Memorandum

Date: January 12, 2024

To: Instrument Flight Procedures Service Providers

From: Douglas F. Rodzon, Acting Manager, Flight Technologies and Procedures Division

Subject: Waiver to Instrument Procedure Design Initial Departure Fix Criteria

This memorandum waives FAA Order 8260.58C, United States Standard for Performance Based Navigation (PBN) Instrument Procedure Design, Chapter 5, Section 5-7, Helicopter Departure, (Flat Surface Area and Visual Segment for Proceed Visually Departures) construction.

Paragraph 5-7-3, Flat Surface Area, is waived to allow a 1 x along-track tolerance (ATT) radius around the initial departure fix (IDF) for flat surface area construction. Paragraph 5-7-4, Visual Segment for Proceed Visually Departures, is waived to allow the visual segment to end at the plotted position of the IDF instead of the point of earliest reception.

Implementation of this waiver requires instructions for conducting a visual flight rules (VFR) climb to the IDF for a departure with a VFR segment to specify a direction and an altitude for crossing the IDF. See FAA Order 8260.46J, Departure Procedures (DP) Program, Appendix F, Helicopter Area Navigation (RNAV) Departure Procedures, paragraph 3.b(2).

Example:

VFR Segment: VFR Climb to (IDF WPT), cross (IDF WPT) at or above (IDF Altitude) on track (outbound track).

This memorandum remains in effect until rescinded. Please direct all inquiries to the Flight Procedures and Airspace Group, Standards Section at 9-AWA-AVS-AFS420@faa.gov.
