Think Small...
— The maximum size carry-on bag for most airlines is 45 linear inches (the total of the height, width, and depth of the bag). Anything larger should be checked.
— No oversize packages or luggage can be stowed onboard.
— Pack less to carry-on. Stow only your essentials (such as prescriptions, personal hygiene items, passports and other documentation) and valuable items, such as jewelry or cameras, in your carry-on bag.

Think Smart...
— Plan to check more of your baggage and carry-on less.
— Check with your airline before packing to determine its carry-on guidelines regarding the number of items you may carry-on and the maximum size of those items.
— In certain situations the airline may require most or even all of your bags to be checked, so be prepared to do so.

Think Safe...
— Carry-on items which may fall from overhead bins can injure you or other passengers during flight or in the event of an emergency evacuation.
— Stow heavy items under the seat in front of you, not overhead.
— Don’t stack items in the overhead storage bin.
— If an emergency evacuation is necessary, leave your carry-on items on the plane. Retrieving personal items may impede the safe evacuation of passengers.
— Remember, be safety conscious when stowing your carry-on items.

Airline Carry-On Baggage Checklist
Planning a trip? Thinking about carrying-on your luggage? If so, here are a few tips for you:
