

NextGen Metroplex – D.C.

The FAA is redesigning airspace and addressing airspace inefficiencies, introducing new Performance Based Navigation procedures and making use of Time Based Flow Management to make the D.C. Metroplex airspace more efficient and improving access to its airports. The effort focuses on a number of airports, including Baltimore/Washington International Thurgood Marshal (BWI), Ronald Reagan Washington National (DCA), Manassas Regional-Harry P. Davis Field (HEF), Washington Dulles International (IAD), and Martin State (MTN).

All results are reported by Fiscal Year (FY), October 1 — September 30.

Scheduled Flights	2,173	2,172	2,166	2,103	1,904

Projected Annual Benefits

Source: FAA

\$6.4 Million

Value of Fuel Savings

2.5 Million Gallons

Fuel Savings

25.0 Thousand Metric Tons

Carbon Savings

These are annual benefits expected to accrue upon completion of the NextGen near-term procedural improvements implemented by the FAA's Metroplex program. They are based on the FAA's preliminary assessment of proposed airspace improvements compared to operations in a year before any improvements were made. The value of the projected fuel savings is based on prevailing fuel prices at the time the analysis was conducted and could therefore differ from values used for other metroplexes. The data estimates are current as of July 2013.
