OASIS members:

The OASIS UDDI Specification TC has submitted the Universal Description, Discovery & Integration (UDDI) specification v3.0.2, an approved Committee Draft, to be considered as an OASIS Standard. The TC's submission is attached below.

In accordance with the OASIS Technical Committee Process, the specification has already gone through a 30 day public review period. (<http://lists.oasis-open.org/archives/tc-announce/200411/msg00001.html>.) OASIS members now have until the 15th of January to familiarize themselves with the submission below. OASIS members should give their input on this question to the voting representative of their organization.

By the 16th of the month we will send out a Call For Vote to the voting representatives of the OASIS member organizations, who will have until the end of the month to cast their ballots on whether this Committee Draft should be approved as an OASIS Standard.

The normative TC Process for approval of Committee Drafts as OASIS Standards is found at <http://www.oasis-open.org/committees/process.php#standard>

Any statements related to the IPR of this specification are posted at <http://www.oasis-open.org/committees/uddi-spec/ipr.php>

[2.] A clear English-language summary of the specification.

The Universal Description, Discovery, and Integration (UDDI) protocol is a key member of the group of interrelated standards that comprise the Web services stack. It defines a standard method for publishing and discovering the network-based software components of a service-oriented architecture.

The UDDI Version 3.0.2 Specification describes the Web services, data structures and behaviors of all instances of a UDDI registry.

[3.] A statement regarding the relationship of this specification to similar work of other OASIS TCs or other standards developing organizations.

The UDDI v3 specification builds on top of the OASIS UDDI v2 Standard. This version of the specification has been designed to be used in combination with other complementary Web services specifications. UDDI Version 3.0 builds on the vision of UDDI: a "meta service" for locating web services by enabling robust queries against rich metadata. Expanding on the foundation of the OASIS UDDI v2 Standard, UDDI v3 offers the industry a specification for building flexible, interoperable XML Web services registries useful in private as well as public deployments.

[4.] Certifications of Use

The chairs are pleased to report that seven OASIS organizational members have provided attestations with respect to successfully using UDDI V3, as required by the OASIS TC Process.

[5.] Public comments and resolutions.

The UDDI v3 Committee Specifications were submitted for public comment to the members@lists.oasis-open.org, tc-announce@lists.oasis-open.org, and xml-dev@lists.xml.org lists by OASIS on 1 November 2004. See <http://lists.oasis-open.org/archives/tc-announce/200411/msg00001.html>. [Comments submitted and their responses can be found at <http://lists.oasis-open.org/archives/uddi-spec-comment/200411/maillist.html> and <http://lists.oasis-open.org/archives/uddi-spec-comment/200412/maillist.html>.]

[6.] An account of and results of the voting to approve the specification as a Committee Draft.

The Committee Draft was approved unanimously. The ballot results can be obtained from: <http://www.oasis-open.org/apps/org/workgroup/uddi-spec/ballot.php?id=584>.

[7.] History of previous OASIS standardization attempts.

This version of the UDDI v3 specification has not been previously submitted to OASIS. UDDI v2 is an OASIS Standard.

[8.] Publicly visible comments archive.

The UDDI Spec TC committee and comment archives can be found at <http://lists.oasis-open.org/archives/uddi-spec/> and <http://lists.oasis-open.org/archives/uddi-spec-comment/> respectively.

[9.] OASIS IPR policy statement.

The chairs certify that all members of the TC have been provided with a copy of the OASIS IPR policy. IPR disclosures from UDDI Spec TC members are provided at http://www.oasis-open.org/committees/uddi-spec/ipr_statement.shtml.

[10.] Optionally, a pointer to any minority reports submitted by one or more TC members who did not vote in favor of approving the Committee Draft, or certification by the chair that no minority reports exist.

No minority reports have been submitted to the chair as of this writing.

Respectfully submitted by
Luc Clément, Systinet and Tony Rogers, CA
Co-Chairs, OASIS UDDI Specification TC
