

14C.132A4 Support accelerated maturation of CLEEN aircraft technologies through testing, demonstration and assessment, G06M.02-01

Description

This program supports sustaining our future with an outcome of the US aviation sector being a model for sustainable growth. Progress and success of this program will be measured against the performance metric to improve NAS-wide energy efficiency by at least 2% per year. This program supports accelerated maturation of CLEEN aircraft technologies through testing, demonstration and assessment. In addition, it focuses on exploration of energy efficient and environmentally favorable operational procedures. Both of these advances lead to improved energy efficiency which will be managed and tracked via the Environmental Management System. This program accelerates securing qualification of commercial alternative fuels through testing and demonstration as well as analysis of aviation environmental standards on NAS-wide operational environmental performance.

Special Designations: OSI, DOT Goals

Commentary (September 2014)

PLA deliverables were submitted to ANG. Activity is complete.

Commentary (August 2014)

PLA deliverables were submitted to ANG. Activity is complete.
