DESCRIPTION AND LEARNING STRATEGY

This session might be called the “Skills Tool Box” for those who are expected to lead in an empowered environment. Most organizations are actively engaged in many initiatives designed to improve safety, customer satisfaction, and efficient use of taxpayer dollars. This workshop is designed as one step in support of expanding the skills of those expected to successfully lead the organization through those changes.

The perspective presented is that each employee - regardless of position, title, or assigned “leadership” responsibility - has both opportunity and obligation to lead in the empowered environment necessary to achieve the organizations mission. During this workshop, participants will focus on their ability and willingness to proactively influence the actions of others. Specifically, they will sharpen the skills needed to accomplish four key outcomes: create shared knowledge, maintain a supportive environment, trust and be trustworthy, and model desired behaviors.

Through interactive lectures, small group discussion, skill practices, and personalized application activities, participants will develop the specific skills necessary to lead in today’s leaner organization. While participants may have been exposed to the skills of presenting information, making effective language choices, and questioning in a way which encourages open dialogue, this workshop provides specific HOW TOs, sample phrases and models.

OBJECTIVES

- Present information and/or requests in a persuasive manner.
- Make language choices which support a collaborative environment.
- Communicate and behave in a way that collaborative, trusting relationships are established and maintained.

KEY COMPETENCIES
