

# **PARC Telecon Summary**

## **March 26, 2009**

### **1. RNP Procedure Process**

**Alexander**

March 16<sup>th</sup> telecon brief. Contacted offline for updates. The RNP Process AT reviewed the draft paper that Frank Alexander had prepared and the comments received from Nick Tallman and others, along with a recommendation that the paper be developed to have more of a focus on goals of the FAA's Flight Plan. Frank has an Action to develop a second draft for the group's review and expects to have that ready in early April, at which time a telecon will be scheduled.

### **2. RNP Concepts and Benefits AT**

**Porter/Clausen**

Both reports with the cover letter were sent out to Dave Nakamura. The letter will be reviewed and the distributed to the PARC for comment. The reports will be posted to the KSN site. Updated ToRs to reflect future work will be completed by the end of this week.

### **3. RNP SAAAR Transition to ILS**

**Cramer**

The Team has received no further communication from Airbus, however, Boeing has supplied data recorded during an RNP to GLS approach flown in the engineering cab for the B737. This data will form a partial basis for understanding the aircraft behavior during such an approach. They are also on track to provide answers to the questionnaire in early April. A query will be sent to all other participants by March 31. It was suggested that Pascal Joly join the AT.

### **4. TBO**

**Cramer/Nakamura**

The TBO Summit meeting on the 24<sup>th</sup> was more of a "level setting" meeting where information was exchanged. There is still much work to do to go forward, before JPDO understands what their role will be and what actions need to be taken. Presentation materials should be able to be obtained and posted for PARC information. John Belk informed the PARC of a TBO demonstration program that has just started, and is planned to take place in the future at a Texas airport location. The PARC requested future updates on this program. The PARC TBO letter will be sent out shortly.

### **5. RNP SAAAR Update Action Team**

**Cramer**

The team will have a full team F2F on April 21 at AMTI ahead of the next PARC F2F to reach consensus on final recommendations regarding Appendix 3 and on the design bank margin for RF minimum radius construction. Sub-teams will have their recommendations this coming week for the full team to review prior to the F2F.

### **6. DSWG**

**Nakamura**

There is a need to re-form this group to work issues regarding the transition from traditional regulatory guidance to performance based guidance. Dave Nakamura and Jerry Davis will discuss this offline.

## **7. Autopilot Use/Rulemaking AT**

**Lucero/Demosthenes**

Information has been distributed to the group for review. A new KSN site has been created for the Team and all documents have been uploaded to the library. Ted Demosthenes is still working on the draft ToRs for the group.

### **New Business**

The updated draft April PARC F2F Agenda is available on the F2F workspace.

The PARC Charter states that the designated PARC members are to be the participants in the group activities. Many alternates are participating, which is welcome, but there is a need for more defined responsibilities as to who will be doing what. If PARC Members will be regularly sending alternates to PARC Meetings and to participate in PARC telecons, those alternates need to be named officially.
