
APPENDIX A

Correspondence and Presentations Referencing the Development of the Proposed Action

Congress of the United States
Washington, DC 20515

January 8, 2007

The Honorable Marion C. Blakey
Administrator
Federal Aviation Administration
800 Independence Avenue SW
Washington, D.C. 20591

Dear Administrator Blakey:

We are writing to you to request changes to the Instrument Landing System (ILS) approach for Runway 19 (ILS-19) at Teterboro Airport.

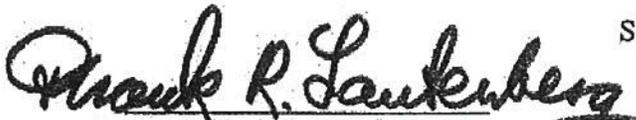

We continue to share the concerns expressed by a number of our constituents and also the Port Authority of New York and New Jersey regarding the flight path approved for ILS-19 at Teterboro Airport. The flight path brings air traffic very close to several high-rise apartment and office buildings, as well as the Hackensack University Medical Center. Residents and visitors to these buildings and the medical center continue to express great alarm at the close proximity of many of these aircraft as they approach the airport.

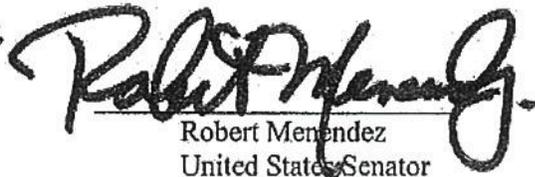

We understand that the original intention of the ILS was to assist aircraft flying into Teterboro Airport during inclement weather. However, pilots have increasingly used the instrument approach during all weather conditions, exceeding the traffic anticipated by FAA officials when implementing the approach. Furthermore, there are approximately 30,000 more operations per year at Teterboro Airport than the FAA originally projected when developing ILS-19.

In order to improve the safety of Teterboro Airport as well as the airport's relationship with the surrounding community, we respectfully request that the FAA investigate the feasibility of amending ILS-19 to ease the concerns shared by our constituents. We ask that the FAA work with the Port Authority of New York and New Jersey to examine the possibility of changing the ILS approach in a way that steers aircraft away from the Hackensack University Medical Center and the surrounding residential buildings. Taking the proactive step of altering the existing ILS system would benefit all of the airports' stakeholders, including aircraft operators, passengers, and local residents.

We appreciate your attention to this request, and look forward to working with you to improve the safety of Teterboro Airport as well as the quality of life for those living near the airport.

Sincerely,

Frank R. Lautenberg
United States Senator

Robert Menendez
United States Senator

Steven R. Rothman
Member of Congress

PRINTED ON RECYCLED PAPER

Cc: The Honorable Mary E. Peters, U.S. Transportation Secretary

THE PORT AUTHORITY OF NY & NJ

Renee D. Spann
Manager, Teterboro Airport

April 6, 2015

The Honorable Ms. Liz White
Mayor of Allendale
500 West Crescent Avenue
Allendale, NJ 07401

Dear Mayor White,

On April 30, the Federal Aviation Administration (FAA) will publish a new approach procedure for aircraft landing on Runway 19 at Teterboro Airport. This new procedure was established in response to requests from elected officials and Bergen County communities to avoid Hackensack University Medical Center. In an effort to reduce aircraft noise impacts, this approach path would primarily follow NJ State Rt. 17. However, there is potential for an increase in air traffic over parts of your community that are in close proximity to this new flight path.

Teterboro Airport management invites you or an appointed representative of your community to attend the next meeting of the Teterboro Aircraft Noise Abatement Advisory Committee (TANAAC) taking place Wednesday April 22 at 7:00 PM at 90 Moonachie Avenue in Teterboro. TANAAC is a committee comprised of representatives of fourteen towns surrounding Teterboro Airport who meet periodically with Airport officials to discuss aircraft noise concerns. More information about TANAAC is enclosed with this letter.

Please RSVP for this meeting by contacting Gabriel Andino at (201) 393-0399 or gandino@teb.com. We look forward to seeing you.

Sincerely,

Renee D. Spann
Manager
Teterboro Airport

Noise Abatement Procedure Options OSG/FPT TEB TANAAC

Presented to: TEB TAANAC

By: Federal Aviation Administration

Date: July 26, 2017

Federal Aviation
Administration

Federal Aviation
Administration

Instrument Flight Rules vs. Visual Flight Rules

- **Instrument Flight Rules (IFR)**
 - IFR means navigating entirely on instruments, or under ATC control.
 - When any pilot flies under IFR, they are required to be under the direction of ATC (Air Traffic Control). They direct the Captain regarding the aircraft direction course, speed, altitude.
- **Visual Flight Rules (VFR)**
 - VFR means navigating by what's is on the ground
 - VFR (Visual Flight Rules) usually means that you are flying without definite control from ATC.

Procedures Considered – Deemed Not Feasible

- **ILS Runway 19 Offset**

- 693' ABC Antenna in path of flight
- Minimums will be raised reducing capacity in poor weather

- **RNAV Visual Runway 19**

- Not available to all aircraft in all weather conditions
- Requires special user training and raises safety concerns
- An RNAV GPS or RNP would provide similar flight path and greater availability with fewer safety concerns.

Feasibility of Quiet Visual Retest

- **Retest is a feasible option:**
 - Environmental analysis is required prior to retest
 - Request Port Authority obtain Operator commitment to use the procedure prior reinvesting in environmental analysis.
 - Previous test was under utilized by Operators preferring to fly utilizing instruments versus a visual procedure.
 - FAA cannot require the Pilot in Command to fly this procedure.
 - Only available in Visual Meteorological Conditions because it uses visual references not instruments.
 - Waypoint will remain on the chart to assist with identifying landmarks.

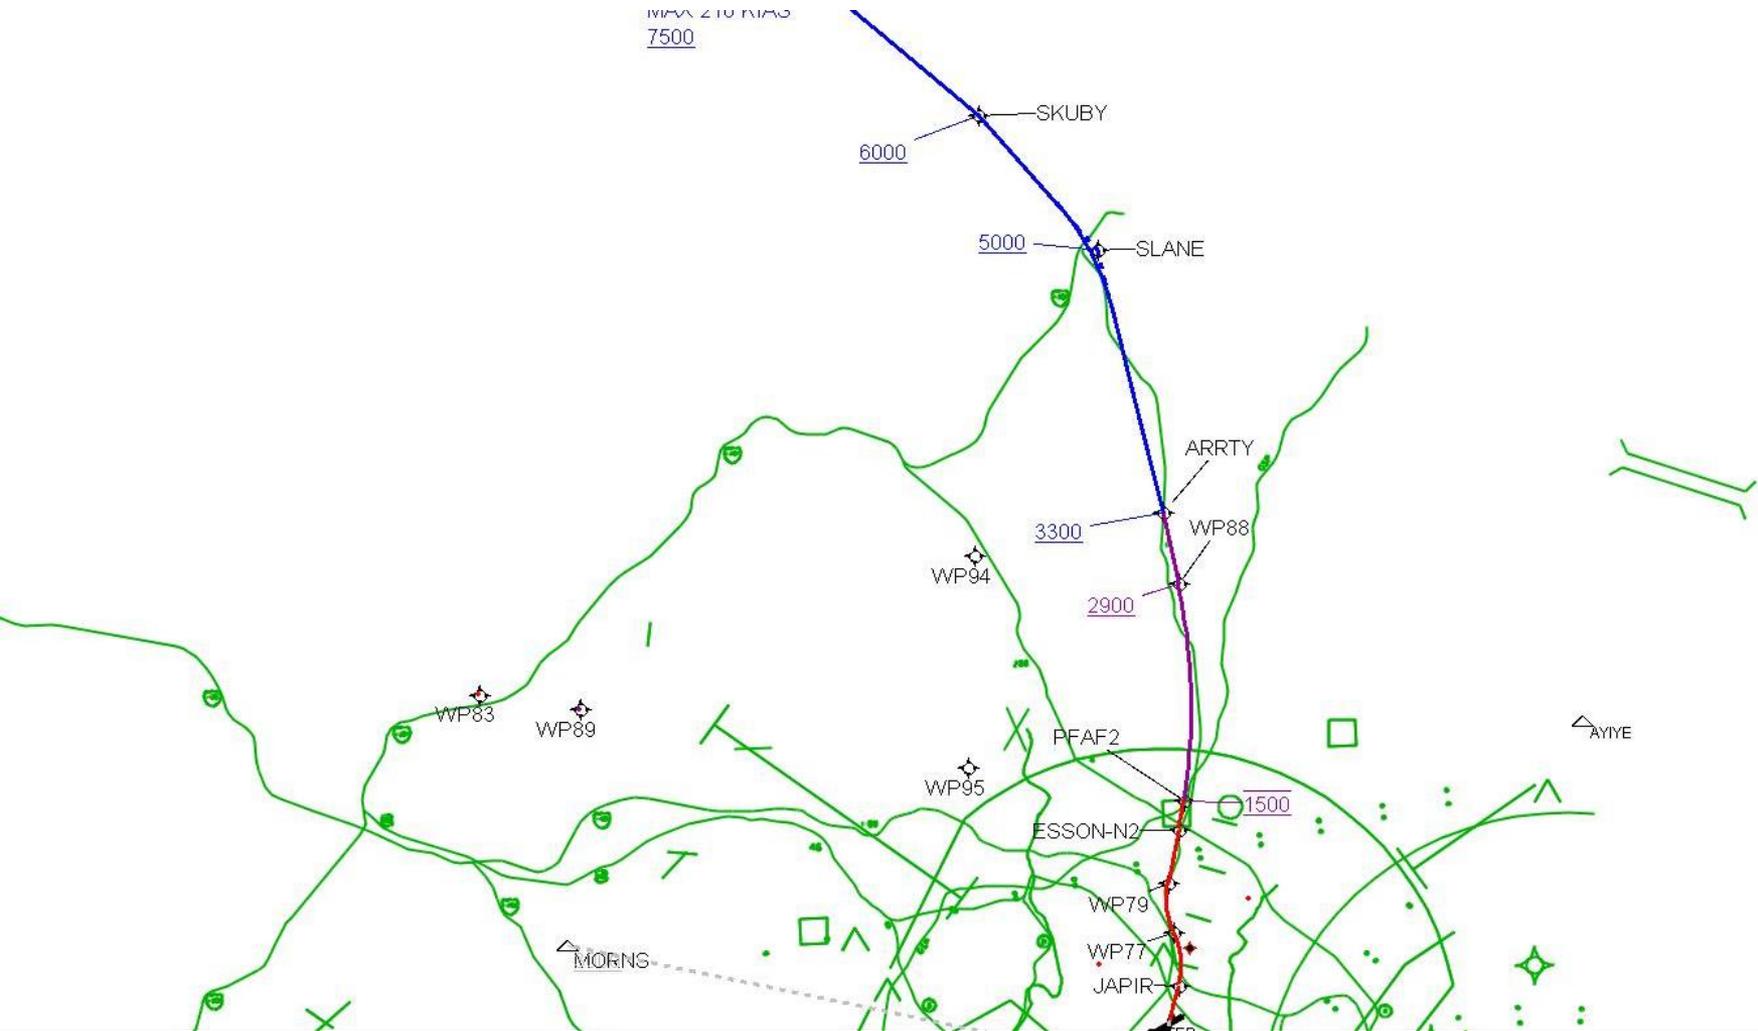

Exploring NextGen Options

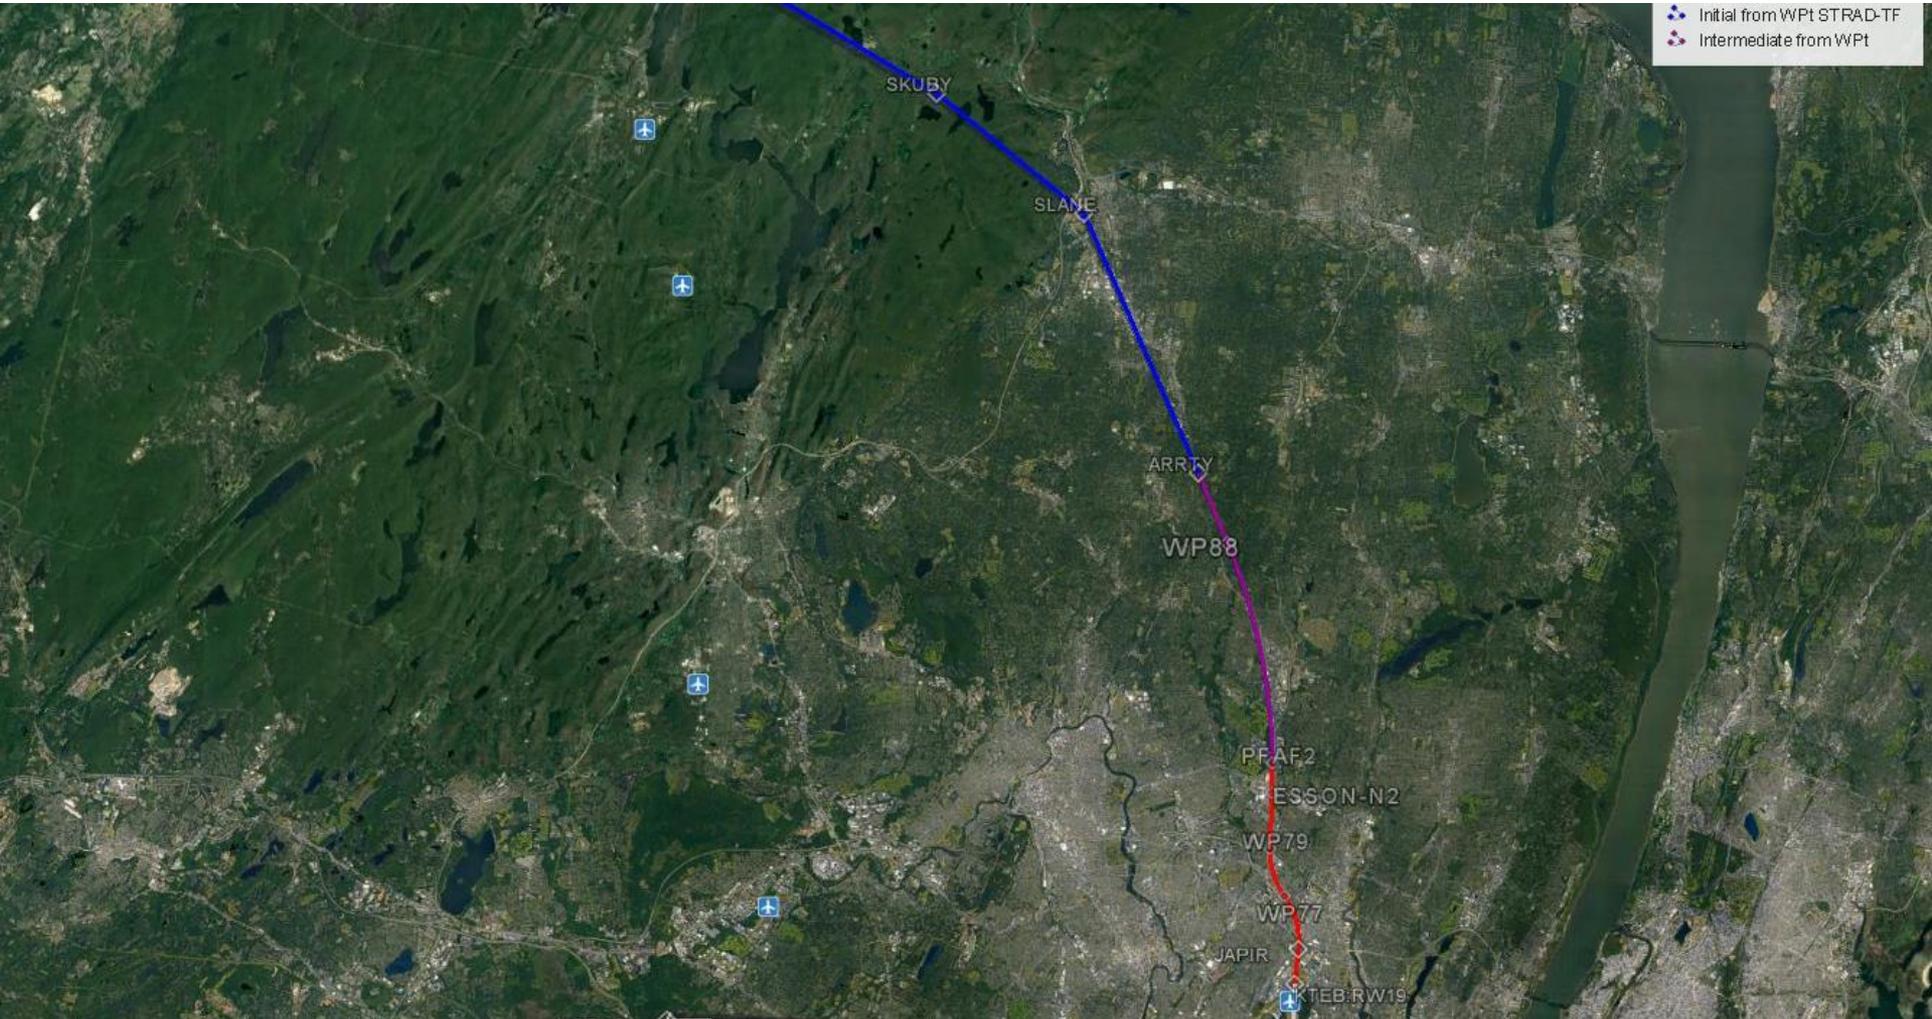

- **RNAV/(RNP) Runway 19**
 - May be feasible to mimic current Quiet Visual flight path
- **RNAV(GPS) Offset Runway 19**
 - Avoid overflying Hackensack Hospital
 - Waypoints will be coded
 - Current Operators more than likely to use over the Quiet Visual
 - Can be used in VFR and IFR conditions

**TETERBORO
AIRCRAFT
NOISE
ABATEMENT
ADVISORY
COMMITTEE**

January 3, 2018

Marie Kennington-Gardiner
Regional Administrator (acting)
Eastern Region FAA
1 Aviation Plaza
Jamaica, NY 11434

Dear Ms. Kennington-Gardiner,

The Teterboro Aircraft Noise Abatement Advisory Committee (TANAAC) respectfully requests that the Federal Aviation Administration (FAA) continue the process of developing and evaluating the implementation of an offset approach procedure to Runway 19 at Teterboro Airport as presented by FAA officials at the TANAAC quarterly meeting held on October 25, 2017. The Committee understands that this newly established procedure would serve to supplement the current ILS 19 approach to the airport, in order to reduce the number of aircraft flying over the Hackensack University Medical Center en route to Teterboro Airport. The Committee membership believes that an offset approach would also alleviate concerns of aircraft flying over nearby high rise residential buildings. TANAAC requests that FAA take the following steps to address the concerns of its membership and local residents:

- Commence the design and evaluation process for the FAA recommended RNAV/GPS X approach procedure for Runway 19.
- Maintain the RNAV/RNP approach option for future consideration and implementation provided the aircraft instrumentation and pilot training requirements for the approach become more readily available and feasible for general aviation aircraft operators.
- Provide TANAAC membership with quarterly updates on the progress of the RNAV/GPS X procedure development.

TANAAC is aware that the implementation of an offset approach procedure to Runway 19 at Teterboro Airport may lead to noise impacts in other area communities. The Committee expects any impacts generated by the new approach to be identified and assessed by the standard FAA environmental review.

TANAAC has been working in conjunction with Teterboro Airport management for several years to address the concerns of the local communities. Our members greatly appreciate the FAA's efforts partner with us to find a viable alternative to the ILS 19 approach. We look forward to continued productive collaboration with the FAA regarding this matter.

Sincerely,

Fredrick Dressel
Co-chair
TANAAC

Sincerely,

Renee D. Spann

January 8, 2018

Jennifer Solomon
Regional Administrator
Eastern Region FAA
1 Aviation Plaza
Jamaica, NY 11434

Dear Ms. Solomon,

The Teterboro Aircraft Noise Abatement Advisory Committee (TANAAC) respectfully requests that the Federal Aviation Administration (FAA) continue the process of developing and evaluating the implementation of an offset approach procedure to Runway 19 at Teterboro Airport as presented by FAA officials at the TANAAC quarterly meeting held on October 25, 2017. The Committee understands that this newly established procedure would serve to supplement the current ILS 19 approach to the airport, in order to reduce the number of aircraft flying over the Hackensack University Medical Center en route to Teterboro Airport. The Committee membership believes that an offset approach would also alleviate concerns of aircraft flying over nearby high rise residential buildings. TANAAC requests that FAA take the following steps to address the concerns of its membership and local residents:

- Commence the design and evaluation process for the FAA recommended RNAV/GPS X approach procedure for Runway 19.
- Maintain the RNAV/RNP approach option for future consideration and implementation provided the aircraft instrumentation and pilot training requirements for the approach become more readily available and feasible for general aviation aircraft operators.
- Provide TANAAC membership with quarterly updates on the progress of the RNAV/GPS X procedure development.

TANAAC is aware that the implementation of an offset approach procedure to Runway 19 at Teterboro Airport may lead to noise impacts in other area communities. The Committee expects any impacts generated by the new approach to be identified and assessed by the standard FAA environmental review.

TANAAC has been working in conjunction with Teterboro Airport management for several years to address the concerns of the local communities. Our members greatly appreciate the FAA's efforts partner with us to find a viable alternative to the ILS 19 approach. We look forward to continued productive collaboration with the FAA regarding this matter.

Air Traffic Organization (ATO) Environmental Policy, Practices and Processes

Presented to: Teterboro Airport Noise
Abatement Advisory Committee (TANAAC)

By: David S. Johnson

Kevin Thompson

Date: October 24, 2018

ATO Environmental Policy/Practices/Processes

Federal Aviation
Administration

Agenda

- **National Environmental Policy Act (NEPA) Overview**
- **FAA / ATO Environmental Process Overview**
- **Status of Environmental Review for**
 - **RNAV (GPS) RWY 24**
 - **RNAV (GPS) Y RWY 19**
 - **RNAV Transition to ILS RWY 19**
 - **RNAV (GPS) X RWY 19, Offset**

National Environmental Policy Act (NEPA)

- Declares a national policy which will encourage productive and enjoyable harmony between man and his environment and establishes the Council on Environmental Quality (CEQ)
- Requires all Federal agencies to prepare a detailed statement for major federal actions significantly affecting the quality of the human environment
- Requires consideration of the environment in decision making, consultation and coordination with federal, state and local agencies, and public disclosure of impacts
- Mandates a process; does not dictate a particular result

Council on Environmental Quality (CEQ) Implementing Regulations for NEPA

- In 1978 CEQ issued regulations for implementing the procedural provisions of NEPA [CFR Title 40 Parts 1500-1508]
- Defines NEPA terms such as: federal action, significantly, human environment and cumulative impacts
- Provides more specific content and a processes for an Environmental Impact Statement (EIS) and introduces and defines other levels of NEPA review / documents such as an Environmental Assessment (EA) and a Categorical Exclusion (CATEX)
- Requires federal agencies to adopt their own procedures to supplement the CEQ regulations

CEQ Implementing Regulations for NEPA – (Key Definitions)

- **Environmental Impact Statement (EIS)** – A detailed written statement as required by NEPA and shall be prepared for any major Federal action significantly affecting the quality of the human environment
- **Environmental Assessment (EA)** – A concise public document that briefly provides sufficient evidence and analysis for determining whether to prepare an EIS or a finding of no significant impact
- **Categorical Exclusion (CATEX)** – A category of actions which do not individually or cumulatively have a significant effect on the human environment and do not require either an EA or an EIS. CATEXes shall provide for extraordinary circumstances in which a normally excluded activity may have significant impacts

FAA Environmental Order

FAA Order 1050.1F

Environmental Impacts: Policies and Procedures

- Describes how the FAA is to implement NEPA specifically for FAA actions
- Describes the various environmental processes, and the kinds of impacts that need to be analyzed
- Defines impact categories that require analysis. Noise and air quality impacts are the primary issues associated with air traffic actions.

U.S. DEPARTMENT OF TRANSPORTATION
FEDERAL AVIATION ADMINISTRATION

**ORDER
1050.1F**

Effective Date:
7/16/15

SUBJ: Environmental Impacts: Policies and Procedures

This Order serves as the Federal Aviation Administration's (FAA) policy and procedures for compliance with the National Environmental Policy Act (NEPA) and implementing regulations issued by the Council on Environmental Quality (CEQ). The provisions of this Order and the CEQ Regulation apply to actions directly undertaken by the FAA and to actions undertaken by a non-Federal entity where the FAA has authority to condition a permit, license, or other approval. The requirements in this Order apply to, but are not limited to, the following actions: grants, loans, contracts, leases, construction and installation actions, procedural actions, research activities, rulemaking and regulatory actions, certifications, licensing, permits, plans submitted to the FAA by state and local agencies for approval, and legislation proposed by the FAA. The Order was last revised in 2006.

This Order updates FAA Order 1050.1E to: 1) provide a clear, concise, and up-to-date discussion of the FAA's requirements for implementing NEPA; and 2) clarify requirements in order to facilitate timely, effective, and efficient environmental reviews of FAA actions, including NextGen improvements.

Rich Swayze
Assistant Administrator
Policy, International Affairs & Environment

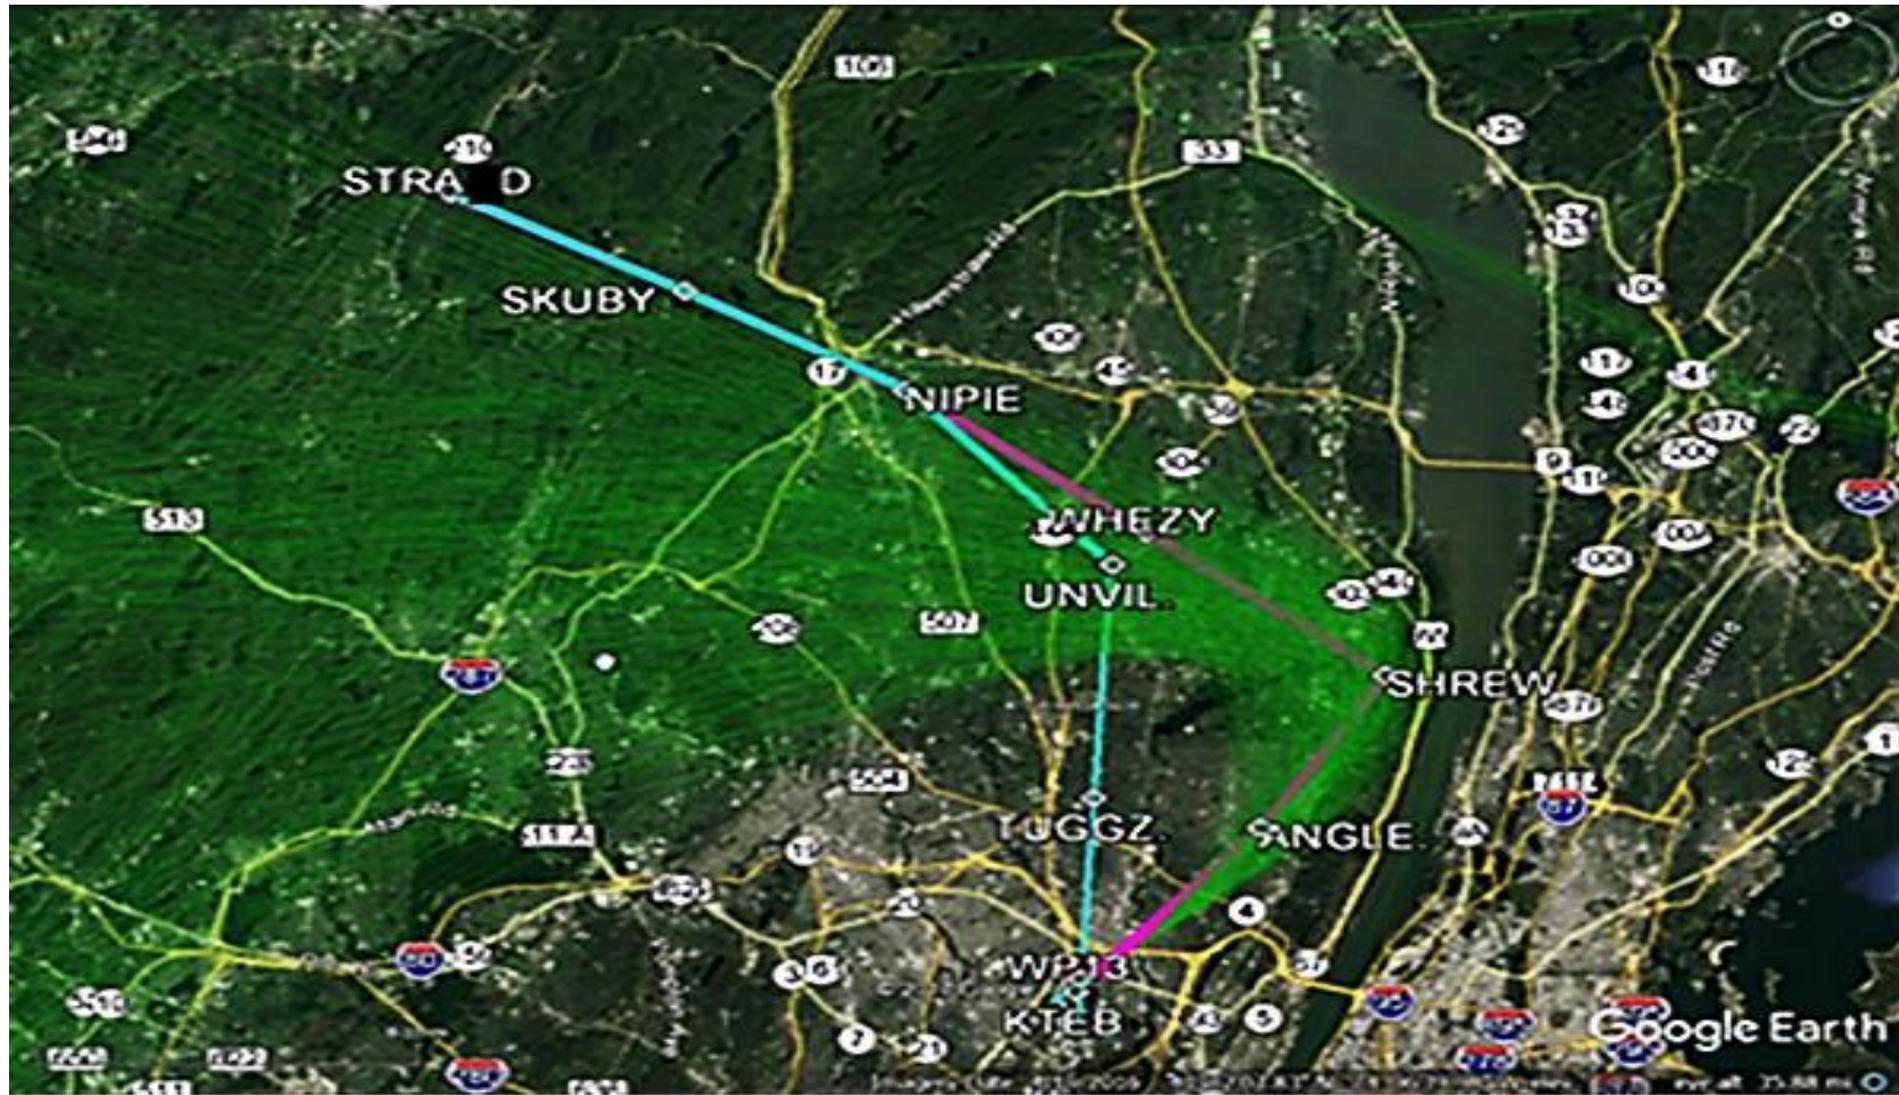

Distribution: Electronically Initiated By: AEE-400

Categorical Exclusion (CATEX)

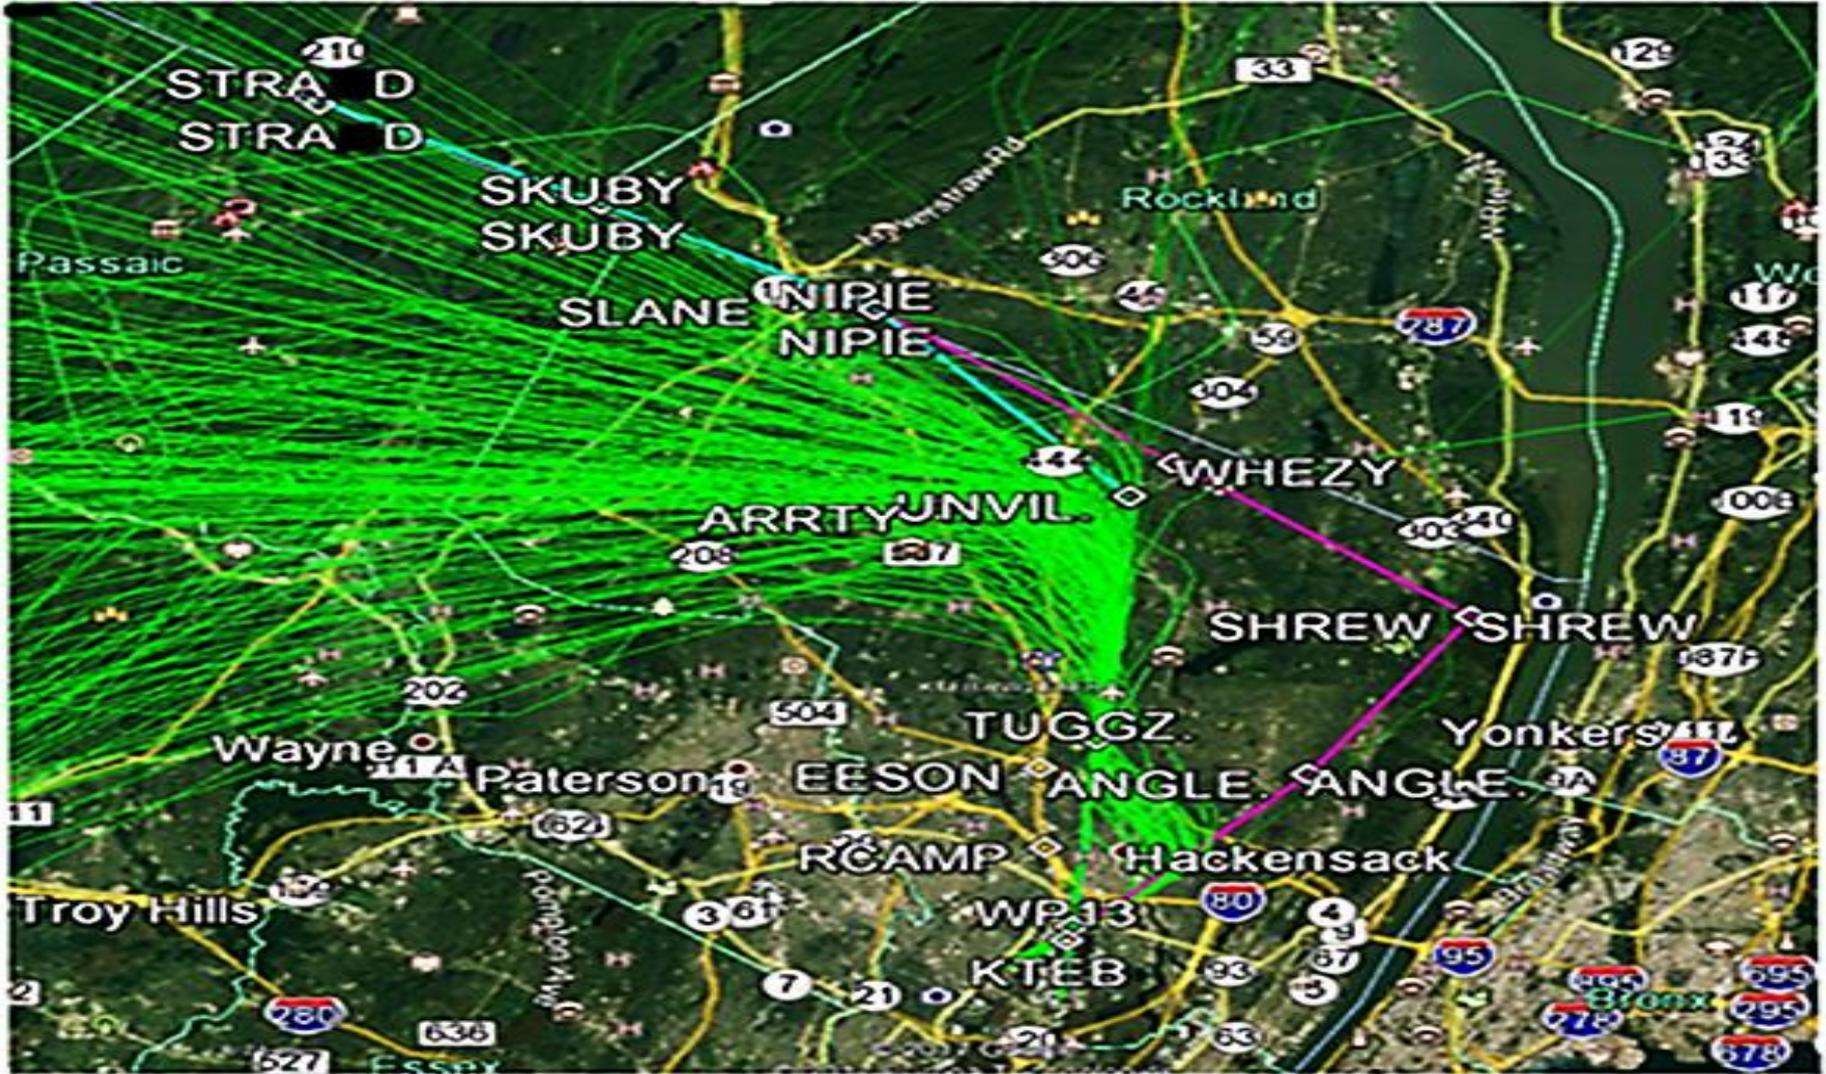

- **A category of actions that the agency has determined does not individually or cumulatively have a significant effect on the quality of the human environment**
 - Establishment of new or revised air traffic control procedures conducted at 3,000 feet or more above ground level (AGL); procedures conducted below 3,000 feet AGL that do not cause traffic to be routinely routed over noise sensitive areas; **modifications to currently approved procedures conducted below 3,000 feet AGL that do not significantly increase noise over noise sensitive areas**; and increases in minimum altitudes and landing minima.
- **Procedures that qualify for CATEX**
 - RNAV (GPS) RWY 24
 - RNAV (GPS) Y RWY 19
 - RNAV Transition to ILS RWY

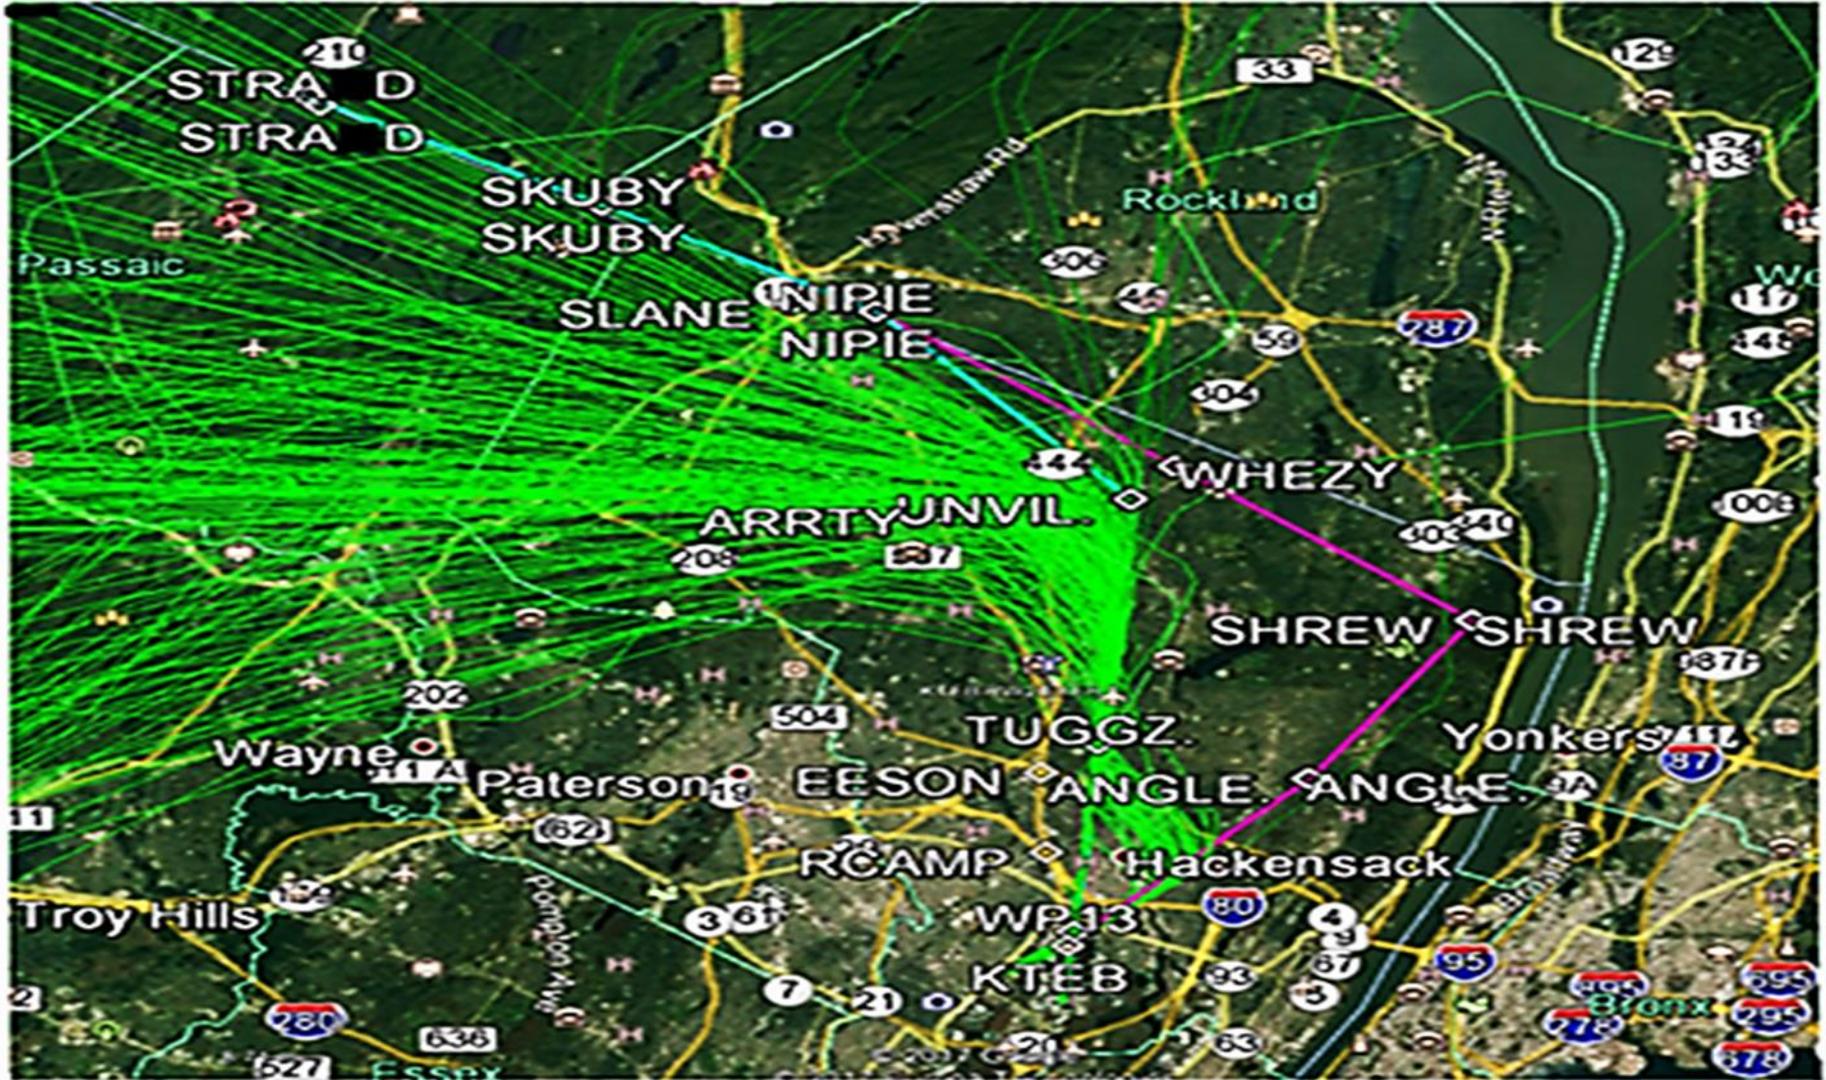

RNAV (GPS) RWY 24

RNAV (GPS) Y RWY 19

RNAV Transition to ILS RWY 19

Environmental Assessment (EA)

- **Prepared when the review of the action shows that it is not:**
 - Categorically excluded
 - Involves at least one extraordinary circumstance with the potential to significantly impact the human environment
 - Does not normally require an EIS
- **Purpose**
 - To determine the significance of the environmental impacts, identify and consider alternative means to achieve the agency's objectives.

Environmental Assessment (EA) (Cont.)

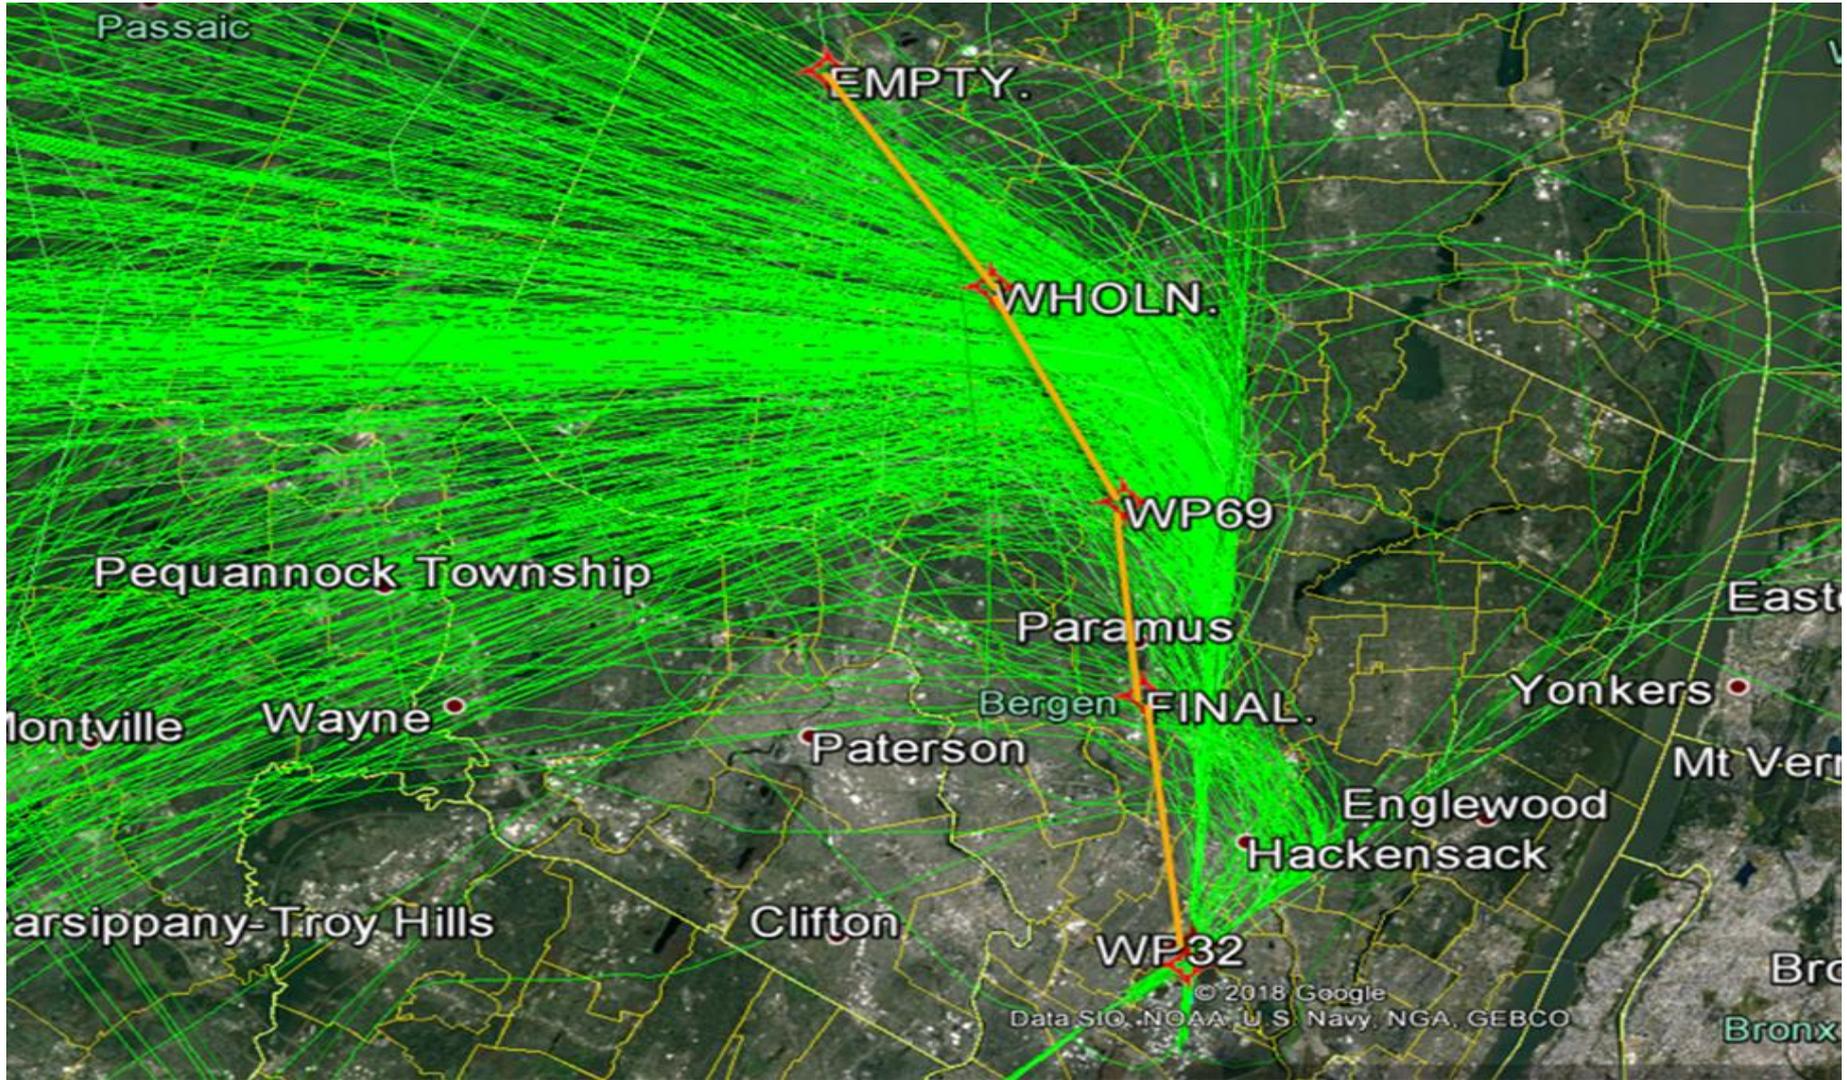

- **Should Include:**
 - The purpose and need for the proposal
 - Alternative courses of action (when necessary)
 - The effected environment
 - The environmental impacts of the proposed action and alternatives
 - A list of agencies and people consulted
- **Provides for Public disclosure and comment**
- **Used for informed decision-making**
- **Facilitates compliance with applicable environmental laws, regulations and Executive Orders**

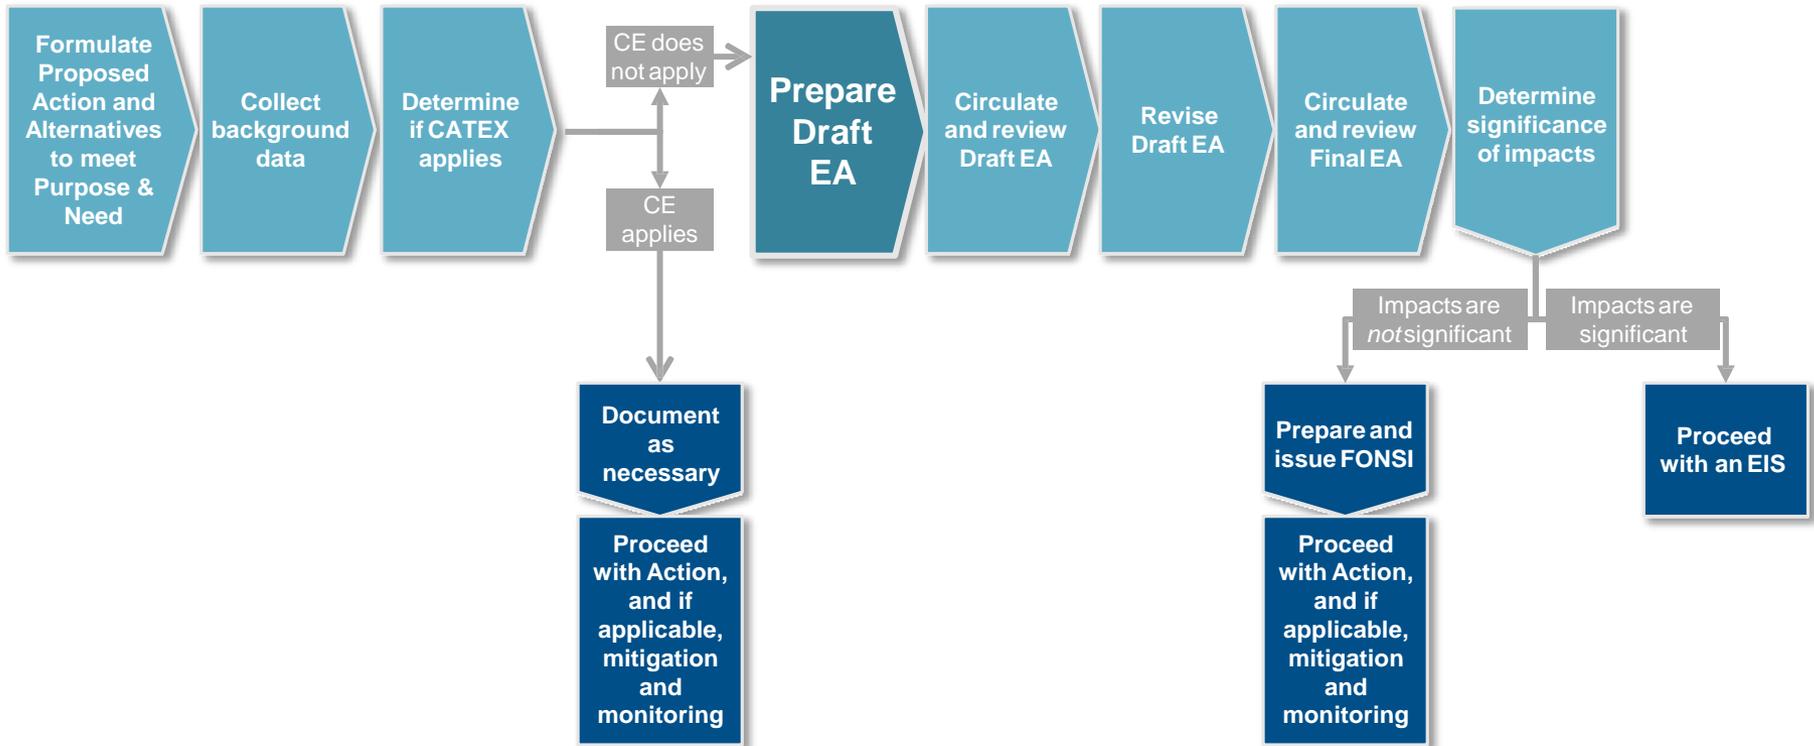

Examples of actions that require an EA

- **New air traffic control procedures (e.g., instrument approach procedures, departure procedures, en route procedures) and modifications to currently approved procedures that routinely route aircraft over noise sensitive areas at less than 3,000 feet above ground level (AGL).**
 - **Procedure that will require an EA**
 - RNAV (GPS) X RWY 19, Offset

RNAV (GPS) X RWY 19, Offset

Typical ATO Environmental Process

Community Involvement

The Federal Aviation Administration (FAA) is committed to open and effective public participation and regards community involvement as an important consideration in decisions that affect the public.

- **Why Community Involvement is Important**
 - Inform the community
 - Improve understanding of community concerns
 - Use community input to improve decision making
 - Enhance the transparency of the decision-making process

QUESTIONS?

September 25, 2019

Jennifer Solomon
Regional Administrator
Eastern Region FAA
1 Aviation Plaza
Jamaica, NY 11434

Dear Ms. Solomon,

Pursuant to the letter dated January 8, 2018 from Renee Spann, former Manager of Teterboro Airport and Co-Chair of the Teterboro Aircraft Noise Abatement Advisory Committee, the Port Authority of New York and New Jersey supports development of an offset approach to Runway 19.

The letter from Ms. Spann, enclosed, states the reasons and concerns for the request, which basically center around reducing aircraft noise over Hackensack University Medical Center and concerns related to aircraft overflying nearby high-rise residential buildings.

If you have any questions, please feel free to contact me directly. I look forward to working with you on this initiative.

Best regards,

Maria S. Sheridan, A.A.E.
Manager, Teterboro Airport

Trenton, NJ 08625-0420

Reference: **Proposed Teterboro Airport RNAV (GPS) Runway 19 Offset Procedure
Teterboro Airport, Teterboro, Bergen County, New Jersey
Section 106 Coordination**

Dear Ms. Marcopul:

The Federal Aviation Administration (FAA) is preparing federal environmental documentation to comply with the *National Environmental Policy Act of 1969* (NEPA) for a proposed arrival procedure at Teterboro Airport (TEB). Teterboro Airport is a general aviation reliever airport located approximately 12 miles west of New York City in Bergen County, New Jersey.

The Proposed Action (TEB RNAV (GPS) RWY 19 Offset) would shift a portion of the air traffic from other arrival procedures onto this new arrival that is slightly to the west of the existing arrival procedures into TEB.

FAA is providing the following background information to assist you in reviewing FAA's determinations of eligibility and findings of effect related to the proposed undertaking.

1. Background Information.

Teterboro Airport is a general aviation reliever airport located approximately 12 miles west of New York City in Bergen County, New Jersey. The Airport is owned and operated by the Port Authority of New York and New Jersey. There were 174,747 aircraft operations at the Airport in 2018.¹ The Airport has two runways, Runway 01/19 and Runway 06/24. Runway 01/19 is 7,000 feet long and oriented in a north-south direction. Runway 06/24 is 6,013 feet long and is oriented in a northeast/southwest direction. The Airport property covers 827 acres and occupies most of the borough of Teterboro while extending into the neighboring boroughs of Moonachie and Hasbrouck Heights.

The General Study Area (GSA) is delineated for purposes of identifying potential environmental impacts. The GSA, as depicted in **Figure 1-1**, encompasses an area of approximately 705 square miles in the states of New Jersey and New York. This includes all or parts of Bergen, Essex, Hudson, Morris, Passaic, and Sussex counties in New Jersey and New York, as well as Orange and Rockland counties in New York. The GSA was constructed to encompass the geographic area where an aircraft flight path could be affected as a result of the

¹ FAA OPSNET Airport Operations Standard Report, Teterboro Airport, Calendar Year 2018, <<https://aspm.faa.gov/opsnet/sys/opsnet-server-x.asp>>, queried July 16, 2019.

Proposed Action. Teterboro Airport is located in the southeastern corner of the GSA.

Figure 1-1 also depicts the Area of Potential Effect (APE). The APE is considered the area where the Proposed Action "...may directly or indirectly cause alterations in the character or use of historic properties."² The APE is defined by the New York/New Jersey border on the north side, the Bergen County/Passaic County border on the west side, Lake Tappan and the Hackensack River on the east side, and State Route 120/Hoboken Road/Paterson Avenue on the south side.

The Proposed Action (TEB RNAV (GPS) RWY 19 Offset) is the implementation of an RNAV procedure that routes traffic into Runway 19 on an alternate route than current arrivals. RNAV operations remove the requirement for a direct link between aircraft navigation and a NAVAID, thereby allowing aircraft better access and permitting flexibility of point-to-point operations.

Figure 1-2 depicts the Proposed Action along with existing arrival procedures into Runway 19. Aircraft arriving at TEB would continue following existing routes, but during periods of light aircraft operational activity, aircraft capable of flying the procedure and already directed to a Runway 19 arrival will be directed to follow the proposed procedure beginning at a waypoint near the New York/New Jersey border. Flight paths upstream from this new routing will be unaffected.

2. Native American Consultation.

FAA reviewed the database of federally recognized tribal properties and consulted previously prepared environmental documents from the New York metropolitan area. It was determined that there are no federally recognized tribal properties within the APE and therefore, no native American consultation was deemed necessary for this Proposed Action.

3. National Register Eligibility Determinations.

The National Historic Preservation Act (NHPA) (54 U.S.C. Sections 300101 et seq) requires federal agencies to consider the effects of their undertakings (or actions) on properties listed or eligible for listing on the National Register of Historic Places (NRHP). Implementing regulations associated with this statute can be found in 36 CFR Part 800, *Protection of Historic Properties*.

This EA defines historic properties from its definition in 36 CFR Part 800 as:

"...any prehistoric or historic district, site, building, structure, or object included in, or eligible for inclusion in, the National Register of Historic Places maintained by the Secretary of the Interior. This term includes artifacts, records, and remains that are related to and located within such properties. The term includes properties of traditional religious and cultural importance to an Indian tribe or Native Hawaiian organization and that meet the National Register criteria."³

It is possible that changes in aircraft flight routes associated with the Proposed Action could introduce or increase aircraft routing over historic properties and result in potential adverse noise impacts but only if the noise results in a significant noise impact under NEPA. FAA Order 1050.1F provides the significance threshold for noise:

² 1050.1F Desk Reference, 8-12.

https://www.faa.gov/about/office_org/headquarters_offices/apl/enviro_policy_guidance/policy/faq_nepa_order/desk_ref/media/desk-ref.pdf

³36 CFR Subpart C 800.16 (1)(1), <https://www.achp.gov/sites/default/files/regulations/2017-02/regs-rev04.pdf>

“The action would increase noise by DNL 1.5 dB or more for a noise sensitive area that is exposed to noise at or above the DNL 65 dB noise exposure level, or that will be exposed at or above the DNL 65 dB level due to a DNL 1.5 dB or greater increase, when compared to the no action alternative for the same timeframe.”⁴

Since this is an air traffic airspace and procedure action, FAA Order 1050.1F states that change-of-exposure tables and maps must be prepared for three noise thresholds to adequately assess the environmental consequences of the air traffic action. These include an increase or decrease of 1.5 dB for the DNL 65 dB level, an increase or decrease of 3.0 dB for the DNL 60-65 dB level, and an increase or decrease of 5.0 dB for the DNL 45-60 dB level. Since these thresholds were already being assessed as part of the environmental document, the historic properties will be assessed by the same standards. The NRHP and the New Jersey Department of Environmental Protection’s historic property data were consulted in order to gather a comprehensive directory of all potential historic and cultural resources within the APE. A total of 796 listed properties were identified in the APE. **Figure 1-3** shows the location of historic and cultural resources identified in the APE. A list of the historic and cultural resources identified in the APE and the county in which they are located is provided in **Appendix A**. The noise impact to these properties was then assessed using the Aviation Environmental Design Tool, the FAA-required model for noise analysis. The change in noise exposure was calculated at each of the 796 historic properties.

Within the 796 historic properties identified, no properties experienced an increase of 1.5 dB with a noise exposure level of DNL 65 dB and therefore no significant impact was found. By applying the additional airspace thresholds, two properties were identified as crossing the noise threshold of DNL 45 to <60 dB with an increase of more than five decibels. These properties were the Ackerman-Demarest House and the Albert J. Zakriskie House. **Figure 1-4** shows the location of these reportable impact properties with respect to the proposed action while **Figure 1-5** shows a close-in map of these same reportable impact properties.

Based on the information contained within the analysis above, the FAA has determined there are no adverse effects on the historic properties within the APE for the proposed undertaking.

FAA seeks the New Jersey SHPO's concurrence with this determination.

4. Assessment of Adverse Effects on Historic Properties.

Since the FAA has determined there are no adverse effect on a historic property within the APE, the FAA finds the proposed undertaking will not affect any properties listed or eligible for listing on the National Register of Historic Places under 36 CFR Part 800.4(d)(1).

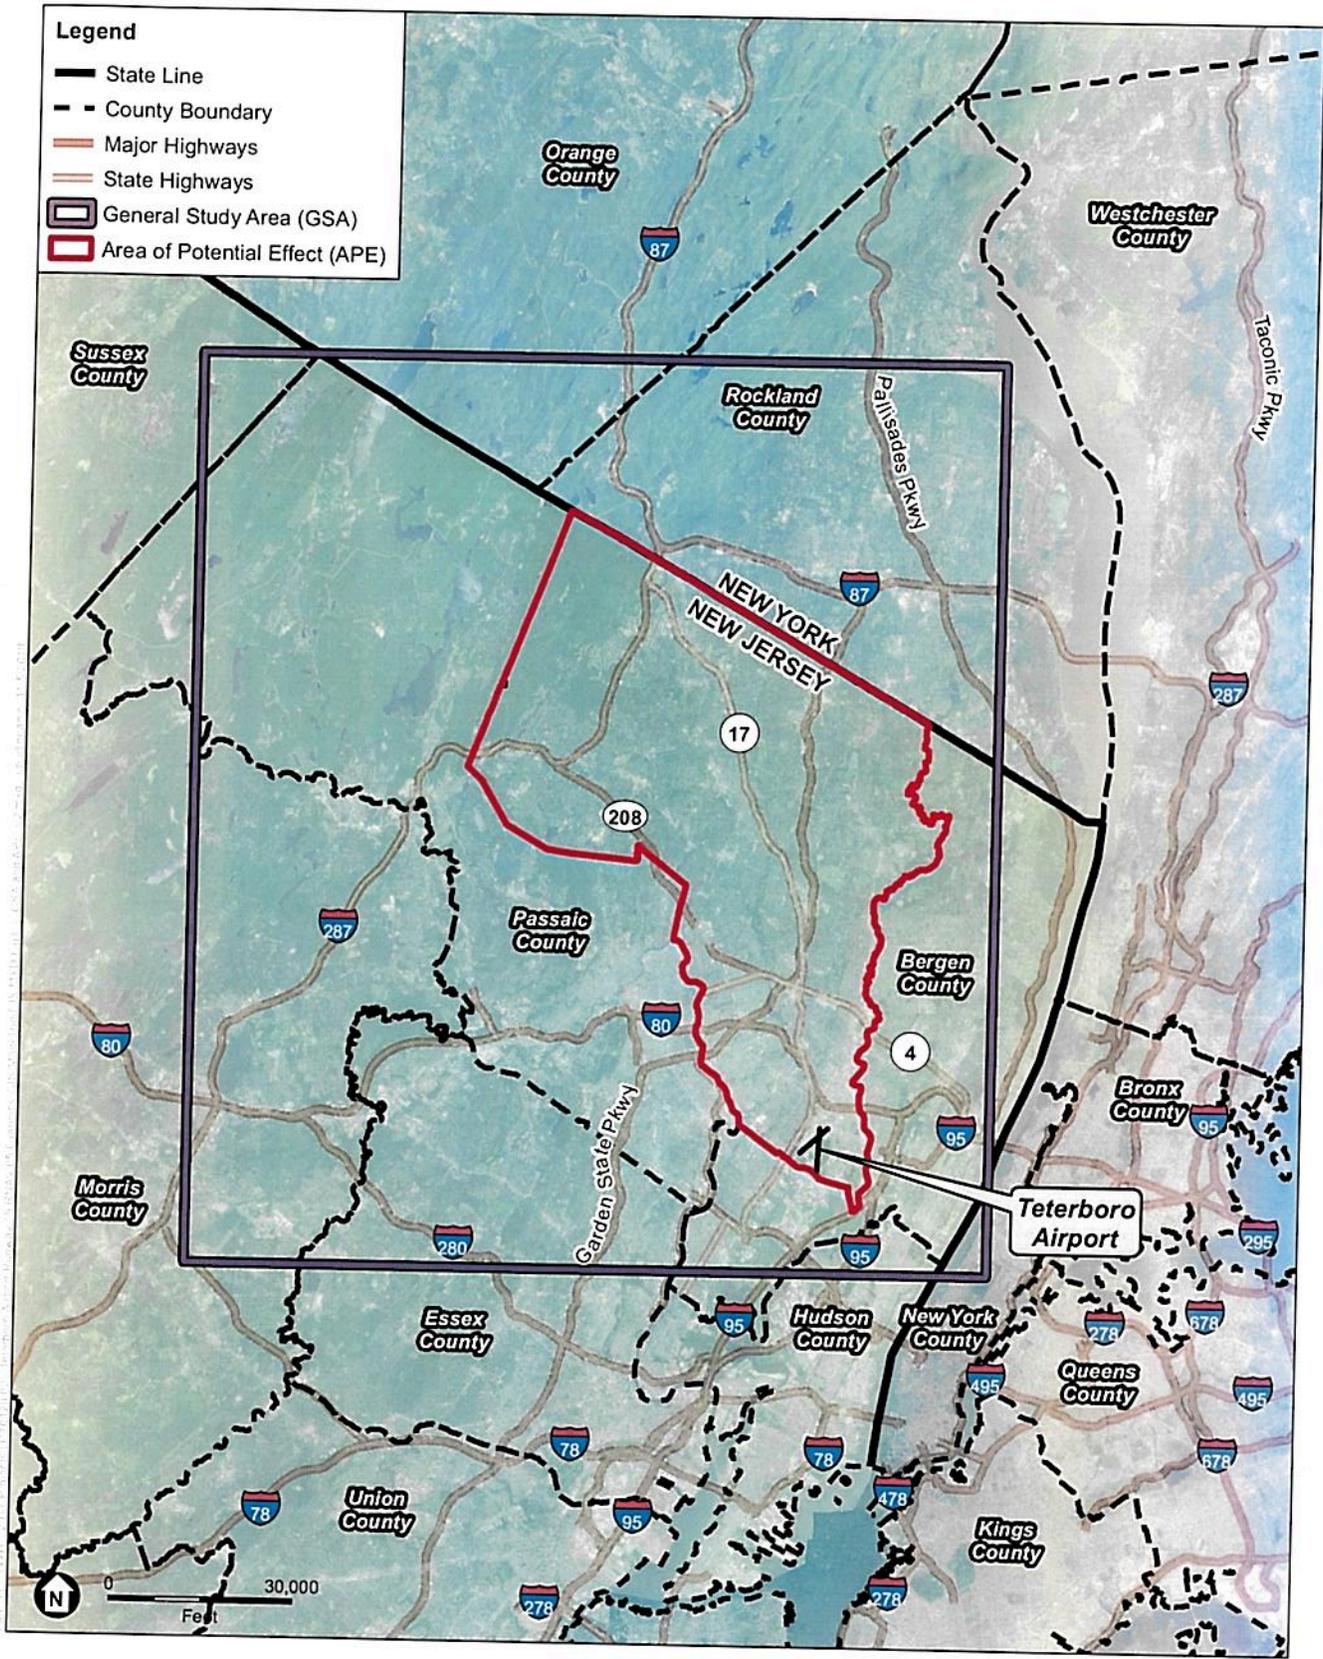

FAA seeks the New Jersey SHPO's concurrence with this finding.

⁴ FAA Order 1050.1F, page 4-8. https://www.faa.gov/documentLibrary/media/Order/FAA_Order_1050_1F.pdf

If you have any questions about this matter, please call me at 404-305-5587.

APPENDIX D

Noise Modeling Technical Report

Appendix D documents the input parameters used in the noise modeling of the No Action Alternative as well as the Proposed Action Alternative. **Section D.1** reviews the methodology used to conduct the noise analysis. **Section D.2** documents the input data development and sources for the No Action Alternative and **Section D.3** documents the input data for the Proposed Action Alternative.

For this EA, FAA modeled the Proposed Action using the actual radar-derived traffic from the entirety of calendar year 2018 as the baseline. Major traffic flows to each of the runways were identified and a representative model was built by incorporating each traffic flow and the aircraft operations on those flows. With the exception of traffic moved to the proposed RNAV (GPS) Offset RWY 19 procedure, the Proposed Alternative maintains the same traffic and runway usage as the baseline. This method provides a means to evaluate the Proposed Alternative as the sole cause of any modeled impacts.

D.1 Methodology

The methodology used in the noise analysis of the proposed RNAV (GPS) Offset RWY 19 approach procedure for the Airport follows established guidelines from the FAA in both the construction of a representative data model and the evaluation of noise impacts. Model construction and execution relied heavily on guidance provided in the FAA document titled *“Guidance on Using the Aviation Environmental Design Tool (AEDT) to Conduct Environmental Modeling for FAA Actions Subject to NEPA”* updated 10/27/2017.¹ Settings within the AEDT model such as weather, terrain, and atmospheric absorption are chosen based on the guidance provided in this document. In particular, airport weather was used, as was National Elevation Dataset (NED) GridFloat terrain, and the SAE-ARP-5534 setting for atmospheric absorption. AEDT is the FAA’s approved model for assessing noise and emissions at civilian airports. AEDT has been used for environmental review of aviation noise and emissions impacts since 2012 and is used for 14 CFR Part 150 studies, NEPA Environmental Assessments and Environmental Impact Statements. AEDT is an average-value model that is designed to estimate the long-term average changes in operating conditions.

As per the guidance, model input data suitable for AEDT modeling was collected and aggregated into an operationally representative form known as an Annual Average Day

¹ https://aedt.faa.gov/Documents/guidance_aedt_nepa.pdf

(AAD) indicating the expected mix of aircraft operations over the course of a representative “average” day. The model inputs, which consisted of flight tracks and specific aircraft operations utilizing these tracks were imported into the AEDT model and evaluated for noise exposure by using FAA-recommended settings for the use of AEDT as described above. Key attributes of an aircraft operation relevant to noise modeling are the aircraft type, the operation type (arrival or departure), the runway, the ground track used, the time of day (day or night), and the stage length. Stage length is an indication of aircraft weight and is typically inferred by either knowing the aircraft takeoff weight or by knowing the aircraft type and the trip distance. For the purposes of noise modeling multiple aircraft operations possessing identical values for these key attributes can be aggregated.

The noise analysis was conducted using AEDT version 2d Service Pack 2 to calculate No Action and Proposed Action noise exposure levels at population centroids within the 705 square mile General Study Area (GSA). In addition, noise exposure for both scenarios was calculated at the Section 4(f) and Historic locations identified within the GSA.

D.2 No Action Alternative Noise Model Input

The Proposed Action has been developed with the input of air traffic controllers to ensure that it can be implemented and will be readily adopted by pilots.

D.2.1 No Action Alternative Aircraft Operations

Radar data for calendar year 2018 was provided by New York TRACON to develop operations data for the noise model. This operations data was used to estimate all of the AAD data summarized below. The radar data identified that there were a total of 171,217 operations at the Airport in 2018. To bring this annual operation count into alignment with the official annual operation count of 174,747 from FAA’s OPSNet, all operations were uniformly scaled by a factor of 1.021. The total number of annual operations at the Airport was divided by the number of days in the year to determine the AAD, which was then used as input to AEDT. Teterboro Airport is a popular airport for helicopter operators, with approximately 4.6% of all operations at the Airport flown by helicopters. The vast majority of helicopter operations at the Airport use one of four established helicopter routes. Accordingly, helicopter operations were included in this study. For fixed wing aircraft, only Instrument Flight Rules (IFR) itinerant operations were included as the number of circuit/local operations contained in the radar data was considered negligible, at about 100 per year. **Table D.1** shows actual 2018 operations at the Airport by runway and aircraft category, based on PDARS radar data. Some itinerant helicopter operations are included here because a small number of helicopters use the runways for landing (rather than helipads). **Table D.2** shows the 2018 operations count of all traffic using standardized helicopter routes at the Airport, also based on PDARS radar data.

TABLE D.1
BASELINE ANNUAL OPERATIONS AND RUNWAY UTILIZATION (IFR ITINERANT TRAFFIC)

Operation	Runway	Jet	Piston	Turboprop	Helo
Arrivals	Runway 01	6,210	340	739	5
	Runway 06	22,788	567	1974	53
	Runway 19	35,132	864	2901	70
	Runway 24	8,458	611	1,524	24
Departures	Runway 01	26,797	685	2,184	30
	Runway 06	2,298	256	591	17
	Runway 19	966	421	776	3
	Runway 24	41,576	996	3,474	66

North	167	188
South	3,180	3,086
West	281	338
Totals	3,960	3,863
Source: RoVolus 2019		

D.2.2 Baseline Runway Use

To develop the necessary input data for AEDT, aircraft operations had to be assigned to specific runway ends by determining the average annual runway use.

The Airport operates primarily based on prevailing surface wind direction. When wind is from the north and east, traffic at the Airport primarily uses Runways 01 and 06 for arrivals and departures. Conversely, when wind is from the south and west, Runways 19 and 24 are the primary active runways. There is a noise abatement program in place at the Airport, and between 10:00 PM and 7:00 AM, Runway 01/19 is the preferred noise abatement runway.

Table D.3 below shows baseline runway utilization as provided by the Port Authority. As the data shows, nearly half of all arrivals at the Airport use Runway 19 while Runway 24 is used for the majority of departures. This configuration reflects prevailing wind patterns at the Airport as well as operational and airspace considerations in the New York City region. (Note that due to flight track refinement and cleanup activities, the number of arrivals and departures are not identical.)

**TABLE D.3
2018 TETERBORO AIRPORT RUNWAY UTILIZATION**

Runway	Day				Night				Total			
	Arrivals		Departures		Arrivals		Departures		Arrivals		Departures	
Runway 01	6,078	8.6%	23,846	36.0%	1,216	10.8%	5,850	39.2%	7,294	8.9%	29,696	36.6%
Runway 06	21,446	30.2%	2,265	3.4%	3,936	35.1%	897	6.0%	25,382	30.9%	3,162	3.9%
Runway 19	34,704	48.8%	1,646	2.5%	4,263	38.0%	520	3.5%	38,967	47.4%	2,166	2.7%
Runway 24	8,820	12.4%	38,469	58.1%	1,797	16.0%	7,643	51.3%	10,617	12.9%	46,112	56.8%
Total	71,047		66,226		11,213		14,910		82,260		81,136

D.2.3 Baseline/No Action Flight Tracks, Profiles, and Flight Track Use

For the purposes of noise modeling, representative flight tracks are modeled as backbone tracks with expanded sub-tracks accounting for the dispersion of operations across a corridor. These backbone and sub-tracks for the noise model were developed by isolating distinct flows by runway and operation type (arrivals or departures). Some flows were further isolated by day operations and night operations where the determination of day and night operations conforms to the noise model Day-Night-Level time periods. All the flight operations from each flow are distributed onto the representative backbone and its sub-tracks by using the default AEDT binomial weight distribution scheme. Since the traffic at the Airport is almost entirely comprised of business jets, helicopters and general aviation aircraft, further delineation of flows by aircraft category was determined to be unnecessary.

AEDT includes a series of “standard” arrival and departure profiles for use in the model with variability in the altitude over the initial portion of departure trajectories determined by trip length or stage length. Depending on the aircraft type, AEDT’s “standard” departure profiles are provided for different stage lengths ranging from one to nine – with higher numbers indicating heavier takeoff weights. The chosen “standard” profile effectively serves as a surrogate for aircraft weight and models heavier aircraft of a given aircraft type at a lower altitude on departures. As mentioned in Section D.1 the stage length can be determined by the trip distance. For both the No Action and Proposed Action scenarios

the stage length for each modeled operation was determined by computing the trip distance between the origin and destination airports and translating the trip distance into a stage length and choosing the appropriate standard profile for that stage length. In addition, flights were modeled as day or night operations as per the distribution shown below in **Table D.4** below.

**TABLE D.4
AVERAGE ANNUAL DAY OPERATIONS MODELED IN AEDT**

D.3 FAA Proposed Action Noise Model Input

AEDT input data represents forecast operations after the implementation of the RNAV (GPS) Offset 19 approach procedure. In terms of existing conditions, weather conditions, forecast number and mix of operations, and projected runway utilization are not anticipated to materially change if adoption of the FAA Proposed Action were to occur. As per determination by Teterboro airport, with FAA oversight, it was determined that 34.15% of all the arrivals to Runway 19 will use the RNAV (GPS) Offset 19 approach as opposed to using existing procedures in the No Action Alternative. Arrivals switching to the new procedure will primarily originate from the northwest, west, and southwest. Existing arrivals to Runway 19 from the north and northeast will remain on their original trajectories. This movement of 34.15% of arrivals on Runway 19 to the new procedure is the only difference between the No Action and Proposed Action.

D.3.1 Proposed Action Alternative Aircraft Operations

As per guidance from FAA, Teterboro Tower, and New York TRACON, operations and the aircraft fleet mix for the Airport in the Proposed Action Alternative were modeled as unchanged for the No Action Alternative. The only change caused by the Proposed Action Alternative is the lateral movement of overflights of aircraft arriving Runway 19 away from the Hackensack Medical Center and closer to the Highway 17 corridor, without any change to operational levels or the fleet mix.

D.3.2 Proposed Action Alternative Runway Use

As per guidance from FAA, Teterboro Tower, and New York TRACON, runway use in the Proposed Action Alternative was modeled as unchanged for the Proposed Action Alternative. The only difference between the No Action Alternative and the Proposed Action Alternative is a single procedure change for arrivals to Runway 19. However, the number and type of arrivals to Runway 19 remain the same in both cases.

D.3.3 Proposed Action Flight Tracks, Profiles, and Use

The model for the Proposed Action utilizes the same process as the No Action Alternative for constructing backbones, sub-tracks, and operation loading. With the exception of the Runway 19 arrival operations, the Proposed Action Alternative reuses the model data that was built to model the No Action Alternative. In the Proposed Action Alternative, the only change is the addition of new backbones for the Runway 19 RNAV (GPS) Offset procedure. These additional backbones were added for arrivals to Runway 19 from the southwest, west, and northwest. Each new backbone begins on the original baseline backbone until it intercepts the Offset Procedure and subsequently follows the new procedure to the runway threshold. In the model for the Proposed Action Alternative, the original (baseline) backbones remain the same albeit with reduced operations on the Runway 19 arrival operations that were moved to the new procedure backbones. Additionally, the distribution of day and night operations remains the same as in the No Action model.

The RNAV (GPS) Offset 19 procedure specifies minimum altitude restrictions at coded waypoints. These altitude restrictions were implemented on the representative backbone as AEDT “at-or-above” control codes which instruct AEDT to model standard profile arrivals as long as the control code restrictions are met. All other backbones in the Proposed Action model were modeled using standard profiles.

APPENDIX E

List of Notified Elected Officials

Name	Position	Organization/Municipality
Affuso, Gina	Borough Clerk / Alternate Contact	Borough of Wood-Ridge
Albiez, Cheryl Ann	Senior Public Information Officer	The Port Authority of NY & NJ
Antoniotti, John	Alternate Contact	Borough of Carlstadt
Auth, Robert	Member of State Assembly	New Jersey's 39th Legislative District
Belastock, Dave	President	Teterboro Users Group
Bernstein, Ari	Mayor	Allendale, NJ
Bock, Tom	General Manager Operational and Regulatory Compliance	The Port Authority of NY & NJ
Bolan, Richard	Mayor-Elect	Borough of Maywood
Booker, Cory A.	United States Senator	United States Senate
Brabenec, Karl A.	Member of State Assembly	New York's 98th Legislative District
Brugger, Gary	Committee Member / Alternate	Township of South Hackensack
Cagas, Frank	Committee Member / Designee	Township of South Hackensack
Calabrese, Clinton	Member of State Assembly	New Jersey's 36th Legislative District
Calmi, Alana	Staff Public Information Officer	The Port Authority of NY & NJ

Name	Position	Organization/Municipality
Canestrino, Kathleen	Deputy Mayor / Alternate Contact	City of Hackensack
Cardinale, Gerald	State Senator	New Jersey's 39th Legislative District
Carlucci, David	State Senator	New York's 38th Legislative District
Chandoha, Steven	President, General Aviation Services	Meridian - Teterboro
Corrado, Kristin	State Senator	New Jersey's 40th Legislative District
Cozzarelli, Paula	Borough Administrator / Second Alternate	Borough of Little Ferry
Cuomo, Andrew M.	Governor	State of New York
Curreri, Brian	Alternate Contact	Borough of Carlstadt
Davies, Brittany	Regional Representative	NBAA
DeLorenzo III, John	Mayor	Borough of Hasbrouck Heights
DePhillips, Christopher P.	Member of State Assembly	New Jersey's 40th Legislative District
DeSalvo Jr., Joseph	Mayor	Borough of Rutherford
Dib, Albert	Director of Redevelopment	City of Hackensack
Dillon, Deirdre	Mayor	Ramsey, NJ
Dressel, Frederick J.	Alternate Contact	Borough of Moonachie
Dunn, Dan	Executive Director - Aviation	Mente Group
Ehrenburg, Ted M.	City Manager	City of Hackensack
Encarnacion, Yris	Mayor	Township of South Hackensack
Esposito, John	FBO Operations Manager	Jet Aviation - Teterboro
Fazio, Joseph	General Manager - Flight Support	Atlantic Aviation - Teterboro
Febre, Adrian J.	Mayor	Borough of Maywood

Name	Position	Organization/Municipality
Forester, Kenneth	Chief Executive Officer	Meridian - Teterboro
Fosdick, George D.	Mayor	Village of Ridgefield Park
Gadaleta, Jacqueline	Council President	Borough of Woodcliff Lake
Gaillard, Pierre S.	Alternate Contact	City of Hackensack
Garofalow, Matthew T.	Councilman	Borough of Maywood
Gertsen C.M., Alex	Director, Airports & Ground Infrastructure	NBAA
Gillibrand, Kirsten E.	United States Senator	United States Senate
Giordano, Thomas A.	Mayor	Waldwick, NJ
Goffstein, Ken	Designee	Township of Teaneck
Gonnelli, Michael	Mayor	Township of Secaucus
Gottheimer, Josh	U.S. Representative	United State House of Representatives, New Jersey's Fifth District
Griffo, Paul J.	Co-Chair / Alternate Contact	Borough of Rutherford
Hache Sr., Ramon M.	Mayor	Ridgewood, NJ
Hameedudin, Mohammed	Mayor	Township of Teaneck
Huisman, Bill	Executive Director	Aviation Development Council
Jackson, Robert	State Senator	New York's 31st Legislative District
Jaffee, Ellen C.	Member of State Assembly	New York's 97th Legislative District
Jimenez, Angelica M.	Member of State Assembly	New Jersey State Assembly
Johnson, Gordon M.	Member of State Assembly	New Jersey's 37th Legislative District
Jones, Steven	Senior Advisor, AEA-1SA	Federal Aviation Administration
Kazimir, Michael	Mayor	Township of Rochelle Park
Kelemen, Christopher M.	Mayor	Borough of Bogota
Kingma, David	Second Alternate	Township of Rochelle Park

Name	Position	Organization/Municipality
Kortright, Peter	Principal Planner	Bergen County
Kurpis, Albert J.	Mayor	Saddle River, NJ
LaBarbiera, Richard	Mayor	Paramus, NJ
LaBrosse Jr., John P.	Mayor	City of Hackensack
Lado, Tina	Director Government and Community Affairs	The Port Authority of NY & NJ
Lagana, Joseph A.	State Senator	New Jersey's 38th Legislative District
Lahullier, Craig	Mayor	Borough of Carlstadt
Langevin, John	Vice President FBO Operations, North America	Jet Aviation - Teterboro
Loitsch, Brian	Assistant Line Service Manager Line	Jet Aviation - Teterboro
Lowey, Nita M.	United States Representative	United State House of Representatives, New York's Seventeenth District
Luna, Scott A.	Mayor	Lodi, NJ
Luyster, Roy	Alternate	Township of Rochelle Park
Maloney, Sean Patrick	United States Representative	United State House of Representatives, New York's 18th District
Marsh, Scott	Manager, Operations and Security	Teterboro Airport
Marsico, Ronald	Director Media Relations	The Port Authority of NY & NJ
Martinez, Manuel	Councilman	Borough of Moonachie
McKeever, William	Councilman	Township of Secaucus
Mejia, Pedro	Member of State Assembly	New Jersey's 32nd Legislative District
Menendez, Robert	United States Senator	United States Senate
Metzger, Jen	State Senator	New York's 42nd Legislative District

Name	Position	Organization/Municipality
Minichetti, Joanne L.	Mayor	Upper Saddle River, NJ
Muller, George	Councilman / Alternate Contact	Borough of Little Ferry
Murphy, Phil	Governor	State of New Jersey
Nadler, Jerrold L.	United States Representative	United State House of Representatives, New York's Tenth District
Operations, Helicopter		Hackensack University Medical Center
Palm, Gary A.	Manager, Teterboro Air Traffic Control Tower	Teterboro Air Traffic Control Tower
Pascrell Jr., Bill	U.S. Representative	United State House of Representatives, New Jersey's Ninth District
Polan, Jolanta	Alternate Contact	Borough of Carlstadt
Poli, Hugo R.	Village Commissioner / Alternate Contact	Village of Ridgely Park
Pou, Nellie	State Senator	New Jersey's 35th Legislative District
Raguseo, Mauro	Mayor	Borough of Little Ferry
Raguseo, Pasquale	General Manager	Signature Flight Support
Randall, Thomas W.	Mayor	Ho-Ho-Kus, NJ
Rethage, Fritz	Alternate Contact	Borough of Hasbrouck Heights
Riethof, Stephen F.	Certified Flight Instructor	NJ Aviation Hall-of-Fame
Robbins, Robert	Councilman	Borough of Bogota
Rojas, Juan	Senior External Relations Representative	The Port Authority of NY & NJ
Rooney, Kevin J.	Member of State Assembly	New Jersey's 40th Legislative District
Rosenthal, Linda B.	Member of State Assembly	New York's 67th Legislative District

Name	Position	Organization/Municipality
Roth, John F.	Mayor	Mahwah, NJ
Sacco, Nicholas J.	State Senator	32nd Legislative District
Sarlo, Paul A.	Mayor	Borough of Wood-Ridge
Sarlo, Paul A.	State Senator	New Jersey's 36th Legislative District
Schaer, Gary S.	Member of State Assembly	New Jersey's 36th Legislative District
Schepisi, Holly	Member of State Assembly	New Jersey's 39th Legislative District
Schumer, Charles	United States Senator	United States Senate
Sheridan, Maria	Airport Manager	Teterboro Airport
Specht, Michael	Town Supervisor	Ramapo, NY
Stearns, Douglas	Acting General Manager, New Jersey Airports	The Port Authority of NY & NJ
Stull, Ronald	Alternate Contact	Borough of Carlstadt
Sumter, Shavonda E.	Member of State Assembly	New Jersey's 35th Legislative District
Surak, Bruce	Councilman	Borough of Moonachie
Swain, Lisa	Member of State Assembly	New Jersey's 38th Legislative District
Tamburro, Ralph	Program Manager - Aviation Operations	The Port Authority of NY & NJ
Tedesco III, James J.	County Executive	Bergen County
Thomas, Bill	Director of Operations	Jet Aviation Flight Services - Teterboro
Tully, P. Christopher	Member of State Assembly	New Jersey's 38th Legislative District
Ullman, Ryan P.	Councilman	Borough of Maywood
Vaccaro, Dennis	Mayor	Borough of Moonachie
Vainieri-Huttle, Valerie	Member of State Assembly	New Jersey's 37th Legislative District

Name	Position	Organization/Municipality
Van Emburgh, Beth	Manager, Government and Industry Affairs	National Air Transportation Association
Vander Wende, Rick	Manager, Contract Services	Teterboro Airport
Voss, Joan M.	Freeholder Chairwoman	Bergen County
Watt, John P.	Mayor	Borough of Teterboro
Wehrle, Corinne	Alternate Contact	Borough of Little Ferry
Weinberg, Loretta	State Senator	New Jersey's 37th Legislative District
Wilson, Jacqueline	Alternate	Township of Teaneck
Wimberly, Benjie E.	Member of State Assembly	New Jersey's 35th Legislative District

APPENDIX G

List of Referenced Websites

New Jersey's Endangered and Threatened Wildlife

The lists of New Jersey's endangered and threatened wildlife species are maintained by the Division of Fish and Wildlife's [Endangered and Nongame Species Program \(ENSP\)](#). These lists are used to determine protection and management actions necessary to ensure the survival of the state's endangered, threatened and other nongame wildlife. See the [Species Status Assessment](#) page for information on the listing process.

This work is made possible through voluntary contributions received through [Check-off donations to the Endangered Wildlife Conservation Fund on the State Income Tax Form](#), the sale of [Conserve Wildlife License Plates](#), and donations.

To report a sighting of endangered or threatened wildlife, use the [Rare Wildlife Sighting Report Form](#).

Endangered Species are those whose prospects for survival in New Jersey are in immediate danger because of a loss or change in habitat, over-exploitation, predation, competition, disease, disturbance or contamination. Assistance is needed to prevent future extinction in New Jersey.

Threatened Species are those who may become endangered if conditions surrounding them begin to or continue to deteriorate.

There are other classifications for wildlife as well, including [Stable](#), [Species of Special Concern](#) and [Undetermined](#). For a complete listing of species monitored by the ENSP, see the [Species Status Listing](#) on the [Conserve Wildlife Foundation of NJ](#) website.

Species names in the tables below link to PDF documents containing identification, habitat and status and conservation information. For more detailed descriptions, photographs, and range maps of New Jersey's endangered, threatened, and special concern species, please refer to the [Conserve Wildlife Foundation of NJ's on-line field guide](#).

BIRDS

List of Endangered, Threatened and Special Concern Fish & Wildlife Species of New York State

[Endangered](#) || [Threatened](#) || [Special Concern](#) || [High Priority Species of Greatest Conservation Need](#)

The Department is proposing to revise the list of endangered, threatened, and special concern species. The table below shows the current status of species and the species status assessments developed in support of the State Wildlife Action Plan in 2015. These assessments are the basis of any proposed change in status. In addition to evaluating the currently listed species, DEC is evaluating all High Priority Species of Greatest Conservation Need for potential listing.

View the [Draft Species List Under the Part 182.5 Pre-proposal \(PDF\)](#) or a document showing all [species with current and proposed changes \(PDF\)](#). Comments will be accepted until January 24, 2020 on the [Pre-proposal](#).

Endangered

Those endangered species which meet one or both of the criteria specified in section 182.2(g) of 6NYCRR Part 182 and which are found, have been found, or may be expected to be found in New York State include:

FEDERAL AVIATION ADMINISTRATION

**ORDER
1050.1F**

Effective Date:
7/16/15

SUBJ: Environmental Impacts: Policies and Procedures

This Order serves as the Federal Aviation Administration's (FAA) policy and procedures for compliance with the National Environmental Policy Act (NEPA) and implementing regulations issued by the Council on Environmental Quality (CEQ). The provisions of this Order and the CEQ Regulations apply to actions directly undertaken by the FAA and to actions undertaken by a non-Federal entity where the FAA has authority to condition a permit, license, or other approval. The requirements in this Order apply to, but are not limited to, the following actions: grants, loans, contracts, leases, construction and installation actions, procedural actions, research activities, rulemaking and regulatory actions, certifications, licensing, permits, plans submitted to the FAA by state and local agencies for approval, and legislation proposed by the FAA. The Order was last revised in 2006.

This Order updates FAA Order 1050.1E to: 1) provide a clear, concise, and up-to-date discussion of the FAA's requirements for implementing NEPA; and 2) clarify requirements in order to facilitate timely, effective, and efficient environmental reviews of FAA actions, including NextGen improvements.

§ 300307. Historic preservation review commission

In this division, the term "historic preservation review commission" means a board, council, commission, or other similar collegial body—

(1) that is established by State or local legislation as provided in section 302503(a)(2) of this title; and

(2) the members of which are appointed by the chief elected official of a jurisdiction (unless State or local law provides for appointment by another official) from among—

- (A) professionals in the disciplines of architecture, history, architectural history, planning, prehistoric and historic archeology, folklore, cultural anthropology, curation, conservation, and landscape architecture, or related disciplines, to the extent that those professionals are available in the community; and
- (B) other individuals who have demonstrated special interest, experience, or knowledge in history, architecture, or related disciplines and will provide for an adequate and qualified commission.

(Pub. L. 113-287, § 3, Dec. 19, 2014, 128 Stat. 3189.)

AUTHORITY: NEPA, the Environmental Quality Improvement Act of 1970, as amended (42 U.S.C. 4321 *et seq.*), sec. 309 of the Clean Air Act, as amended (42 U.S.C. 7409), and E.O. 11934 (Mar. 3, 1976), as amended by E.O. 11961, May 24, 1977.

SOURCE: 48 FR 6092, Nov. 29, 1973, unless otherwise noted.

§1508.1 Terminology.

The terminology of this part shall be uniform throughout the Federal Government.

§1508.2 Act.

Act means the National Environmental Policy Act, as amended (42 U.S.C. 4321, *et seq.*), which is also referred to as "NEPA."

§1508.7

§1508.4 Categorical exclusion.

Categorical exclusion means a category of actions which do not individually or cumulatively have a significant effect on the human environment and which have been found to have no such effect in procedures adopted by a Federal agency in implementation of these regulations (§1507.3) and for which, therefore, neither an environmental assessment nor an environmental impact statement is required. An agency may decide in its procedures or otherwise, to prepare environmental assessments for the reasons stated in §1508.9 even though it is not required to do so. Any procedures under this section shall provide for extraordinary circumstances in which a normally excluded action may have a significant environmental effect.

§1508.5 Cooperating agency.

Cooperating agency means any Federal agency other than a lead agency which has jurisdiction by law or special expertise with respect to any environmental impact involved in a proposal (or a reasonable alternative) for legislation or other major Federal action significantly affecting the quality of the human environment. The selection and responsibilities of a cooperating agency are described in §1501.6. A State or local agency of similar qualifications or, when the effects are on a reservation, an Indian Tribe, may by agreement with the lead agency become a cooperating agency.

§1508.6 Council.

Council means the Council on Environmental Quality established by title II of the Act.

§1508.7 Cumulative impact.

Cumulative impact is the impact on the environment which results from the incremental impact of the action when added to other past, present, and reasonably foreseeable future actions regardless of what agency (Federal or non-Federal) or person undertakes such other actions. Cumulative impacts can

1

INTRODUCTION TO CUMULATIVE EFFECTS ANALYSIS

Evidence is increasing that the most devastating environmental effects may result not from the direct effects of a particular action, but from the combination of individually minor effects of multiple actions over time.

Some authorities contend that most environmental effects can be seen as cumulative because almost all systems have already been modified, even degraded, by humans. According to the report of the National Performance Review (1994), the heavily modified condition of the San Francisco Bay estuary is a result of activities regulated by a wide variety of government agencies. The report notes that one mile of the delta of the San Francisco Bay may be affected by the decisions of more than 400 agencies (federal, state, and local). William Odum (1982) succinctly described environmental degradation from cumulative effects as "the tyranny of small decisions."

The Council on Environmental Quality's (CEQ) regulations for implementing the National Environmental Policy Act (NEPA) define cumulative effects as

the impact on the environment which results from the incremental impact of the action when added to other past, present, and reasonably foreseeable future actions regardless of what agency (Federal or

The fact that the human environment continues to change in unintended and unwanted ways in spite of improved federal decisionmaking resulting from the implementation of NEPA is largely attributable to this incremental (cumulative) impact. Although past environmental impact analyses have focused primarily on project-specific impacts, NEPA provides the context and carries the mandate to analyze the cumulative effects of federal actions.

NEPA and CEQ's regulations define the cumulative problem in the context of the action, alternatives, and effects. By definition, cumulative effects must be evaluated along with the direct effects and indirect effects (those that occur later in time or farther removed in distance) of each alternative. The range of alternatives considered must include the no-action alternative as a baseline against which to evaluate cumulative effects. The range of actions that must be considered includes not only the project proposal but all connected and similar actions that could contribute to cumulative effects. Specifically, NEPA requires that all related actions be addressed in the same analysis. For example, the expansion of an airport runway that will increase the number of passengers traveling must address not only the effects of the runway itself, but also the expansion of the terminal and the extension of

Announcements

TEB TAC Meeting No. 14
Announcement - October 23, 2019

What is a 14 CFR Part 150 Study?

14 Code of Federal Regulations (CFR) Part 150 provides a vehicle for airport operators to undertake studies that provide the public with information about existing and future noncompatible land uses around airports and to create measures that reduce, and prevent the introduction of new, noncompatible land uses. A noncompatible land use is the use of land that is impacted by aircraft noise in excess of the thresholds established in Part 150. Part 150 studies involve the creation of Noise Exposure Maps and Noise Compatibility Programs. A Noise Exposure Map (NEM) is designed to clearly identify an airport's present and future noise patterns and the land uses which are not compatible with those noise patterns. A Noise Compatibility Program (NCP) shows what measures the airport operator has taken or proposes to take to reduce, and/or prevent the introduction of, noncompatible land uses within the area covered by the airport's NEM.

Has a 14 CFR Part 150 Study been prepared for TEB Airport?

Although the Port Authority of New York and New Jersey has a long history of addressing noise exposure from aircraft operations at TEB, this is the first 14 CFR Part 150 Airport Noise Compatibility Planning Study for TEB.
