

12S74 Information Systems Security **OSI**

Description

Ensure no cyber security event significantly degrades or disables a mission-critical FAA system. FY 2012 Target: 0

Commentary (06/2012)

There were zero (0) cyber events that disabled or degraded mission critical systems during the month of June. This strategic measure includes three key initiatives: the Cyber Security Management Center, the Privacy Program, and the Information Systems Security Strategic Program. All activities and targets under the CSMC are green for the month of June. The ISS Program has one yellow target that has to do with ISS Specialized training it is slipping due to the cancellation of the July IT Conference, to mitigate this AIS is implementing more Key Personnel Training courses, and working closely with LOB/SOs to ensure that Key personnel Security Training is completed. The Privacy Program has two targets that are yellow. That target is slipping due to bottlenecks in the work required for Privacy Threshold Assessments. The program is implementing new processes and developing a KSN work-flow site to streamline these bottlenecks.

Period Table

	Actual	Target	Target Lines - Index	Target Lines - Index Range
10/2011	0	0	---	[Green]
11/2011	0	0	---	Green
