

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504			
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.				
				Resources from Table 4. Section 4(f) Resources Identified in the Study Area			Count: 247
				ID #	Resource Name	Address	Notes
-	1	-	-	1	Los Padros National Forest	6750 Navigator Dr., Goleta, CA 93117	
-	-	-	-	2	Central Park	250 Central Ave., Fillmore, CA 93015	
-	1	-	-	3	Delores Day Park	250 Central Ave., Fillmore, CA 93015	
-	1	-	-	4	Shiell's Park	649 C St., Fillmore, CA 93015	
-	1	-	-	5	Arroyo Vista Community Park	4550 Tierra Rejada Rd., Moorpark, CA 93021	
-	1	-	-	6	Country Trail Park	11701 1/2 Mountain Trail St., Moorpark, CA 93021	
-	1	-	-	7	Glenwood Park	11800 Harvester St., Moorpark, CA 93021	
-	1	-	-	8	Mountain Meadows City Park	4350 Mountain Meadow Dr., Moorpark, CA 93021	
-	-	-	-	9	South Meadows Park	11701 1/2 Mountain Trail St., Moorpark, CA 93021	
-	1	-	-	10	Tierra Rejada Park	11900 Mountain Trail St., Moorpark, CA 93021	
-	1	-	-	11	Toland Park	525 Toland Rd. Santa Paula, CA 93060	
-	1	-	-	12	Hopper Mountain National Wildlife Refuge & Sespe Condor Sanctuary	7400 Pine Grove Rd., Santa Paula, CA 93060	
-	1	-	-	13	Poindexter Park	500 Poindexter Ave., Moorpark, CA 93021

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504			
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria			
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Resources Count: 5504

Criteria				Resources Count: 5504		
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

## Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

## Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504		
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504		
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504		
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504			
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504			
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria				Resources Count: 5504				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267			
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267		
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267		
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.			
1	-	1	-	90	Saint Vincent de Paul Church	1925
1	-	-	-	95	Rindge - Frederick Hastings House	1904
1	-	-	-	99	Residence	1896
1	-	-	-	102	Residence	1880

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267		
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.			
1	-	-	-	855	Statton Residence	1911

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267		
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267			
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 1 Evaluation**

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.					
1	-	-	-	488157	Bronson Building	Commercial-Mixed	1914	Mixed Use - Commercial/Office/Residential
1	-	-	-	488159	Brock and Company Building	Commercial-Retail	1922	Department Store
1	-	-	-	488160	Bank of Italy	Commercial-Finance	1923	Bank/Savings & Loan
1	-	-	-	488161	Los Angeles Athletic Club	Commercial-Mixed	1911	Mixed Use - Commercial/Office/Residential

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemeteries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 1 Evaluation

The Tier 1 evaluation screens those historic properties whose significance potentially depends in whole, or in part, upon a setting that is sensitive to auditory or visual changes that could result from the Action. Many resources identified in the study area may satisfy more than one of the criteria in the Tier 1 evaluation, however, any resource found to satisfy at least one of the Tier 1 criteria below was included in the Tier 2 evaluation. Thus, further analysis under Tier 1 beyond the initial screening for inclusion in the Tier 2 evaluation was not conducted. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Criteria 1 indicates criteria applies to resource				Resources Count: 3267				
A. Properties constructed before or deriving their significance during a period prior to the construction of KLAX in 1928.	B. Properties that are composed of large, open spaces that may constitute cultural landscapes. This category included parks, cemetaries, school campuses, ranches, etc. (>3 acres).	C. Properties that could be considered sacred in nature, such as traditional cultural properties, places of worship, or places for contemplation.	D. Properties whose use would be sensitive to changes in noise that were not already identified in the other three categories. This includes theatres, performance spaces, movie and art studios, libraries, and similar spaces.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201			
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.				
					Resources from Table 4. Section 4(f) Resources Identified in the Study Area			Count: 18
					ID #	Resource Name	Address	Notes

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201			
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201		
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201		
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201		
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

Tier 2 Evaluation

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201			
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201				
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201				
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201				
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201				
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201				
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201				
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201				
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201				
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201				
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201				
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201				
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201				
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

**SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING**

**Tier 2 Evaluation**

The Tier 2 evaluation **excludes** those historic properties whose setting and feeling were not significant factors in their historical significance due to certain types of land uses that are particularly prone to high degrees of visual and auditory intrusion, location in a dense urban environment subject to intensive uses, high levels of ambient noise, or changes to the surrounding environment that would alter the original settings of these resources from when they were constructed. The information on the resources in the study area is presented in a similar layout and in the same order as the tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

Exclusion criteria 1 indicates exclusion criteria applies to resource					Resources Count: 201				
A.Industrial/ commercial buildings, public offices, and civic buildings.	B. Twentieth century historic residential districts	C. Private residential properties, hotels, and apartment complexes that do not include gardens or landscapes.	D. Public spaces and campuses intended for public use with a high degree variability in auditory or visual effects.	E. Altered properties, those that now exist in a highly dense urban environment, or for which information is insufficient, inaccurate, missing, or unverifiable.

294022	Forum Theatre	Theater, Motion Picture	1923

## Appendix F - Supplemental Section 4(f) and Section 106 Resources Review

### SECTION 106 & SECTION 4(F) RESOURCES REVIEW - POTENTIAL RESOURCES WITH QUIET AS AN ATTRIBUTE OR SETTING

#### Tier 2 Findings

The Tier 2 evaluation findings are provided below. This list focuses on those historic and cultural resources whose setting and feeling are considered significant factors in their historical significance and which are considered noise sensitive areas where the land use compatibility guidelines in 14 CFR Part 150 may not be relevant to the value, significance, and enjoyment of the area in question. The information on the resources in the study area is presented in a similar layout and in the same order as the referenced tables in Appendix A. Resource counts are provided in the headers for each of the referenced tables.

**Resources Count: 201**
