

## **AME Review and Interpretation of the ECG** (Updated 11/30/2016)

The AME must review the ECG for the following **PRIOR** to transmitting:

- **Quality** - It is not uncommon for the FAA to receive an ECG that has leads missing or even an asystole picture. If the quality is poor and the ECG cannot be interpreted, the airman will receive a letter requiring a new ECG.
- **Correct airman/Correct exam** - Verify you have attached the correct ECG to the correct airman file. Also verify that **NO OTHER** documents are attached.
- **Also review:**
  - [Abnormalities/Pathology](#)
  - [Normal Variants](#)
