

# 12I1 World Aviation Accident Rate

## Description

World-wide fatal aviation accident rate declines 10 percent compared to 2010. FY 2012  
Target: 0.556

## Commentary (12/2011)

The rate calculation changed from flight hours to departures. This change in calculation resulted in a change to monthly targets. A change request is in the coordination process. The new target for December is a total annual NTE of 4.0. As of December 31, there has been 1.0 fatal accident. There has been a total of 28 fatalities for the fiscal year.

Period Table

	Actual	Target	Target Lines - Index	Target Lines - Index Range
10/2011	0.551	0.551	100.0%	Green
11/2011	0.55	0.55	100.0%	Green
12/2011	0.55	0.55	100.0%	Green
