

## CACI - Hypothyroidism Worksheet

(Updated 11/24/2021)

The Examiner must review a current status report by the treating physician and any supporting documents to determine the applicant's eligibility for certification. If the applicant **meets ALL the acceptable certification criteria** listed below, the Examiner can issue. Applicants for first- or second- class must provide this information annually; applicants for third-class must provide the information with each required exam.

<b>AME MUST REVIEW</b>	<b>ACCEPTABLE CERTIFICATION CRITERIA</b>
Treating physician finds the condition stable on current regimen and no changes recommended	<input type="checkbox"/> Yes
Symptoms and signs	<input type="checkbox"/> None of the following: fatigue, mental status impairment, or symptoms related to pulmonary, cardiac, or visual systems
Acceptable medications	<input type="checkbox"/> Levothyroxine sodium (Synthroid, Levothyroid), porcine thyroid (Armour), liothyronine sodium (Cytomel), or liotrix (Thyrolar)
Normal TSH within the last one year.	<input type="checkbox"/> Yes

### **AME MUST NOTE in Block 60 one of the following:**

- CACI qualified hypothyroidism.
- Has current OR previous SI/AASI but now CACI qualified.
- NOT CACI qualified hypothyroidism. I have deferred. (Submit supporting documents.)
