

16C.66A Climate Impact

Description

Demonstrate progress towards achieving NAS-Wide carbon neutrality for domestic operations by 2020 based on a 2005 baseline.

Special Designations: DOT Goals

Commentary (March 2016)

Green/On track. Work continues on the development of an emissions prediction tool based on fuel components. This work is based around the development of future alternative jet fuels that are sustainable and lower in carbon impacts. New data is being processed, and validation from GE engine cycle decks are being explored.

Commentary (February 2016)

On track. Work continues on the development of an emissions prediction tool based on fuel components. This work is based around the development of future alternative jet fuels that are sustainable and lower in carbon impacts. New data is being processed, and validation from GE engine cycle decks are being explored.

Status Table (Calculated Rollup Metric)

Period	Target	Actual	Status
11/2015	1	1	Green
12/2015	1	1	Green
01/2016	1	1	Green
02/2016	1	1	Green
03/2016	1	1	Green
