

Drugs & Alcohol Don't Fly At Home or Abroad.

Drugs and alcohol still don't fly while outside of the country. As a flight crewmember, you are subject to the drug and alcohol testing laws and associated penalties of the countries you fly in and out of.

Federal regulations (including 14 CFR § 91.17) also apply regardless of where you fly. Violations of these regulations can cost you money, jail time, and/or your certificate.
