

TX 38XS RNAV (GPS) RWY 32 AMDT 1A

8-26-22 PRB RESULTS: Returned for Rework

REQUESTED BY: AJV-A

PRB RESULTS: RETURN FOR REWORK

CATEGORICAL EXCLUSION:

- IAW 1050.1: NEEDS TO BE UPDATED: THE DOCUMENT IS FROM 2005 AND IT IS FOR RNAV (GPS) RWY 14, ORIG, SAN RAFAEL RANCH, SANTA ELENA, TN (SHOULD BE TX). **CATEX UPDATED**

EXPLANATION REQUIRED FOR CHARTING RBO AWOS-3 (118.175). THE CHART NOTES SAY TO USE THE FALFURRIS ALTIMETER SETTING BRO AWOS-3 (118.125) AS ALTERNATE ALTIMETER SETTING. RBO IS

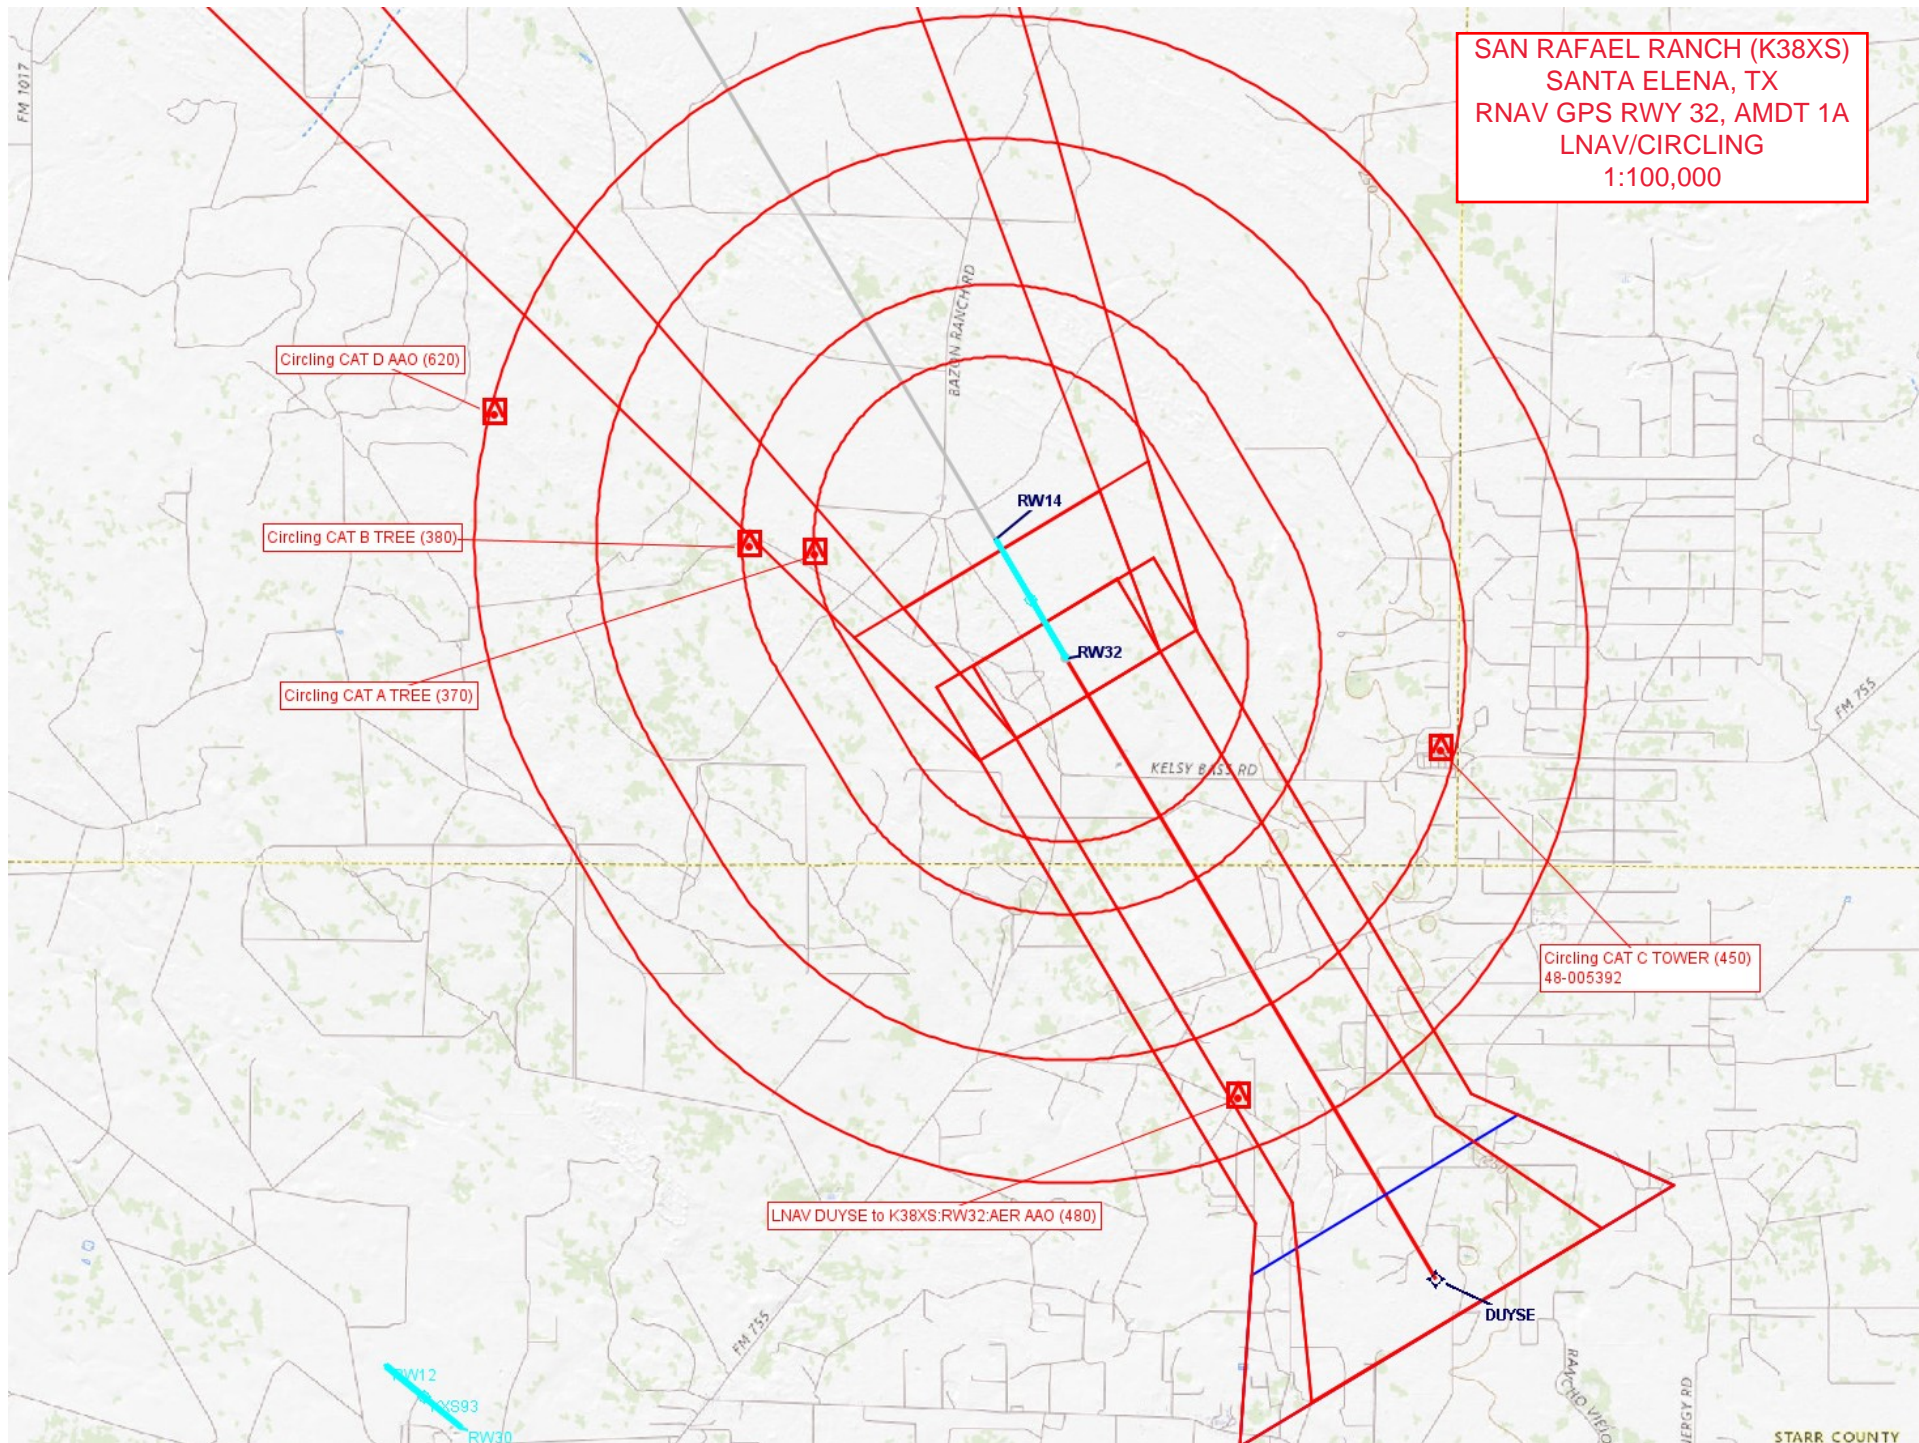

LOCATED 90 MILES NE OF SAN RAFAEL RANCH (38XS) WHILE BRO IS LOCATED 35 MILES NE. **Altimeter setting confirmed and in AIRNAV**

FLIGHT INSPECTOR REMARKS: Sat with changes. Chart has RBO AWOS-3 118.175 as a published altimeter setting source. I believe this frequency is listed in error, Nueces County (KRBO) is 71.5 NM NE of 38XS. This frequency is not listed on the RWY 14 approach chart. Chart note directs users to use local altimeter setting (CTAF), and if not received to use the Falfurrias altimeter setting. No mention of Nueces County (KRBO).

Attn. of:

To: File

- A. Proposed Action: Establish a standard instrument approach procedure (IAP) titled RNAV (GPS) RWY 14, ORIG, San Rafael Ranch, Santa Elena, TN.
- B. This action qualifies for consideration as a categorically excluded action as it falls under the following specific categorical exclusion provision: Publishing of Instrument Procedures conducted over noise sensitive areas; modifications to currently approved instrument procedures conducted below 3,000 feet AGL that do not increase minimum altitudes and landing minima.
- C. Other supporting information:
 - ASO-220 Memorandum dated April 5, 1989
 - AFS-1 Memorandum dated September 21, 1994
 - AVN-100 Memorandum dated July 23, 1996
- D. Review and analysis by the FAA does not indicate that any extraordinary circumstances listed in Order 1050.1 or other reasons exist that would cause the undersigned to believe that the proposed action might have the potential for causing significant environmental impacts upon its implementation. The proposed action does not individually or cumulatively have a significant effect on the human environment and, therefore, is determined to be categorically excluded from further environmental documentation according to Order 1050.1

Request ID: 38XS_23317 Single or Multiple Procedure: Multiple Procedure Name(s): RNAV (GPS) RWY 14 RNAV (GPS) RWY 32 Historic Properties: None Procedure Request Description: Description of Proposed Action: The instrument flight procedures for San Rafael Ranch, 38XS in Santa Elena, Texas require amendment. Procedure Description: RNAV (GPS) RWY 14 Aeronautical Information Services Instrument Flight Procedures Group has been conducting a minimum required obstacle clearance (ROC) evaluation for all instrument approach procedures in the National Airspace System inventory that published circling line of minima. This obstacle evaluation was required to evaluate the expanded circling radii for the larger circling areas for all category of aircrafts to ensure that the increased circling maneuvering met the safety that were implemented by Flight Standards implemented criteria. The revised criteria warranted an amendment to this special procedure to ensure it met the minimum ROC for each aircraft category. The lateral navigation (LNAV) minimum descent altitude (MDA) for all categories changed to 840 feet. The LNAV Category C visibility increased to 1 1/2 statute miles. The circling Category A,B&C MDA changed to 840 feet and Category D MDA changed to 920 feet. The flight track remains the same. All the other changes to the procedure are administrative notes that have updated to comply with current documentation criteria. RNAV (GPS) RWY 32 Aeronautical Information Services Instrument Flight Procedures Group has been conducting a minimum required obstacle clearance (ROC) evaluation for all instrument approach procedures in the National Airspace System inventory that published circling line of minima. This obstacle evaluation was required to evaluate the expanded circling radii for the larger circling areas for all category of aircrafts to ensure that the increased circling maneuvering met the safety that were implemented by Flight Standards implemented criteria. The revised criteria warranted an amendment to this special procedure to ensure it met the minimum ROC for each aircraft category. The LNAV MDA (all Categories) changed to 740 feet. The LNAV Category C and D visibility increased to 1 1/4 statute miles. The circling Category D MDA changed to 920 feet. The flight track remains the same. All the other changes to the procedure are administrative notes that have updated to comply with current documentation criteria. Procedure Benefit: The RNAV (GPS) RWY 14 and the RNAV (GPS) RWY 32 are special procedures developed and maintained by the FAA and the use of this procedure requires permission of the owner. In addition, it requires specific authorization by FAA Flight Standards Division.

Procedure Need:

This special procedure is owned and utilized by San Rafael Ranch proponents.

The District EPS has reviewed the proposed action and determined that no extraordinary circumstances exist as defined in FAA Order 1050.1F or JO 7400.2N that preclude a categorical exclusion determination. The proposed action would not route traffic over noise-sensitive or environmentally-sensitive areas or lower traffic altitudes.

Declaration of Exclusion:

The FAA has reviewed the above referenced proposed action and it has been determined, by the undersigned, to be categorically excluded from further environmental documentation according to FAA Order 1050.1, "Environmental Impacts: Policies and Procedures." The implementation of this action will not result in any extraordinary circumstances in accordance with FAA Order 1050.1.

Basis for this Determination:

This review was conducted in accordance with policies and procedures in Department of Transportation Order 5610.1, "Procedures for Considering Environmental Impacts" and FAA Order 1050.1.

The applicable Categorical Exclusion is:

5-6.5.i: Establishment of new or revised air traffic control procedures conducted at 3,000 feet or more above ground level (AGL); procedures conducted below 3,000 feet AGL that do not cause traffic to be routinely routed over noise sensitive areas; modifications to currently approved procedures conducted below 3,000 feet AGL that do not significantly increase noise over noise sensitive areas; and increases in minimum altitudes and landing minima. For modifications to air traffic procedures at or above 3,000 feet AGL, the Noise Screening Tool (NST) or other FAA-approved environmental screening methodology should be applied. (ATO, AVS)

The above flight procedure has been developed within the accepted parameters.
