to ensure that the based aircraft counts are accurate and verifiable.[54]

Dev Cost The estimated 5-year costs for airport improvements that are eligible for Federal development grants under the Airport Improvement Program. The costs identified are for development only; approximately $327 million in planning costs are excluded from the development estimates. Planning costs have increased 23 percent from the last report ($61 million).

Note: The data presented in these tables were largely compiled in 2007 with a few updates through February 2008.

[54] As of Sept 22, 2008, FAA has been unable to verify based aircraft counts at 15 airports in Appendix A, despite our repeated requests for information from these airports. We will leave these airports in this report, conditional on their providing the information as requested by FAA. These 15 locations are in Texas and Wyoming and are flagged in Appendix A with an asterisk by the number of based aircraft.

New Airports Anticipated to Open Within 5 Years
