

13F1 Renewable Jet Fuel

Description

One billion gallons of renewable jet fuel is used by aviation by 2018. FY13 Target: Develop viable measurement system to accurately track future U.S. alternative jet fuel use; Advance qualification and deployment of sustainable alternative jet fuels

Commentary (06/2013)

FY13 target completed. Submitted PLA report in June 2013 of 737-800 APU emissions tests and combustor rig tests of a jet biofuel with varying levels of aromatic content.
