The U.S. Fish and Wildlife Service encourages pilots to use the following guidelines when in the vicinity of walrus haulouts near Icy Cape or any known walrus haulouts from late July to early October. Fixed wing aircraft should remain greater than 1,000' AGL within ½ mile of this area. Helicopters should remain greater than 3,000' AGL within 1 mile. If unable, pass inland to avoid flushing walruses from the beach. Walruses are sensitive to changes in engine noise. Avoid unnecessary circling or turning while in the area of a haulout.
