I have three homes in the Lakes and DO NOT want to hear the noise and vibration from 100 to 200 planes a day flying over my homes. When I choose these properties it was because they were in a quiet neighborhood. Never in my widest dreams did I think that anyone could change. I will not stand for it. The million dollar houses on Lake Sahara are the nicest properties in Las Vegas and the sounds echo's on the water - so it would be twice as loud there than in a average neighborhood. Also, the other day a plane went over and I was standing in my kitchen watching the windows vibrate. Please use your pull and don't let this happen. You would hate it over your house.

S10-1

Thank you kindly,

Jane A. Mundy
