

# 12C16 Flight Predictability

## Description

Improve flight predictability by reducing variances in flying time between core airports based on a 2012 baseline. FY 2012 Target: Finalize metric and Target

## Commentary (06/2012)

A cross-Agency working group has been established to further define this metric and target, with representation from APL, ATO, ARP, ANG, and Mitre/CAASD. Multiple meetings have been held, and some alternative formulations of the metric have been examined. These alternative metrics can be baselined. Selection of a target is proving elusive, however. No programs have been identified that are intended to improve predictability.

## Period Table

	Actual	Target	Target Lines - Index	Target Lines - Index Range
10/2011	3	3	---	Green
11/2011	3	3	---	Green
12/2011	3	3	---	Green
01/2012	3	3	---	Green
02/2012	3	3	---	Green
03/2012	3	3	---	Green
04/2012	3	3	---	Green
05/2012	2	3	---	Yellow
06/2012	2	3	---	Yellow
