

13I2 NextGen Interoperability

Description

40 percent of all commercial aircraft from the top 25 aviation states are using fully interoperable NextGen technologies and capabilities by 2018. Fy13 Target: 0%

Commentary (12/2012)

This measure is on track. API is reviewing the final report from the International Civil Aviation Organization's (ICAO) 12th Air Navigation Conference and has begun preparations for ICAO's 38th Assembly. API is monitoring responses to ICAO's State Letter requesting each regional office to provide a prioritize list of Aviation System Block Upgrades (ASBUs) in preparation for a Planning and Implementation Regional Group (PIRG) coordination meeting to be held in March. With the collection of the regional ASBU prioritization and the final report of the March PIRG meeting, API will begin developing regional ASBU implementation guides (three for FY-2013) that help the FAA begin measuring the metric in 2015.

Period Table

	Actual	Target	Target Lines - Index	Target Lines - Index Range
10/2012	3	3	---	Green
11/2012	3	3	---	Green
12/2012	3	3	---	Green
