

Community Engagement Opportunities

Past Workshops (April 2017)

The Federal Aviation Administration (FAA) held three public information workshops in April 2017 in the Henderson, Las Vegas and North Las Vegas communities to introduce the Project and the issues to be addressed. These workshops were intended to increase awareness about the ongoing efforts and allow an opportunity to provide feedback. In April 2019, preliminary designs were presented during three additional workshops in the same areas. Comments received during these workshops were reviewed by the Metroplex Team for potential changes which would not adversely affect safety.
