

Federal Aviation
Administration

2008 Cabin Safety Workshops

The Aerospace Medical Research Division of the
FAA's Civil Aerospace Medical Institute Presents the

2008 Cabin Safety Workshops

April 15-17

June 17-19

August 12-14

September 23-25

Thank you for your interest in the Civil Aerospace Medical Institute's (CAMI) Cabin Safety Workshops. These workshops, conducted at the Mike Monroney Aeronautical Center in Oklahoma City, Oklahoma, are designed to familiarize interested aviation personnel with important research activities conducted by the Federal Aviation Administration (FAA) in the area of airline cabin safety.

Cabin Safety Workshops are not intended, nor conducted, as basic training for inflight personnel; they are designed to provide supplemental information for established training programs.

Current research topics to be presented will include: aircraft seat and restraint system research, brace-for-impact positions, infant/child restraint systems, cabin air quality research, cosmic radiation exposure, aircraft evacuation research, water survival equipment and procedures, drug testing and toxicology, and aircraft accident research. Physiological training will be held on Thursday during each of the workshops. This training begins with an informative classroom presentation of the effects of high altitude flight operations on the human body and concludes with an altitude chamber "flight," allowing participants to actually experience the effects of a rapid decompression. Participants must bring a third class medical certificate with them if they plan to go in the altitude chamber.

Assignments to the workshops are awarded in the order that registration forms are received. Since the workshops fill up quite rapidly, it is important to return the registration form as soon as possible. After receipt of the registration form, a confirmation package will be forwarded to the applicant. This package will contain additional information about the workshops as well as a list of hotels near the aeronautical center. There are no fees for the workshops; however, participants are responsible for their own lodging and transportation.

The workshops begin on Tuesday and adjourn on Thursday afternoon. Each workshop will accommodate approximately 40 participants. Because of the limited number of slots for these workshops, we urge you to select attendees from your organization who are in a position to disseminate information to the greatest number of people. Instructors, inflight managers, or safety representatives are recommended attendees.

Our Research Division relies on feedback from the industry in order to continue providing the most timely and applicable research possible. Therefore the goal of these workshops is to provide an open forum for exchange of information between the participants and CAMI researchers.

Registration Form for 2008 Cabin Safety Workshops

Please email or Fax the information below for each participant. New procedures at the Aeronautical Center require us to provide the names of the workshop attendees to our security office. If the person registered for the workshop is unable to attend please e-mail the name of the alternate as soon as possible. A confirmation package containing a list of hotels in the area, the agenda, descriptions of activities, and a map to CAMI will be emailed to each participant so please provide accurate information and print legibly if a Fax registration is submitted. If you have not received a confirmation package within 2 weeks of the workshop please contact David.Palmerton@faa.gov. Participating non-U.S. citizens will need to fill out a Foreign Visitor Request Form. This form will be included in the confirmation package. Please print clearly and provide all the information listed on this form along with a valid email address for fast, efficient registration.

Name: _____

Company or Affiliation: _____

U.S. Citizen: Yes No

Address: _____

E-Mail Address: _____

Phone and Fax number: _____

If you have a preference for a particular workshop we will try to accommodate your request but cannot guarantee availability. If the workshop you specify is already full, reservations will be made in the next available workshop unless you tell us otherwise. Once reservations have been made you cannot switch to a different workshop without submitting another registration form. The dates for 2008 are: Please choose your preference.

April 15-17

June 17-19

August 12-14

September 23-25

If we are lacking information, cannot read it, or are unable to contact you via email we cannot guarantee your reservation will be confirmed.
