

14I1B2 Global Data Development

Description

Ensure a consistent, validated international strategy by developing an integrated, data-informed approach to prioritize and make decisions about international activities and key relationships.

Special Designations: OSI

Commentary (March 2014)

Through March, both the International Advisory Board (IAB) and International Steering Committee (ISC) have tasked down and completed a Data-Informed Prioritization Process (DIPP) outline for a yet to be constituted Task Force.

Challenges identified to date are the eventual identification of qualified Task Force members and lead. The next steps to address this challenge are to submit the Task Force outline to the International Advisory Board (IAB) for approval.

Commentary (February 2014)

Through February, the International Steering Committee has held its first meeting in February and has undertaken the following tasks:

1. Develop an International Civil Aviation Organization engagement strategy that corporately analyzes our current commitments to determine how best to deploy personnel in the future; and
2. Explore data necessary to prioritize overall FAA international activities.

Task #1 is underway and task #2 will begin on March 19.

Status Table (Qualitative Metric)

Period	Actual
02/2014	Green
03/2014	Green
