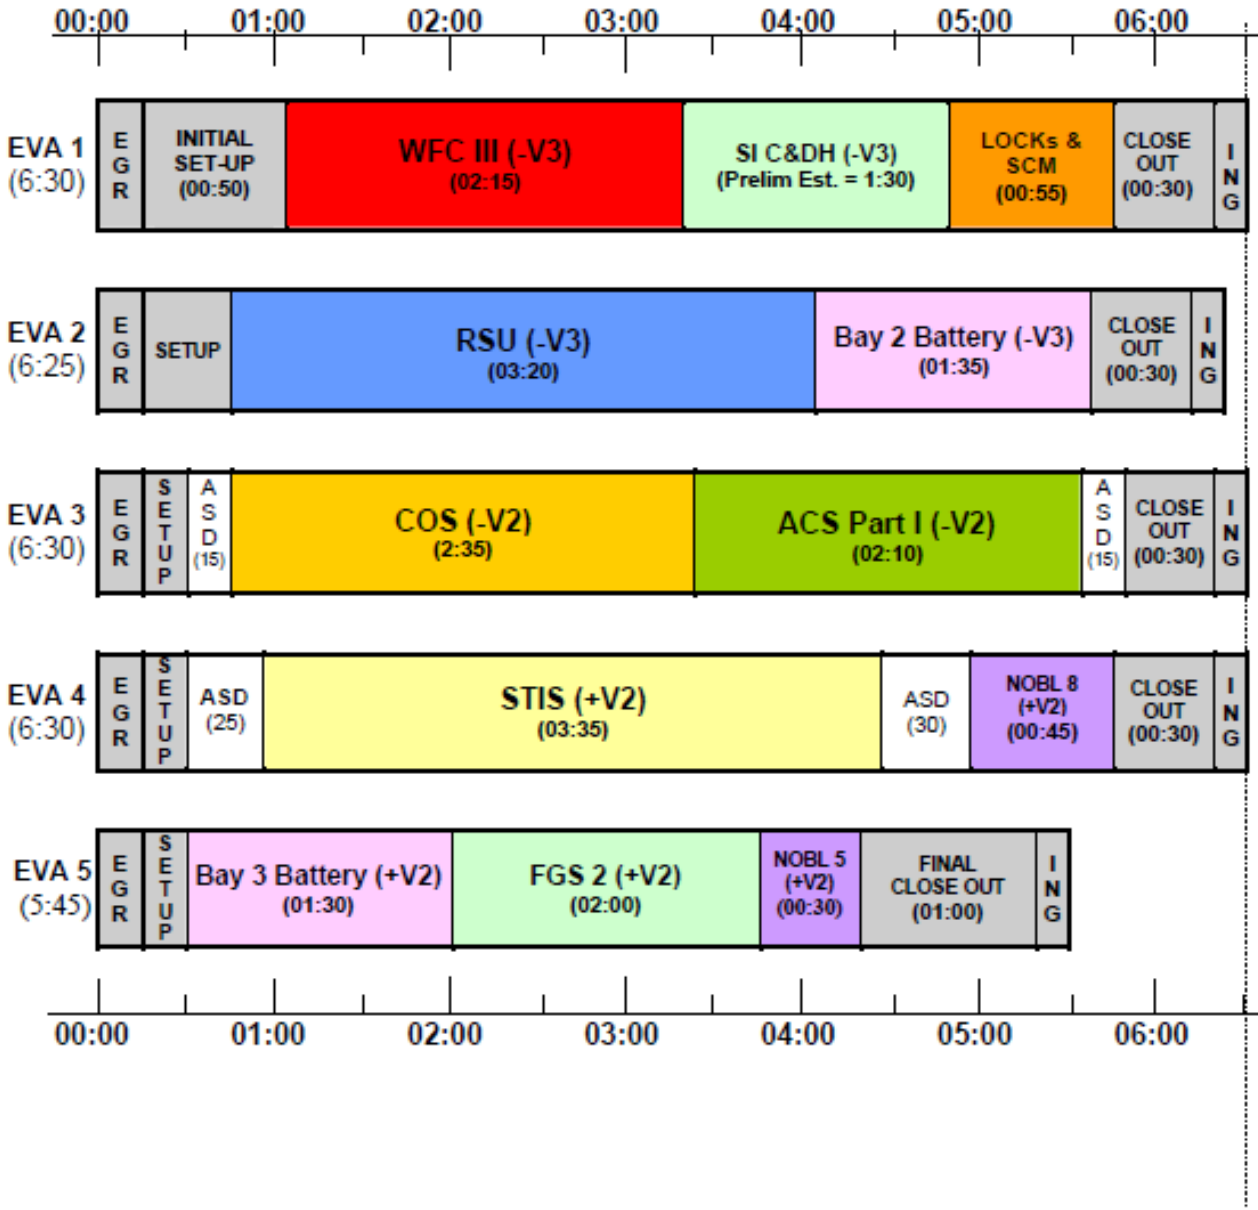
HST SM4 EVA Timelines (w/ ACS Part I only) - *DRAFT*



Notes:

1. At the end of ACS Part I, two cards have been removed.
2. Aft shroud door open/close for -V2 doors is shorter than the other doors due to LOCKs being installed.
3. ACS Part II is not shown in the timeline since FGS 2 is higher priority than one of the SI repairs. Therefore, ACS Part I is only listed as a prep on EVA 3 in case STIS repair is not successful. In that case, FGS would be deleted from EVA 5 and replaced with ACS Part II.
4. If ACS Part II is added into EVA 5, the total task duration for that block would be 2:15, it would be performed after the Bay 3 Battery, and the entire EVA would be executed with -V3 fwd.
5. An additional 55-60 min will be required to complete ACS during EVA 3, w/ LOCKs installed.
6. The time estimate for SI C&DH is very preliminary and will be impacted by new task requirements (qty of bolts required for installation, etc.)

JSC EVA/T. Gonzalez-Torres & C. Hansen

MODULAR LOCKER LAYOUT
