

## NextGen City Pairs - Denver

When a traveler starts to plan a trip or when an airline operator starts to plan air service, they will look at the points of origin and destination for flights. These points of origin and destination are thought of in terms of pairs of cities or pairs of metroplexes. In measuring city-pair performance, the NPS website looks at flights that either originate or conclude at a specific metroplex, such as the New York/Philadelphia metroplex to Southern California. For each city pair, an origin airport (for example, Newark Liberty International, EWR) and a destination airport (for example, Los Angeles International, LAX) are listed. The city pairs are unidirectional (only measuring EWR to LAX in the example above) and the NPS website reports them as recommended by the NextGen Advisory Committee (NAC).

All results are reported by Fiscal Year (FY), October 1 — September 30.

Flights can depart outside of the reportable hours, but must arrive during the reportable hours at the destination airport. For a list of the reportable hours for each airport, please see the Reference Guide.

**Average Airborne Time (FY) *Minutes*** During reportable hours at the destination airport, the average Airborne Time for flights between the selected city pair. The reportable hours vary by airport and the results are reported by fiscal year. Additional reportable hour information can be found in the airport information section of the **Reference Guide**.

Origin	Destination	2009	2010	2011	2012	2013
DEN	LAX	120.7	120.9	121.9	118.9	119.3
DEN	ORD	113.3	113.1	112.3	113.1	113.3

**Effective Gate-to-Gate Time (FY) *Average Minutes per Flight*** During reportable hours at the destination airport, the difference between the Actual Gate-In Time at the destination airport and the Scheduled Gate-Out Time at the origin airport. Flights may depart outside reportable hours, but must arrive during them. The reportable hours vary by airport and the results are reported by FY.

Origin	Destination	2009	2010	2011	2012	2013
DEN	LAX	153.2	151.8	154.1	151.8	158.2
DEN	ORD	150.5	147.8	148.1	147.7	154.5

**Airborne Distance (FY) *Nautical Miles*** During reportable hours at the destination airport, the average airborne distance of flights between the selected city pair. The reportable hours vary by airport and the results are reported by fiscal year. Additional reportable hour information can be found in the airport information section of the **Reference Guide**.

Origin	Destination	2009	2010	2011	2012	2013
DEN	LAX	<sup>1</sup>	<sup>1</sup>	759.9	761.2	760.5
DEN	ORD	<sup>1</sup>	<sup>1</sup>	812.8	814.0	816.7

<sup>1</sup> No data available.

---

**Efficiency:**

As described by ICAO; *efficiency addresses the operational and economic cost-effectiveness of gate-to-gate flight operations from a single-flight perspective. In all phases of flight, airspace users want to depart and arrive at the times they select and fly the trajectory they determine to be optimum.*

**Airborne Time Predictability (FY) Minutes** During reportable hours at the destination airport, the difference between the 85<sup>th</sup> and 15<sup>th</sup> percentiles of Airborne Time for flights between the selected city pair. The reportable hours vary by airport and the results are reported by FY. Additional reportable hour information can be found in the airport information section of the **Reference Guide**.

Origin	Destination	2009	2010	2011	2012	2013
DEN	LAX	17	16	18	14	15
DEN	ORD	14	15	14	13	14

**Effective Gate-to-Gate Time Predictability (FY) Minutes** During reportable hours, the difference between the 85<sup>th</sup> and 15<sup>th</sup> percentiles of the Effective Gate-to-Gate Time metric. The reportable hours vary by airport and the results are reported by FY. Additional percentile and reportable hour information can be found in the **Reference Guide**.

Origin	Destination	2009	2010	2011	2012	2013
DEN	LAX	40	35	40	33	44
DEN	ORD	42	40	45	38	46

**Predictability:**

As described by ICAO: *Predictability refers to the ability of airspace users and ATM service providers to provide consistent and dependable levels of performance.*
