2007 AHR Business Plan

People are the foundation for FAA's mission accomplishment. The FAA's Flight Plan stresses that success will ultimately depend on the capabilities, effectiveness and efficiency of the men and women - the human capital - of the FAA, to bring the Flight Plan to life.

The Office of Human Resource Management (AHR) advises on and supports the management of FAA's people. AHR's human capital strategies go hand-in-glove with the FAA Flight Plan goals and vision, and are closely aligned with the President's Management Agenda - Strategic Management of Human Capital (PMA). AHR supports Flight Plan goals and PMA by creating innovative, flexible, and efficient personnel systems and policies. AHR systems and policies are designed to make the organization more effective with stronger leadership, increased commitment of individual workers to fulfill organization-wide goals, and a better prepared, better trained, safer workforce.

Besides functioning as Flight Plan Organizational Excellence Goal co-lead, AHR has the lead for 3 Performance Targets and 10 strategic initiatives in the Flight Plan.

The 3 Performance Targets are:
(1) Increase the score of the Employee Attitude Survey measure for the areas of management effectiveness and accountability by at least 5 percent, over the FY 2003 baseline of 35 percent, by FY 2010;
(2) By FY 2011, reduce the time it takes to fill mission-critical positions by 7 percent (to 51 days) over the FY 2006 baseline of 55 days; and
(3) Reduce grievance processing time by 25 percent by FY 2010, and maintain the reduction through FY 2011.

The 10 strategic initiatives are:
(1) Sustain and improve agency human capital planning and measurement processes.
(2) Implement corporate policies to improve how we select managers and strengthen probationary requirements for managers.
(3) Establish corporate managerial training programs that ensure we use resources effectively, align with agency goals, and drive continuous improvement.
(4) Establish a corporate senior leadership development process to build executive-level competencies.
(6) In external recruitment efforts, implement corporate strategies that expand the applicant pool to ensure equal opportunity to all applicants and result in attracting high quality candidates to the FAA.
(7) Establish corporate employee training programs to build leadership competence within the FAA workforce, support professional development, and promote continuous learning.
(8) Monitor Labor Relations service level agreements to ensure the requirements of line of business and staff offices are met.
(9) Develop and provide labor relations training for agency supervisors and managers.
(10) Using the Grievance Electronic Tracking System (GETS), reduce grievance processing time compared to the baseline measure.

The balance of AHR's responsibilities is reflected in the core business section of the Business Plan. AHR has grouped core business responsibilities into 3 key areas:

(1) Build Stronger Leadership: Effective leadership at all levels is critical to achieving FAA's mission and its strategic goals. FAA executives and managers must develop the right competencies and skills to successfully lead employees, control costs, make data-driven decisions, and manage change. FAA employees must be equipped with the self-management and team leadership skills needed to meet mission requirements and respond to new challenges. By systematically identifying, developing, and rewarding effective leaders, AHR promotes organizational excellence and accountability.

(2) Facilitate Agency Cost Control: The FAA and the aviation industry are facing a period of tight budgets. As the agency's budgetary allotments continue to be squeezed and operating costs continue to rise, we find ourselves in the position where cost savings is not just a good idea - it is a necessity. AHR leads several initiatives designed to help the agency control costs.

(3) Improve Performance and Customer Satisfaction: Through Human Resource policy and operations AHR assists FAA with effective and
efficient human capital management. AHR policy and operations provides plans, programs, and initiatives associated with: Employment; Compensation; Human Resources Information and Automation; Executive Resources; Learning and Development; Human Capital Planning, Measurement, and Evaluation; Labor and Employee Relations; Benefits; Workplace Environment; and Operational Human Resources Services to Organizations within FAA. While responsible for the most fundamental Human Resource functions, AHR is constantly looking for ways to improve organizational performance and customer satisfaction. This involves creating streamlined organizational structures and processes, consistent application of personnel policies, ensuring a skilled HR workforce, and the development and implementation of supporting technology.
