

## 16I2E3 International Efficiency Enhancement - Caribbean

### Description

Complete 90% of identified air navigation and airport activities working with the International Civil Aviation Organization (ICAO), regional civil aviation authorities.

Outcome 1: Develop an air traffic flow management and collaborative decision-making plan for partnering with key aviation organizations in the Caribbean to increase safety and efficiency with adjacent and nearby Flight Information Regions. Engage key stakeholders and Caribbean aviation authorities and air navigation service providers for support. Due September 30, 2016

Outcome 2: Partner with ICAO, industry stakeholders, and airport and industry associations to provide assistance to lead to improvements in safety and increased certification at airports with critical deficiencies and high levels of United States air traffic and passengers. Due September 30, 2016

Special Designations: Corporate STI, FAA Strategic Initiatives, STI

### Commentary (July 2016)

For FY-2016, the Global Leadership Initiative (GLI) and the Office of International Affairs (API) will address the Executive Committee (EC) priority of expanding Air Traffic Management (ATM) by concentrating the FAA's efforts on the Caribbean region.

**Outcome 1:** There are no new updated to report for July.

**Outcome 2:** In July, the FAA again confirmed that they completed all preparations for the General Aviation Workshop seminar for Cuba by the original due date. The Cubans, however, notified the FAA that they were unable to travel to the US and requested the seminar be moved to Cuba. Adjustments have been made to accommodate this requested change, but FAA is still waiting for confirmation of seminar dates for late August 2016. We understand that Cuba is under pressure to prepare for U.S. commercial service in October or November and may have difficulty in holding the General Aviation seminar in this fiscal year.

### Commentary (June 2016)

For FY-2016, the Global Leadership Initiative (GLI) and the Office of International Affairs (API) will address the Executive Committee (EC) priority of expanding Air Traffic Management (ATM) by concentrating the FAA's efforts on the Caribbean region.

**Outcome 1:** There are no new updated to report for June.

**Outcome 2:** In June, two (2) FAA Airport inspectors traveled to the Dominican Republic from June 14-16 to conduct the second of two Caribbean Aerodrome Certification Workshops. The first workshop was held in Jamaica in May. There were 53 participants from DR, Mexico, and other regional entities. **(Target 11 - Complete)**

**Status Table (Qualitative Metric)**

| <b>Period</b>  | <b>Actual</b> |
|----------------|---------------|
| <b>11/2015</b> | <b>Green</b>  |
| <b>12/2015</b> | <b>Green</b>  |
| <b>01/2016</b> | <b>Green</b>  |
