The diagram illustrates the approach procedure. It shows a glidepath starting from a point 7000 feet above the runway, descending at an angle of 128 degrees. The glidepath is not coincident with the VGSI glidepath, which has an angle of 3.00 degrees and a threshold crossing height (TCH) of 45 feet. The LERAY point is marked on the glidepath. The distance from the LERAY point to the runway is 1.5 NM. The distance from the LERAY point to the runway is also 4.8 NM. The runway is labeled RW13. The diagram also shows the approach from the opposite direction, with a 0.3% DOWN slope and a distance of 8104 x 150 feet. The diagram includes various symbols for the approach, such as the LERAY point, the runway, and the approach lights.

The diagram shows the airport layout. The runway is labeled RW13. The taxiway is labeled TW13. The diagram also shows various buildings, including the TWR (Tower) at 4426 feet, the BCN (Building) at 4433 feet, and the SOPL (Building) at 4294 feet. The diagram includes various symbols for the airport, such as the runway, taxiway, and buildings.
