

## 0917 International Aviation Development Projects (FAA) Default (Last Value)

### Description

By FY 2013, arrange commitments for external funding for at least 35 aviation development projects (7 per year).  
FY 2009 Target: 7 projects

### Commentary (03/2009)

To date, one project for Chile Air Navigation Technologies Technical Assistance has been arranged. USTDA awarded a \$980,000 grant to the Civil General Aviation Directorate of Chile. The technical assistance will support a pilot project in Automatic Dependent Surveillance-Broadcast and Local Area Augmentation System airspace technologies at the Arturo Merino Benítez airport in Santiago. If successful, these technologies could be implemented at 11 other sites throughout the country.

Numerous projects have been identified and outreach to funding organizations continues. We are on track to achieve this performance target.

**Period Table**

	Actual (Line)	Target (Line)	Target (Line) - Index	Target (Line) - Index Range
10/2008	0	0	100.0%	Green
11/2008	0	0	100.0%	Green
12/2008	1	0	200.0%	Green
01/2009	1	0	200.0%	Green
02/2009	1	0	200.0%	Green
03/2009	1	0	200.0%	Green
