The utility of VOLKAM SHEET

The information sharing sheet which is used for teleconference at volcanic ashes exercise is called VOLKAM sheet. Although Fukuoka ATMC prepared the VOLKAM sheet at VOLKAM 14 exercise in advance, it was not utilized by the participants because registration on the WEB had not completed.

If the participants verbally report important matters at a teleconference, we might miss hearing about beneficial information. If we record them in writing, however, it is valuable as an information sharing tool.
