**NOTICE TO THE PUBLIC**  
**Aeronautical Study 09-AAL-02NR**  
Request for Public Input

**Proposal to Decommission**  
**The Cold Bay Outer Marker (OM)**  
**At the Cold Bay Airport (CDB), Alaska**

1. **Proposed Change.** The Federal Aviation Administration (FAA) is seeking input from interested parties regarding a proposal to decommission the Cold Bay Outer Marker.

The FAA is proposing to decommission the CDB OM (75 MHZ Fan Marker co-located with the Elfee Non Directional Beacon). The CDB OM is no longer published or utilized on the Instrument Landing System (ILS) approach or any of the instrument approaches to Cold Bay. In addition, the FAA has determined that the CDB OM is not used to make up airways or holding fixes. Decommissioning the CDB OM will save money that is currently spent on maintaining and repairing the facility.

2. **Public Input:** The public is invited to submit, in writing, comments regarding the overall aeronautical aspects of the proposed decommissioning of the CDB OM.

This proposal is subject to change after review of public comments. Comments in writing concurring with or objecting to the proposed change may be indicated by use of the attached endorsement form, or may be mailed separately, or may be emailed (see link below).

3. **Comment Information:** Comments must be received by close of business, Wednesday, May 13, 2009 to be considered. You may E-Mail comments to [9-AAL-530-Comments@faa.gov](mailto:9-AAL-530-Comments@faa.gov) or mail them to the Federal Aviation Administration, Alaska Flight Service Information Area Group, 222 W. 7<sup>th</sup> Avenue, #14, Anchorage, AK 99513-7587.

This proposal can also be reviewed via internet on our web page.
