

Hi Linda, I received your call and will put my message in writing here. The noise of planes and helicopters taking off and landing at Centennial Airport has been steadily getting worse over the years and especially the last several months. I don't question the need or usefulness of the airport. However, I request that the airport restrict the hours from 8am to 6pm and maybe limit the number of flights. It would seem, that take off and landing routes could be altered as well. They should be altered to be done either south of the airport or to the north east (east of Peoria road) of the airport, over the State park. The Helicopters are a major problem because they are the loudest, most often low flying, and generally happen late at night and early in the morning. For example, one day recently, the 5th of March had 2 planes coming in 10:40 and 10:45pm as well as very loud helicopters at 10:47, 10:55, and 11:03pm. Please let me know if I may be of further assistance or if you have any questions. I appreciate your time.

Regards,

Tucker
