

## 12I2 NextGen Interoperability

### Description

40 percent of all commercial aircraft from the top 25 aviation states are using fully interoperable NextGen technologies and capabilities by 2018.

### Commentary (06/2012)

API-20 has been making steady progress on developing a viable measuring methodology. This progress has been done in conjunction with ANG-3 and reported out to the performance sub-committee on a quarterly basis. However, this measure may be dependant upon many factors that are not under the FAA's direct control and as such API-20 has been careful on developing the measure to ensure its success.

**Period Table**

	Actual	Target	Target Lines - Index	Target Lines - Index Range
10/2011	3	3	---	Green
11/2011	3	3	---	Green
12/2011	3	3	---	Green
01/2012	3	3	---	Green
02/2012	3	3	---	Green
03/2012	3	3	---	Green
04/2012	3	3	---	Green
05/2012	3	3	---	Green
06/2012	3	3	---	Green
