1–1–1. PURPOSE OF THIS ORDER

This order contains the approved word and phrase contractions used by personnel of the Federal Aviation Administration (FAA). It is also used by other agencies that provide air traffic control, communications, weather, charting, and associated services.

1–1–2. AUDIENCE

This order applies to all FAA personnel and other agencies using ATO directives. It is also used by the aviation public.

1–1–3. WHERE TO FIND THIS ORDER

This order is available on the FAA Web site at http://faa.gov/air_traffic/publications and http://employees.faa.gov/tools_resources/orders_notices/.

1–1–4. WHAT THIS ORDER CANCELS

FAA Order JO 7340.2C, Contractions, dated February 9, 2012, and all changes to it are cancelled.

1–1–5. EXPLANATION OF CHANGES

Additions, modifications and deletions (CAM) are indicated on page CAM–1–1.

1–1–6. SUBMISSION CUTOFF AND EFFECTIVE DATES

This order and its changes are scheduled to be published every 112 days. Effective dates will be:

PUBLICATION SCHEDULE

Basic Or Change	Cutoff Date For Submission	Effective Date Of Publication
7340.2D Basic	1/10/13	5/2/13
Change 1	5/2/13	8/22/13
Change 2	8/22/13	12/12/13

1–1–9. GENERAL NOTICES (GENOTS)

ICAO does not issue, modify, or cancel telephony/identifier assignments, as does the FAA through GENOTs. If there appears to be a conflict between published data and GENOT data, use the GENOT data. Then make pen and ink changes to reflect the GENOT data.

1–1–10. SUBSCRIPTION INFORMATION

This publication may be purchased from the U.S. Government Printing Office. Address subscription inquiries to:

Superintendent of Documents
U.S. Government Printing Office
P.O. Box 979050
St. Louis, MO 63197–9000
Online: http://bookstore.gpo.gov

FAA air traffic publications are also available on the FAA's web site at: http://www.faa.gov/air_traffic/publications/

1–1–11. DISTRIBUTION

This order is distributed to select offices in Washington and Regional Headquarters; all ATO Service Area Offices, field facilities, Airport District Offices, Flight Standards District Offices, the William J. Hughes Technical Center, the Mike Monroney Aeronautical Center, all International Aviation Field Offices, and the interested aviation public.

Section 2. Contractions

1–2–1. DEFINITION

A contraction is a word, title, or phrase represented in shortened form for the purpose of brevity. Contractions facilitate communication and thus are a vital part of the Federal Aviation Administration's (FAA) everyday communications process.

1–2–2. USE OF CONTRACTIONS

a. Contractions lend freedom to communication(s) in general correspondence. Without them, written communication becomes cumbersome.

b. Contractions save space on telegraphic circuits, tabulating and computer equipments, charts, drawings and reports.

c. The International Civil Aviation Organization (ICAO) is the focal point for world–wide use in the international aeronautical community.

d. Standard ICAO abbreviations and codes are to be used, wherever possible. These are available in ICAO document 8400.

1–2–3. RULES FOR DEVELOPING CONTRACTIONS

To form or use contractions, the following rules must apply:

a. Signs and symbols included as part of a contraction are limited to those available on FAA communications equipment.

b. Contractions composed of both upper and lower case letters cannot be used in telegraphic communications.

c. In some cases, a contraction may include letter and number combinations.

d. A contraction should retain an alphabetical similarity to the longer word or phrase.

e. Three–character contractions are no longer to be coined due to possible conflict with Location Identifiers in an automated and voice response environment.

f. Words of five letters or less are not to be contracted.

g. Excessively long contractions will not be adopted.

h. Prepositions, conjunctions, and articles should be omitted in forming contractions. The slant may be substituted, if necessary.

i. A pronounceable word should be attained, if possible, when contracting a phrase.

j. Abbreviations that are unique to a particular publication must not be listed in this order.

k. A contraction may have more than one meaning. There are four different categories which constitutes this rational. These categories are air traffic, general, meteorological (weather) and international aeronautics (ICAO).

l. In cases where a contraction may be unfamiliar to the recipient, spell out the word or phrase the first time it is used and follow it with the contraction in parenthesis.

m. Contractions stated should read fluently with the remainder of the text. If questionable, the recipient should refer back to the originator.

n. The contractions in this order may normally be used for any derivative of the root word. If confusion would otherwise result, variations may be shown by adding the following letters to the contraction of the root word:

able	BL
al	L
ally,erly,ly	LY
ary,ery,ory	RY

1–2–4. RECOMMENDATIONS REGARDING CONTRACTIONS

Requests for new contractions, changes, or deletion of obsolete contractions may be submitted by the simplest means possible (e.g. Route Slip) to FAA Headquarters, Mission Support Services, Aeronautical Information Management, 800 Independence Avenue, SW, Washington, DC 20591. Recommendations must include a description of the need for a proposed contraction and the frequency of its use.

Section 3. Aircraft–Type Designators

1–3–1. MILITARY AIRCRAFT–TYPE DESIGNATORS

a. For air traffic control purposes, only the principal elements of each military aircraft designation, Basic Mission/Type Symbol and Design Number, must be used. The combination of these elements is limited to four (4) characters.

b. The Basic Mission/Type Symbol is an alphabetical letter denoting the primary function or capability of an aircraft. The symbols used are as follows:

A	Attack
B	Bomber
C	Cargo/Transport
E	Special Electronic Installation
F	Fighter
H[1]	Helicopter
K	Tanker
O	Observation
P	Patrol
R	Reconnaissance
S	Antisubmarine
T	Trainer
U	Utility
V[1]	VTOL and STOL
W	Weather Reconnaissance
X	Research
Z	Airship

NOTE–
The letters H and V are also used as special mission symbols (H–Rescue aircraft; V–VIP aircraft) in which case they precede the basic type symbol, e.g. HC–130, VC–137, HH–52A.

c. A Design Number is assigned to each basic airplane. Design Numbers may be 1 through 999.

NOTE–
A new Design Number will be assigned when an existing airplane is redesigned or modified, either in appearance or operation, to such extent that the new design no longer reflects the design configuration or capability.

1–3–2. CIVIL AIRCRAFT–TYPE DESIGNATORS

New designators will only be assigned to new type aircraft and to those modifications, or different models of a type, when the weight category or stopping distance group change.

1–3–3. REQUESTS FOR AIRCRAFT–TYPE DESIGNATORS

Requests for aircraft–type designators are to be submitted to FAA Headquarters, Mission Support Services, Aeronautical Information Management, 800 Independence Avenue, SW, Washington, DC 20591. All requests must include enough data to substantiate the need for establishing a new aircraft–type designator. Requests concerning foreign manufactured aircraft should be submitted to the state of manufacture.

Section 4. ICAO Aircraft Company Three−Letter Identifier and/or Telephony Designator Assignments and U.S. Special Telephony/Call Signs

1−4−1. GENERAL

a. This section contains information, direction, and guidance to be used when obtaining International Civil Aviation Organization (ICAO) company designators and telephony designators (call signs) for those operators and servicing organizations that request or are required to obtain designators. Commercial, domestic, and international operators use designators for air traffic control (ATC) operations. ICAO Three-Letter Identifiers and Telephonies and U.S. Special Telephonies/Call Signs are contained in Chapter 3 except for "For Official Use Only" Special Telephonies/Call Signs which are contained in FAA Order 7110.67, Special Aircraft Operations by Federal, State Law Enforcement, Military Organizations and Special Activities.

b. The Air Traffic Organization (ATO) headquarters' (HQ) Aeronautical Information Management (AIM) Office (AJV-2) (callsigns@faa.gov) assigns the designators when the Federal Aviation Administration (FAA) determines that designators are advantageous and operationally appropriate to the U.S. ATC system. In the interests of safety, AJV-2 reserves the right to revise or cancel a designator assignment in the event of confusion or misuse. The FAA will not assign a three-letter company identifier nor its associated telephony designator without their approval by ICAO for world-wide use.

c. The four types of designators are entitled and described as follows:

1. Company designator (ICAO three-letter designator);

2. Telephony designator (used instead of phonetically pronouncing the three-letter company designator associated with the aircraft call sign);

3. Special telephony designator (special handling); and

4. Local telephony designator (local visual flight rules (VFR) operations only).

1−4−2. COMPANY DESIGNATOR

a. The company designator, together with a flight number, serves as the aircraft identification in the ATC system. Company designators are valid only for company business in accordance with the provisions of its operating certificate or servicing organization. Pilots will use standard identification procedures for personal flying. The company designator serves as the aircraft identification for the ATC system in several situations. The company designator and flight/trip number are used instead of the aircraft registration number for ATC security and operational purposes and may be used for the international telecommunications service when its use is advantageous.

b. ATO AJV-2 may assign a three-letter company designator to:

1. Scheduled aircraft operators that operate seven or more non-seasonal international air operations each week or at least 15 non-seasonal, domestic round-trip air operations each week;

2. Chartered aircraft operators that may require use of the AFTN;

3. Aircraft operators that require an ICAO three-letter designator for security purposes; or

4. Flight service companies and organizations that meet none of these requirements but are deemed worthy of an ICAO three-letter designator (i.e., Veterans Airlift Command).

1−4−3. TELEPHONY DESIGNATOR

a. The telephony designator (used instead of phonetically pronouncing the three-letter company designator associated with the aircraft call sign) is usually assigned by ATO AJV-2 at the same time as the ICAO three-letter designator. The call sign, together with a flight number, is the aircraft identification for radio voice communications with air traffic personnel.

b. The telephony designator should be phonetically pronounceable in English. The designator should not consist of more than two words and three

syllables. Numbers and phonetic letters may not be assigned as part of a telephony designator; however, existing telephony designators which violate this rule will remain in effect.

c. Use of telephony designators:

1. Increases operational security and accountability;

2. Reduces online noise distractions that create similar sounding telephony designator confusion;

3. Expedites air and ground communication, enhances auditory recognition, and reduces potential for mistakes in verbal communication; and

4. Satisfies specific requirements for international flight operations.

The operator must include a new or changed telephony designator in the "Remarks" section of the operator's flight plans for at least 60 days following the new designator's effective date.

1–4–4. SPECIAL TELEPHONY DESIGNATOR

a. ATO may authorize a special telephony designator to enable special handling by ATC. Examples of situations in which ATO may authorize a special designator include:

1. Federal, state, local, or tribal governmental organizations operating within the continental United States (CONUS);

2. Commemorative flight;

3. Large number of aircraft participating in an organized race;

4. Aircraft operating during emergencies or disasters; or

5. Aircraft that need special handling for security or test purposes.

Special telephony designators may be issued as valid for a limited duration, corresponding to the event requiring special handling.

A special identifier, from four to five characters, is assigned in conjunction with the special telephony. The special identifier, when pronounced, is the special telephony.

1–4–5. LOCAL TELEPHONY DESIGNATOR

A local telephony designator must be used only for communication with local airport traffic control towers (ATCT) and/or air traffic facilities during VFR operations; they must not be used for filing flight plans.

Flight schools or other operators which operate predominantly in a limited airspace are encouraged to investigate a local telephony identifier if it will improve communications and enhance safety. (ICAO will not grant a three-letter identifier to this type of operator.)

1–4–6. PROCEDURES FOR ASSIGNMENT OF DESIGNATORS

Companies and service organizations make all requests for designators to the appropriate Air Traffic Service Center. ATO AJV-2 (callsigns@faa.gov) administers final designator assignment.

a. Company Designator/Telephony Designator. The operator or service organization must submit the following information for a three-letter designator and the telephony designator request:

1. The name and address of operator or servicing organization;

2. The type of aircraft operation or service provided (a list of the operators served is required for service operations);

3. If applicable, a copy of the operator published flight schedule, monthly flight history, or projected flight schedule, highlighting international flight activity;

4. If applicable, a copy of the FAA certificate which authorizes the company's operations and states the 14 CFR part under which operations are to be conducted; and

5. Choices for requested three-letter designators and telephony designators, listed in their desired order. At least five choices are recommended to eliminate potential back-and-forth communications in the event a choice is not available/granted.

b. Special Telephony Designator.
Government aircraft operators (U.S. State, local, tribal, and law enforcement aircraft) desiring special telephony designators must contact Air Traffic System Operations Security via email at 9-ATOR-HQ-IFOS@faa.gov. All others must

contact ATO AJV-2 (callsigns@faa.gov). Operators must submit the following information for the special telephony designator request:

1. Type of flight;

2. Type of handling required;

3. Type and number of aircraft; and

4. Routes and duration of operation.

NOTE–
Special telephony designators do not receive a three-letter identifier.

c. Local Telephony Designator.
Local telephony designators are used only for communications with air traffic facilities for VFR operations as specified in a letter of agreement (LOA) between the local facility or service area and the requesting applicant. The LOA will contain provisions to ensure that the applicant uses local telephony designators only with facilities or service areas that are signatories to the agreement. The appropriate service center must review the LOA, coordinate with the military liaison to ensure the designator is not in use, add its recommendations to the letter, and forward the signed LOA to ATO AJV-2. The service center or facility will issue the signed LOA to the applicant.

1–4–7. CHANGES IN COMPANY STATUS OR CERTIFICATE REVOCATION/ CANCELLATION OR INACTIVITY

a. When an assigned three-letter company designator and/or telephony designator is no longer required, the company must notify ATO AJV-2 (callsigns@faa.gov) in writing. ATO AJV-2 must not reassign any designator it has released for at least 60 calendar days. Notification of change or release should be made when:

1. Operations are permanently suspended or cancelled;

2. Company name or address changes; or

3. A single operating certificate is issued resulting in a company name holding more than one designator. (Typically one of the existing designators is retained, and the other is cancelled.)

b. Principal Operations Inspectors (POI) must notify ATO AJV-2 when a company operating certificate is revoked or surrendered.

c. If a company fails to use a three-letter company designator or telephony designator for two years on an Instrument Flight Rules (IFR) flight plan in U.S.-controlled airspace, AJV-2 will place them on a watch list. AJV-2 will revoke and release any three-letter company designator and telephony designator that is not used for three years on an IFR flight in U.S.-controlled airspace. Any requests for a waiver of this policy should be made in writing to AJV-2 (callsigns@faa.gov).

1–4–8. AERONAUTICAL FIXED TELECOMMUNICATIONS NETWORK (AFTN)

The AFTN system also uses ICAO three-letter designators for identification, communication, and billing purposes. The AFTN system is an integrated, international system of aeronautical fixed circuits. The AFTN system provides the exchange of messages and flight plans between aeronautical and fixed stations within the network.

1–4–9. EFFECTIVE DATE AND PUBLICATION

The required administrative period for approval of a three-letter company and/or telephony designator is approximately 45 calendar days. ATO AJV-2 establishes an effective date for the designator. ATO AJV-2 advises the FAA facilities affected that the numbers will be published in FAA and ICAO documents (the current editions of ICAO Doc 8585, Designators for Aircraft Operating Agencies, Aeronautical Authorities, and Services, and FAA Order JO 7340.2, Contractions). Failure to submit the proper documentation may delay a designator assignment.

Section 3. Homebuilts/Experimental

Homebuilt and Experimental Aircraft*

Designator Criteria	Type Designator	Performance Information		
		Climb Rate (fpm)	Descent Rate (fpm)	SRS Category
Aircraft with cruise (indicated) airspeeds of 100 knots or less	HXA	500	500	I
Aircraft with cruise (indicated) airspeeds of greater than 100 knots, up to and including 200 knots	HXB	750	750	I
Aircraft with cruise (indicated) airspeeds of greater than 200 knots	HXC	1,000	1,000	I

NOTE–
**Configuration diversity and the fact that airworthiness certificates are issued to aircraft builders, vice manufacturers, necessitates the assignment of generic aircraft type designators based on cruise performance, rather than specific manufacturer and normal descriptive/performance information.*

NOTE–
*** All performance criteria has been estimated because configuration diversity precludes determining precise aircraft–specific information.*
