Diagram illustrating the HELER 6 NM Holding Pattern. The pattern is defined by a series of turns around a fix (JIKTA) and a DME station (RW26L). The pattern starts at 7000 feet, descends to 6600 feet, and then turns 260 degrees. The pattern is 6 NM in length. The diagram shows the 7000 and 6600 foot altitudes, the 260 degree turn, the 6 NM holding pattern, and the 7000 and 6600 foot altitudes.
