Sara,

We oppose the FAA's proposed plan for all the reasons detailed on this website
<http://www.stoptherightturn.com>

As to safety, scores of thousands of us are concerned about safety, in addition to other adverse impacts, and believe the proposed path is not the safest alternative.

Has consideration being given to flying the craft further west, perhaps just a few miles, then turning them. out over sparsely populated areas during ascent?

Thank you,

Jeff Dacks
