

This document contains redacted information. The FAA's written public comment form included the following statement regarding personal identifying information: "Please Note: Before including your address, phone number, e-mail address, or other personal identifying information in your comment, be advised that your entire comment – including your personal identifying information – may be made publicly available at any time. While you can ask us in your comment to withhold from public review your personal identifying information, we cannot guarantee that we will be able to do so." A good faith effort was made to remove personal identifying information from the comment submissions provided during the public scoping comment period.

This campaign comment was sent by 124 individuals.

**Subject:** Move SpaceX to Canaveral and away from Cumberland Island

Please consider moving the proposed SpaceX launch facility from Camden County, Ga. to Cape Canaveral, Fla.

A private space port directly across from Cumberland Island National Seashore which would require frequent closures of the national park to the public. It would consume and pollute massive amounts of water. It would also result in innumerable harms to ecology and human health. And it will cost taxpayers billions in promised federal subsidies and tax breaks. The Federal Aviation Administration (FAA) has already pledged \$6 billion toward a private launch site for SpaceX.

Meanwhile, just down the coast from Cumberland, the under-utilized Kennedy Flight Center in Cape Canaveral, Florida, would welcome the additional traffic. If the FAA is going to spend \$6 billion in spaceport development, why not use the existing, federally funded infrastructure that is already in place at Cape Canaveral and hardly being used?

Thank you for considering saving money, water, and wildlife by moving the proposed facility to Cape Canaveral.

Organizations across the Southeast are organizing against the proposed space port across from Cumberland Island. Join us in saving money, water, and wildlife by urging the FAA and SpaceX to move the proposed space port to the existing federally funded launch pad Cape Canaveral. Sign our petition on the home page and spread the word.
