Control 1234L Offshore Airspace

2,000' AGL

Control 1234L  
Offshore Airspace Area

Note: The Class E airspace referenced in this airspace action is classified as Offshore Airspace. For charting purposes, you will see a hatched blue line similar to the ones shown above. They depict a change in the floor of Control 1234L Offshore Airspace Area from 2000' AGL to 1,200' AGL and to 700' AGL. Control 1234L is classified as "offshore" but in this area of the Aleutians (West of 160W Long.) it also covers all land masses. Thus, altitude terms are defined as "AGL".
