Reference: Environmental Assessment
Charlotte Optimization of Airspace and Procedures in the Metroplex
Early Notification Letter

Dear Congresswoman Ellmers:

This notification letter is to inform you that the Federal Aviation Administration (FAA) intends to prepare an Environmental Assessment (EA) to consider the potential environmental impacts of the implementation of the Optimization of Airspace and Procedures in the Metroplex (OAPM) in the Charlotte area (CLT OAPM). Attachment 1 is a copy of the Notice that will be published in major newspapers in the Charlotte area (Charlotte, N.C. and Columbia, S.C.) that notifies the general public of the FAA's intent to prepare an EA.

A "Metroplex" is multiple airports in and around a busy metropolitan area. The CLT OAPM would improve the efficiency of the Charlotte Metroplex airspace by optimizing aircraft arrival and departure procedures at a number of airports, including:

- Charlotte/Douglas International Airport
- Charlotte-Monroe Executive Airport
- Concord Regional Airport
- Donaldson Center Airport
- Greenville Downtown Airport
- Greenville Spartanburg International Airport
- Rowan County Airport
- Piedmont Triad International Airport
- Rock Hill (York County) Airport-Bryant Field
- Smith Reynolds Airport
- Spartanburg Downtown Memorial Airport
- Statesville Regional Airport
- Hickory Regional Airport

To evaluate potential environmental impacts of the CLT OAPM project, the FAA has established a General Study Area to evaluate potential impacts of changes in aircraft routing that are proposed to occur below 10,000 feet above ground level (AGL). Enclosed is a graphic depicting the General Study Area for the environmental review process.

The FAA has begun preparation of the EA and welcomes your input. We are sending this early notification letter for the following reasons:

1. To advise you of the initiation of the EA study;
2. To provide you an opportunity to provide any background information that you may have regarding the study area established for this EA; and
3. To provide you an opportunity to advise the FAA of any issues, concerns, policies or regulations that you may have regarding the environmental analysis that will be undertaken in the EA.

FAA will make a decision as to whether to hold public workshop(s) following publication of the Draft EA. If the decision is to hold public workshop(s), FAA will provide public notice of the public workshop(s) and the availability of the Draft EA at a future date. If applicable, the FAA plans to hold separate consultations with the appropriate Tribal Governments and their designated Tribal Historic Preservation Office in accordance with Executive Order 13175. The appropriate Tribal Governments and their designated Tribal Historic Preservation Office will be determined after the General Study Area is finalized.

FAA is currently working on additional details related to this project, and will be coordinating with the appropriate agencies and tribes in the near future. If you desire to provide comments and/or have any questions about the information provided, please provide them by letter or email, before July 22, 2014, at the following address:

Attn: Kristi Ashley
Eastern Service Center, Operations Support Group
1701 Columbia Ave
College Park, GA 30337

Sincerely,

Eric Fox
Acting Manager, Operations Support Group
Eastern Service Center

Attachment – Public Notice and General Study Area graphic

**U.S. DEPARTMENT OF TRANSPORTATION
Federal Aviation Administration**

Notice of the Federal Aviation Administration's (FAA) intention to prepare a Draft Environmental Assessment for the Optimization of Airspace and Procedures in the Charlotte Metroplex (CLT OAPM).

SUMMARY: The FAA is issuing this notice to advise the public it intends to prepare a Draft Environmental Assessment (EA) for the CLT OAPM Metroplex, which involves flight procedure optimization for Charlotte/Douglas International Airport (CLT) as well as numerous satellite airports. The EA will be conducted pursuant to the National Environmental Policy Act of 1969 and its implementing Regulations found at Title 40, Code of Federal Regulations, Sections 1500-1508.

The purpose of the proposed CLT OAPM is to improve the efficiency of the controlled airspace (a generic term referring to airspace where air traffic control service is provided) using more current navigation technology called Area Navigation (RNAV). The FAA has not made any decisions about the final content of the EA.

SUPPLEMENTARY INFORMATION:

Air traffic procedures operating in the airspace around Charlotte/Douglas International Airport (CLT) will be evaluated in the draft EA. The current procedures, which are intended to provide an orderly flow of traffic in and out of a busy metropolitan area, are not optimized due to existing airspace configuration and a lack of efficiently designed RNAV procedures. RNAV-based procedures can direct pilots along more direct routes with predictable location and altitude information. A predictable procedure would involve less communication between an air traffic controller and a pilot; therefore reducing workload for both individuals. Optimizing RNAV procedures as well as developing additional new RNAV procedures for the CLT Metroplex would enhance efficient use of the airspace.

Proposed Action

The EA is expected to evaluate at least two alternatives, the No Action and the proposed CLT OAPM alternative (the Proposed Action). The FAA has not finalized the proposed CLT OAPM at this time. The proposed CLT OAPM as it is currently being configured consists of optimizing aircraft routes within the controlled airspace into and out of the CLT Metroplex. The primary components of the proposed CLT OAPM would include:

- **ESTABLISHING UPDATED DEPARTURE ROUTES AND/OR FIXES FROM THE EA AIRPORTS.** Aircraft departing from the EA Airports would transition to the high altitude routes using optimized routes based on RNAV technology.
- **ESTABLISHING UPDATED ARRIVAL ROUTES AND/OR FIXES INTO THE EA AIRPORTS.** Aircraft bound for the EA Airports would use optimized procedures to transition from a high altitude route to an existing approach route.

Implementation of the proposed CLT OAPM is not anticipated to increase the number of aircraft operations at CLT or any of the satellite airports or involve physical construction of any facilities.

General Study Area

Using radar data for the EA study airports and the initial proposed design changes, the FAA has identified a general study area in which changes to aircraft routing would occur as a result of the Proposed Action.

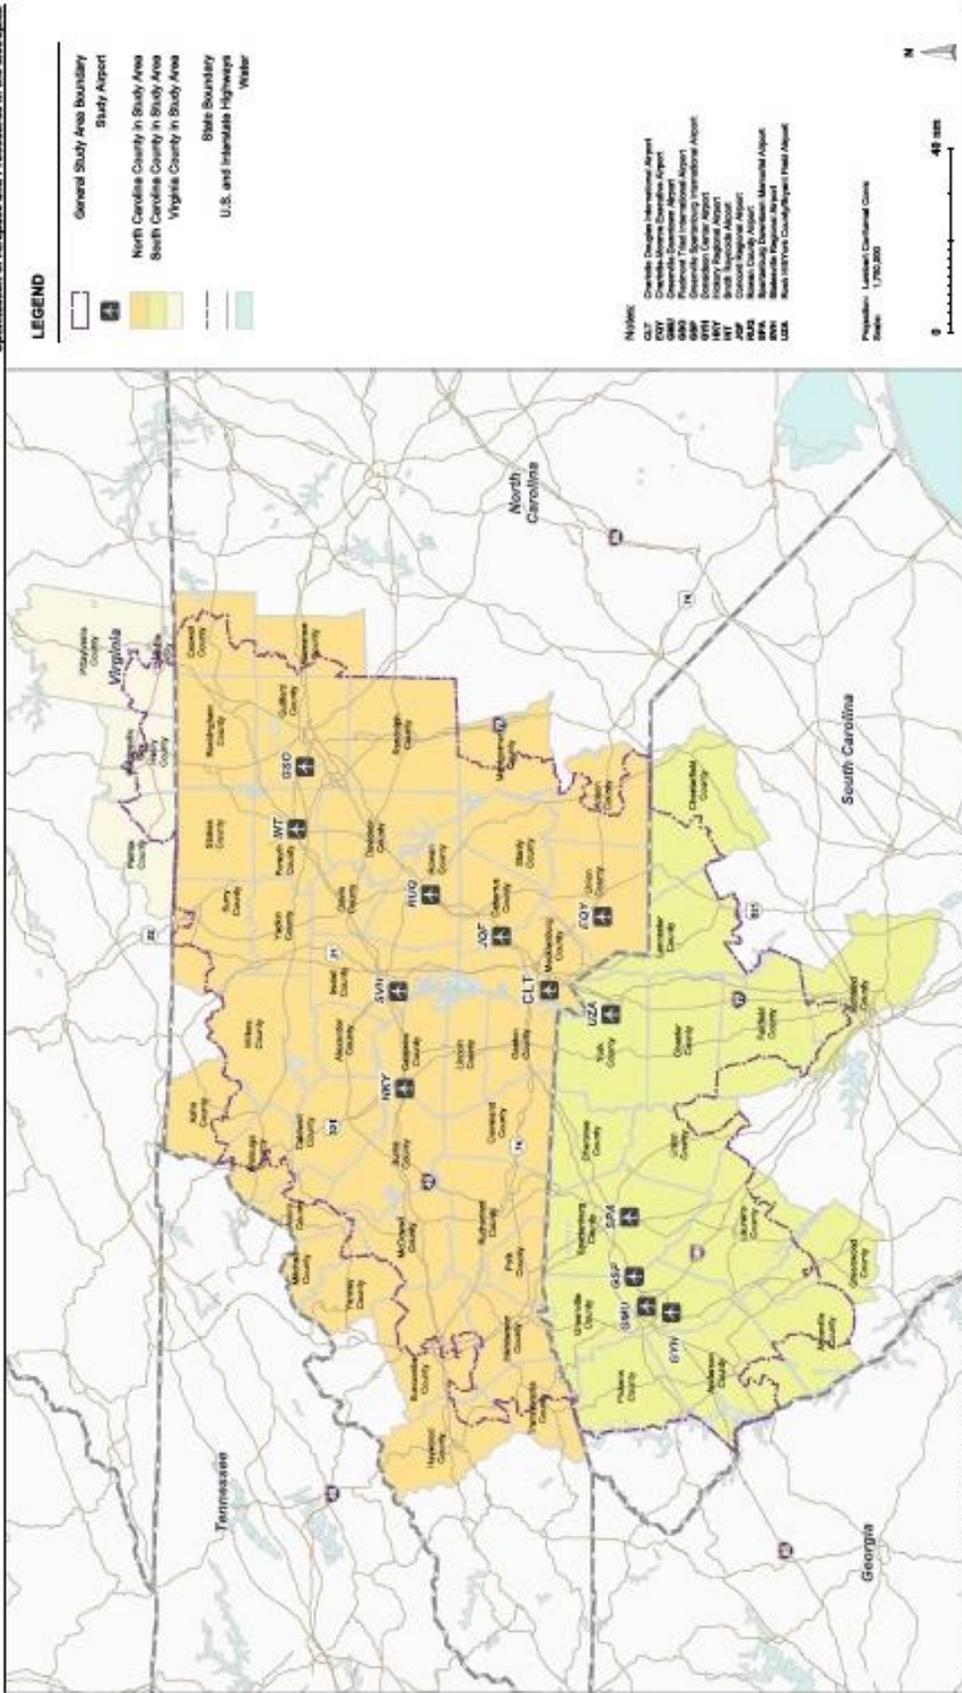

The general study area will be used to evaluate and compare the potential impacts of the Proposed Action and reasonable alternatives. This evaluation will occur where departing aircraft are anticipated to be at altitudes below 10,000 feet above ground level (AGL) and arriving aircraft at altitudes below 7,000 feet AGL under the Proposed or the No Action alternative. The FAA may also consider traffic flying over tribal lands, national parks or national wildlife refuges below 18,000 feet AGL to evaluate and compare the potential impacts of the Proposed Action and the No Action alternative.

PUBLIC WORKSHOPS

FAA will make a decision as to whether to hold public workshop(s) following publication of the Draft EA. If the decision is to hold public workshop(s), FAA will provide public notice of the public workshop(s) and the availability of the Draft EA at a future date.

FOR FURTHER INFORMATION CONTACT: Federal Aviation Administration, Air Traffic Organization (ATO) Eastern Service Center, Attn: CLT OAPM Environmental, 1701 Columbia Avenue, College Park, GA 30337; email at 9-ASO-ATO-CLTOAPM@faa.gov; or facsimile at 404-305-5572.

Environmental Assessment for Charlotte
Optimization of Airspace and Procedures in the Metropolitan

 Federal Aviation Administration Notice of the
 Federal Aviation Administration's (FAA)

Before the undersigned, a Notary Public of said County and State, duly authorized to administer oaths affirmations, etc., personally appeared, being duly sworn or affirmed according to law, doth depose and say that he/she is a representative of The Charlotte Observer Publishing Company, a corporation organized and doing business under the laws of the State of Delaware, and publishing a newspaper known as The Charlotte Observer in the city of Charlotte, County of Mecklenburg, and State of North Carolina and that as such he/she is familiar with the books, records, files, and business of said Corporation and by reference to the files of said publication, the attached advertisement was inserted. The following is correctly copied from the books and files of the aforesaid Corporation and Publication.

PUBLISHED ON: 06/13/2014

AD SPACE: 126 LINES

FILED ON: 06/17/2014

U.S. DEPARTMENT OF TRANSPORTATION
Federal Aviation Administration
 Notice of the Federal Aviation Administration's (FAA) intention to prepare a Draft Environmental Assessment (EA) for the Optimization of Airspace and Procedures in the Charlotte Metroplex (CLT OAPM).
SUMMARY: The FAA is issuing this notice to advise the public it intends to prepare a Draft Environmental Assessment (EA) for the CLT OAPM Metroplex, which involves flight procedure optimization for Charlotte/Douglas International Airport (CLT) as well as numerous satellite airports. The EA will be conducted pursuant to the National Environmental Policy Act of 1969 and its implementing Regulations found at Title 40, Code of Federal Regulations, Sections 1500-1506.
 The purpose of the proposed CLT OAPM is to improve the efficiency of the controlled airspace in generic term referring to airspace where air traffic control services is provided using more current navigation technology called Area Navigation (RNAV). The FAA has not made any decisions about the final content of the EA.
SUPPLEMENTARY INFORMATION:
 Air traffic procedures operating in the airspace around Charlotte/Douglas International Airport (CLT) will be evaluated in the draft EA. The current procedures, which are intended to provide an orderly flow of traffic in and out of a busy metropolitan area, are not optimized due to existing airspace configuration and a lack of efficiently designed RNAV procedures. RNAV-based procedures can direct pilots along more direct routes with predictable location and altitude information. A predictable procedure would involve two communication between an air traffic controller and a pilot, therefore reducing workload for both individuals. Optimizing RNAV procedures as well as developing additional new RNAV procedures for the CLT Metroplex would enhance efficient use of the airspace.
Proposed Action
 The EA is expected to evaluate at least two alternatives: the No Action and the proposed CLT OAPM alternative (the Proposed Action). The FAA has not finalized the proposed CLT OAPM at this time. The proposed CLT OAPM as it is currently being configured consists of optimizing aircraft routes within the controlled airspace into and out of the CLT Metroplex. The primary components of the proposed CLT OAPM would include:
 • ESTABLISHING UPDATED DEPARTURE ROUTES AND/OR FIXES FROM THE EA AIRPORTS. Aircraft departing from the EA Airports would transition to the high altitude routes using optimized routes based on RNAV technology.
 • ESTABLISHING UPDATED ARRIVAL ROUTES AND/OR FIXES INTO THE EA AIRPORTS. Aircraft bound for the EA Airports would use optimized procedures to transition from a high altitude route to an existing approach route.
 Implementation of the proposed CLT OAPM is not anticipated to increase the number of aircraft operations at CLT or any of the satellite airports or involve physical construction of any facilities.

General Study Area
 Using radar data for the EA study airports and the initial proposed design changes, the FAA has identified a general study area in which changes to aircraft routing would occur as a result of the Proposed Action.
 The general study area will be used to evaluate and compare the potential impacts of the Proposed Action and reasonable alternatives. This evaluation will occur where departing aircraft are anticipated to be at altitudes below 10,000 feet above ground level (AGL) and arriving aircraft at altitudes below 7,000 feet AGL under the Proposed or the No Action alternative. The FAA may also consider traffic flying over tribal lands, national parks or national wildlife refuges below 10,000 feet AGL to evaluate and compare the potential impacts of the Proposed Action and the No Action alternatives.
PUBLIC WORKSHOPS
 FAA will make a decision as to whether to hold public workshop(s) following publication of the Draft EA. If the decision is to hold public workshop(s), FAA will provide public notice of the public workshop(s) and the availability of the Draft EA at a later date.

U.S. DEPARTMENT OF TRANSPORTATION
 Federal Aviation Administration
 Notice of the Federal Aviation Administration's (FAA) intention to prepare a Draft Environmental Assessment for the Optimization of Airspace and Procedures in the Charlotte Metroplex (CLT OAPM).

SUMMARY: The FAA is issuing this notice to advise the public it intends to prepare a Draft Environmental Assessment (EA) for the CLT OAPM Metroplex, which involves flight procedure optimization for Charlotte/Douglas International Airport (CLT) as well as numerous satellite airports. The EA will be conducted pursuant to the National Environmental Policy Act of 1969 and its Implementing Regulations found at Title 40, Code of Federal Regulations, Sections 1500-1508.

The purpose of the proposed CLT OAPM is to improve the efficiency of the controlled airspace (a generic term referring to airspace where air traffic control service is provided) using more current navigation technology called Area Navigation (RNAV). The FAA has not made any decisions about the final content of the EA.

SUPPLEMENTARY INFORMATION:
 Air traffic procedures operating in the airspace around Charlotte/Douglas International Airport (CLT) will be evaluated in the draft EA. The current procedures, which are intended to provide an orderly flow of traffic in and out of a busy metropolitan area, are not optimized due to existing airspace configuration and a lack of efficiently designed RNAV procedures. RNAV-based procedures can direct pilots along more direct routes with predictable location and altitude information. A predictable procedure would involve less communication between an air traffic controller and a pilot, therefore reducing workload for both individuals. Optimizing RNAV procedures as well as developing additional new RNAV procedures for the CLT Metroplex would enhance efficient use of the airspace.

Proposed Action
 The EA is expected to evaluate at least two alternatives, the No Action and the proposed CLT OAPM alternative (the Proposed Action). The FAA has not finalized the proposed CLT OAPM at this time. The proposed CLT OAPM as it is currently being configured consists of optimizing aircraft routes within the controlled airspace into and out of the CLT Metroplex. The primary components of the proposed CLT OAPM would include:

- ESTABLISHING UPDATED DEPARTURE ROUTES AND/OR FIXES FROM THE EA AIRPORTS. Aircraft departing from the EA Airports would transition to the high altitude routes using optimized routes based on RNAV technology.
- ESTABLISHING UPDATED ARRIVAL ROUTES AND/OR FIXES INTO THE EA AIRPORTS. Aircraft bound for the EA Airports would use optimized procedures to transition from a high altitude route to an existing approach route.

Implementation of the proposed CLT OAPM is not anticipated to increase the number of aircraft operations at CLT or any of the satellite airports or involve physical construction of any facilities.

General Study Area
 Using radar data for the EA study airports and the initial proposed design changes, the FAA has identified a general study area in which changes to aircraft routing would occur as a result of the Proposed Action.

The general study area will be used to evaluate and compare the potential impacts of the Proposed Action and reasonable alternatives. This evaluation will occur where departing aircraft are anticipated to be at altitudes below 10,000 feet above ground level (AGL) and arriving aircraft at altitudes below 7,000 feet AGL, under the Proposed or the No Action alternative. The FAA may also consider traffic flying over tribal lands, national parks or national wildlife refuges below 10,000 feet AGL to evaluate and compare the potential impacts of the Proposed Action and the No Action alternative.

PUBLIC WORKSHOPS
 FAA will make a decision as to whether to hold public workshop(s) following publication of the Draft EA. If the decision is to hold public workshop(s), FAA will provide public notice of the public workshop(s) and the availability of the Draft EA at a future date.

RE: Environmental Assessment
Charlotte Optimization of Airspace and Procedures in the Metroplex
Early Notification Letter

Dear Ms. Ashley:

The following comments are in response to the letter sent by Eric Fox regarding the Environmental Assessment for Charlotte Optimization of Airspace and Procedures in the Metroplex and request for comments about the historic resources.

Planning staff has reviewed the maps submitted and it is a very broad area including all of Forsyth County. Forsyth County has a number of historic resources including several National Register of Historic Places districts and individually listed properties. Also we have three locally designated districts and over 100 Local Historic Landmarks. Both the City and the County make it a priority to maintain their historical and cultural heritage, therefore, we are concerned with any action that would adversely affect any of these resources. However, the project description given is too broad to give any specific information at this time.

Thank you for the opportunity to review and comment on this project. If you have any questions my number is 336-747-7063.

Sincerely,

Michelle M. McCullough
Historic Resource Coordinator
Project Planner

RE: Early Notification Letter, Environmental Assessment for Charlotte Optimization
of Airspace and Procedures in the Metroplex

Dear Ms. Ashley:

This letter responds to a June 11, 2014 letter from Eric Fox to the Director of Virginia's Department of Environmental Quality, David K. Paylor, regarding the Federal Aviation Administration's intent to prepare an environmental assessment (EA). According to Mr. Fox's letter, the Federal Aviation Administration (FAA) will use the EA to consider potential environmental impacts of the implementation of the Optimization of Airspace and Procedures in the Metroplex (OAPM) in the Charlotte (N.C.) area.

DESCRIPTION OF PROPOSED ACTION

After defining a "metroplex" as multiple airports in and around a busy metropolitan area, Mr. Fox's letter states that the OAPM would improve the efficiency of the airspace by optimizing aircraft arrival and departure procedures at a number of airports (13 are listed). The undertaking may involve changes in flight paths and/or altitudes, but would not require any ground disturbance or increase the number of aircraft operations in the metroplex airspace area. (Letter, page 1.) The general study area to be used by FAA to evaluate potential environmental impacts is illustrated on a graphic enclosed with the letter; the graphic indicates several Virginia jurisdictions bordering the state line north of Charlotte. (File page 5.)

Other information with the letter indicates that FAA is evaluating a proposed alternative, the CLT (Charlotte) OAPM and the No Action alternative. The proposed action contemplates that planes leaving any of the listed airports would get to high-altitude routes, and return from these routes toward the airports, based on Area Navigation technology (RNAV).

ENVIRONMENTAL REVIEW UNDER THE NATIONAL ENVIRONMENTAL POLICY ACT

The role of the Virginia Department of Environmental Quality (DEQ) in relation to the project is as follows. DEQ's Office of Environmental Impact Review (OEIR) will coordinate Virginia's review of the NEPA document and comment to the Federal Aviation Administration on behalf of the Commonwealth.

As you know, the National Environmental Policy Act (PL 91-190, 1969) (NEPA) and its implementing regulations (Title 40, *Code of Federal Regulations*, Parts 1500-1508) require draft and final Environmental Impact Statements (EISs) for federal or federally-licensed or -funded undertakings which will or may give rise to significant impacts upon the human environment. EISs carry more stringent public participation requirements than EAs and provide more time and detail for comments and public decision-making. The possibility that an EIS may be required for the operations and facilities contemplated in the proposed action should not be overlooked in your planning for it. Accordingly, we refer to "NEPA document" in this letter.

PROJECT SCOPING AND AGENCY INVOLVEMENT

While this Office does not participate in scoping efforts beyond the advice given herein, other agencies are free to provide scoping comments concerning the preparation of the NEPA document. Accordingly, we are sharing our response to the letter with selected state and local Virginia agencies which have responsibilities bearing on the proposed action. These are likely to include the following:

- Department of Environmental Quality:
 - o Office of Environmental Impact Review
 - o Blue Ridge Regional Office
 - o Division of Air Program Coordination
 - o Division of Land Protection and Revitalization
- Department of Game and Inland Fisheries
- Department of Conservation and Recreation
- Department of Forestry
- Department of Historic Resources
- Department of Aviation
- City of Danville
- City of Martinsville
- Patrick County
- Henry County
- Pittsylvania County
- West Piedmont Planning District Commission.

In order to ensure an effective coordinated review of the environmental document, we will require 19 copies of it when it is published. That submission may include 4 printed copies and 15 CDs, or 4 printed copies and an electronic copy

available for download at a web site or ftp site. The document should include a U.S. Geological Survey topographic map as part of its information. We recommend, as well, that project details unfamiliar to people outside the FAA be adequately described.

If you have questions about the environmental review process or the federal consistency review process, please feel free to call me at (804) 698-4325 or John Fisher at (804) 698-4339.

Sincerely,

Ellie L. Irons, Program Manager
Environmental Impact Review

Mr. Eric Fox
Acting Manager, Operations Support Group
Eastern Service Center
1701 Columbia Avenue
College Park, GA 30337

Dear Mr. Fox:

I am responding to your letter dated June 11, 2014 regarding the Optimization of Airspace and Procedures in the Metroplex (OAMP) in the Charlotte area. I wanted to make you aware of a number of park units the North Carolina Division of Parks and Recreation operates in the study area indicate in your scoping document.

These include:

- Mayo River State Park in Rockingham County
- Haw River State Park in Guilford County
- Hanging Rock State Park in Stokes County
- Pilot Mountain State Park in Surry County
- Stone Mountain State Park in Wilkes and Alleghany Counties
- New River State Park in Ashe County
- Mount Jefferson State Natural Area in Ashe County
- Elk Knob State Park in Ashe and Watauga Counties
- Bear Paw State Natural Area in Watauga County
- Grandfather Mountain State Park in Avery and Watauga Counties
- Yellow Mountain State Natural Area in Mitchell and Avery Counties
- Mount Mitchell State Park in Yancey County
- Lake James State Park in Burke County
- South Mountains State Park in Burke County

1615 Mail Service Center, Raleigh, North Carolina 27699-1615

Re: Charlotte Optimization of Airspace and Procedures in the Metroplex, EA
Multiple Counties, South Carolina
SHPO Project No. 14JS0258

Dear Ms. Ashley:

Our office has received the scoping letter dated June 11, 2014 that you submitted as part of your agency's National Environmental Policy Act (NEPA) process for the project referenced above. This letter is for preliminary, informational purposes only and does not constitute consultation or agency coordination with our office as defined in 36 CFR 800: "Protection of Historic Properties" or by any state regulatory process. If the Federal Aviation Administration (FAA) chooses to substitute the NEPA process for the process outlined in Section 106 of the National Historic Preservation Act, your agency must notify our office of the proposed substitution.

Our office maintains several resources for identifying historic properties. ArchSite is an online Geographic Information System (GIS) mapping program that includes all known historic and archaeological sites in South Carolina. Information on ArchSite can be found here: <http://archsite.cas.sc.edu/ArchSite/>. A list of properties listed in the National Register of Historic Places can be found here: <http://www.nationalregister.sc.gov/nrlinks.htm>. Additional historic contexts, survey reports, and related historic property documents can be found here: <http://shpo.sc.gov/research/Pages/conreps.aspx>. These sources should assist your agency in identifying historic properties for NEPA scoping.

The State Historic Preservation Office will provide comments regarding historic and archaeological resources and effects to them once the federal or state agency initiates consultation. Project Review Forms and additional guidance regarding our office's role in the compliance process and historic preservation can be found on our website at: <http://shpo.sc.gov/programs/revcomp>.

If you have any questions, please contact me at (803) 896-6129 or at sylvest@scdah.state.sc.us.

Sincerely,

John Sylvest
Project Review Coordinator
State Historic Preservation Office
SC Department of Archives and History

Reference: Environmental Assessment
Charlotte Optimization of Airspace and Procedures in the Metroplex
Early Notification Letter

Dear Chairman Smith:

This notification letter is to inform you that the Federal Aviation Administration (FAA) intends to prepare an Environmental Assessment (EA) to consider the potential environmental impacts of the implementation of the Optimization of Airspace and Procedures in the Metroplex (OAPM) in the Charlotte area (CLT OAPM). Attachment 1 is a copy of the Notice that will be published in major newspapers in the Charlotte area (Charlotte, N.C. and Columbia, S.C.) that notifies the general public of the FAA's intent to prepare an EA.

A "Metroplex" is multiple airports in and around a busy metropolitan area. The CLT OAPM would improve the efficiency of the Charlotte Metroplex airspace by optimizing aircraft arrival and departure procedures at a number of airports, including:

- Charlotte/Douglas International Airport
- Charlotte-Monroe Executive Airport
- Concord Regional Airport
- Donaldson Center Airport
- Greenville Downtown Airport
- Greenville Spartanburg International Airport
- Rowan County Airport
- Piedmont Triad International Airport
- Rock Hill (York County) Airport-Bryant Field
- Smith Reynolds Airport
- Spartanburg Downtown Memorial Airport
- Statesville Regional Airport
- Hickory Regional Airport

The project may involve changes in aircraft flight paths and/or altitudes in certain areas, but would not require any ground disturbance or increase the number of aircraft operations within the Charlotte Metroplex airspace area.

To evaluate potential environmental impacts of the CLT OAPM project, the FAA has established a General Study Area to evaluate potential impacts of changes in aircraft routing that are proposed to occur below 10,000 feet above ground level (AGL). Enclosed is a graphic depicting the General Study Area for the environmental review process.

The FAA has begun preparation of the EA and welcomes your input. We are sending this early notification letter for the following reasons:

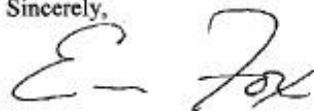

1. To advise you of the initiation of the EA study;
2. To provide you an opportunity to provide any background information that you may have regarding the study area established for this EA; and
3. To provide you an opportunity to advise the FAA of any issues, concerns, policies or regulations that you may have regarding the environmental analysis that will be undertaken in the EA.

FAA will make a decision as to whether to hold public workshop(s) following publication of the Draft EA. If the decision is to hold public workshop(s), FAA will provide public notice of the public workshop(s) and the availability of the Draft EA at a future date. If applicable, the FAA plans to hold separate consultations with the appropriate Tribal Governments and their designated Tribal Historic Preservation Office in accordance with Executive Order 13175. The appropriate Tribal Governments and their designated Tribal Historic Preservation Office will be determined after the General Study Area is finalized.

FAA is currently working on additional details related to this project, and will be coordinating with the appropriate agencies and tribes in the near future. If you desire to provide comments and/or have any questions about the information provided, please provide them by letter or email, before July 22, 2014, at the following address:

Attachment – Public Notice and General Study Area graphic

**U.S. DEPARTMENT OF TRANSPORTATION
Federal Aviation Administration**

Notice of the Federal Aviation Administration's (FAA) intention to prepare a Draft Environmental Assessment for the Optimization of Airspace and Procedures in the Charlotte Metroplex (CLT OAPM).

SUMMARY: The FAA is issuing this notice to advise the public it intends to prepare a Draft Environmental Assessment (EA) for the CLT OAPM Metroplex, which involves flight procedure optimization for Charlotte/Douglas International Airport (CLT) as well as numerous satellite airports. The EA will be conducted pursuant to the National Environmental Policy Act of 1969 and its implementing Regulations found at Title 40, Code of Federal Regulations, Sections 1500-1508.

The purpose of the proposed CLT OAPM is to improve the efficiency of the controlled airspace (a generic term referring to airspace where air traffic control service is provided) using more current navigation technology called Area Navigation (RNAV). The FAA has not made any decisions about the final content of the EA.

SUPPLEMENTARY INFORMATION:

Air traffic procedures operating in the airspace around Charlotte/Douglas International Airport (CLT) will be evaluated in the draft EA. The current procedures, which are intended to provide an orderly flow of traffic in and out of a busy metropolitan area, are not optimized due to existing airspace configuration and a lack of efficiently designed RNAV procedures. RNAV-based procedures can direct pilots along more direct routes with predictable location and altitude information. A predictable procedure would involve less communication between an air traffic controller and a pilot; therefore reducing workload for both individuals. Optimizing RNAV procedures as well as developing additional new RNAV procedures for the CLT Metroplex would enhance efficient use of the airspace.

Proposed Action

The EA is expected to evaluate at least two alternatives, the No Action and the proposed CLT OAPM alternative (the Proposed Action). The FAA has not finalized the proposed CLT OAPM at this time. The proposed CLT OAPM as it is currently being configured consists of optimizing aircraft routes within the controlled airspace into and out of the CLT Metroplex. The primary components of the proposed CLT OAPM would include:

- **ESTABLISHING UPDATED DEPARTURE ROUTES AND/OR FIXES FROM THE EA AIRPORTS.** Aircraft departing from the EA Airports would transition to the high altitude routes using optimized routes based on RNAV technology.
- **ESTABLISHING UPDATED ARRIVAL ROUTES AND/OR FIXES INTO THE EA AIRPORTS.** Aircraft bound for the EA Airports would use optimized procedures to transition from a high altitude route to an existing approach route.

Implementation of the proposed CLT OAPM is not anticipated to increase the number of aircraft operations at CLT or any of the satellite airports or involve physical construction of any facilities.

General Study Area

Using radar data for the EA study airports and the initial proposed design changes, the FAA has identified a general study area in which changes to aircraft routing would occur as a result of the Proposed Action.

The general study area will be used to evaluate and compare the potential impacts of the Proposed Action and reasonable alternatives. This evaluation will occur where departing aircraft are anticipated to be at altitudes below 10,000 feet above ground level (AGL) and arriving aircraft at altitudes below 7,000 feet AGL under the Proposed or the No Action alternative. The FAA may also consider traffic flying over tribal lands, national parks or national wildlife refuges below 18,000 feet AGL to evaluate and compare the potential impacts of the Proposed Action and the No Action alternative.

PUBLIC WORKSHOPS

FAA will make a decision as to whether to hold public workshop(s) following publication of the Draft EA. If the decision is to hold public workshop(s), FAA will provide public notice of the public workshop(s) and the availability of the Draft EA at a future date.

Dear Ms. Ashley,

This is a notification to you that the N.C. State Environmental Review Clearinghouse has received the *Optimization of Airspace and Procedures in the Metroplex* project. This project has been assigned State Clearinghouse #14-E-0000-0552 and this number should be used in all inquiries or correspondence with this office.

Copies of the environmental document are being sent to various governmental organizations for review and comment. In addition, notification of the availability of the document will appear on the North Carolina Environmental Bulletin at <http://www.doa.nc.gov/clearing/ebulletin.aspx>.

The review of this project should be completed on July 18, 2014. After the review has concluded, the comments and signoff letter will be email to the email address used for this message. If you have an alternate email, please email it to me at State.Clearinghouse@doa.nc.gov.

Should you have any questions, please email State.Clearinghouse@doa.nc.gov

Re: Environmental Assessment
Charlotte Optimization of Airspace and Procedures in the Metroplex

Dear Mr. Fox :

We appreciate your interest in submitting your project(s) for review by VDGIF to ensure the protection of sensitive wildlife resources during project development. Unfortunately, due to staffing limitations, we are unable to review pre-applications or scoping documents submitted to our Department. Please note that lack of a response from VDGIF does not constitute a "no comment" response, nor does it imply support of the project or associated activities. It simply means that VDGIF is unable to review your pre-application submittal.

To review your project site for the location of wildlife resources under our jurisdiction, including threatened and endangered wildlife, we recommend accessing the Virginia Fish and Wildlife Information System (VAFWIS) at <http://vafwis.org/fwis/>.

If you have further questions or need additional information about VDGIF's Environmental Programs, please visit: <http://www.dgif.virginia.gov/environmental-programs/>.

Please feel free to attach a copy of this correspondence to any applications or documents you may submit for your project to state or federal permitting agencies.

Sincerely,

A handwritten signature in cursive script that reads 'Mrs. Gladys D. Cason'.

Re: Charlotte Optimization of the Airspace and Procedures in the Metroplex Project
Pittsylvania, Henry, Patrick Counties, and City of Martinsville and Danville, Virginia
DHR File No. 2014-0696

Dear Ms. Ashley,

On June 13, 2014, the Virginia Department of Historic Resources (DHR) received information regarding the above-referenced project for our review and comment pursuant to Section 106 of the National Historic Preservation Act of 1966, as amended. Since the Federal Aviation Administration (FAA) has not officially initiated consultation, we offer our comments as technical assistance only.

DHR understands that the FAA is preparing an Environmental Assessment (EA) for a project that will optimize the efficiency of aircraft routes and supporting airspace management throughout the Charlotte Metroplex. At this time, a General Study Area has been identified in the EA, and we can provide the following comments:

- In your letter, the FAA states that APE will be based on the boundary of the General Study Area. Please clarify whether or not the APE boundary *is* the General Study Area boundary.
- We request that the FAA reconcile an APE with our archives to ensure all resources listed in or eligible for listing in the National Register of Historic Places, are considered.
- At this time, we have no further comments on criteria for assessing adverse effects, however without a better understanding of the project, it is challenging for us to comment on effects.

Should you have any additional questions, please contact me at (804) 482-6084, or via email at andrea.kampinen@dhr.virginia.gov.

Sincerely,

A handwritten signature in cursive script that reads "Andrea Kampinen".

RE: Charlotte Optimization of Airspace and Procedures in the Metroplex

Dear Ms. Ashley:

The Virginia Department of Aviation, at the request of the Virginia Department of Environmental Quality (DEQ), has reviewed the information provided by DEQ and has the following comments regarding the proposed environmental assessment for the Charlotte Optimization of Airspace and Procedures/Metroplex.

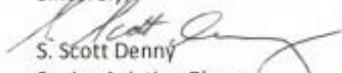

The information package recognizes the Virginia localities of Patrick County, Henry County and Pittsylvania County as well as the Cities of Martinsville and Danville are listed as entities that have been asked for comments regarding this effort. The Blue Ridge Airport and Danville Regional Airports are located in this region and are the two public use airports in Virginia most likely to be impacted by the proposed action.

The intent of this effort is to consider the environmental impacts of implementing an optimization of airspace in and around the CLT Metroplex. In order for this agency to comment on the proposed action will be necessary to clearly define what action will occur. Since we are discussing airspace utilization it is assumed that the flight corridors between the Metroplex and Martinsville and Danville Regional will be evaluated for potential improvements and that a high altitude route, as described in the information package, would be developed.

Any revisions to the existing routes may result in revisions to the standard instrument arrivals or departures to and from the Blue Ridge and Danville Regional Airports. The Department would like the opportunity to comment on any revisions developed prior to their implementation.

If you have any questions regarding this matter please contact me at (804) 236-3632.

Sincerely,

S. Scott Denny
Senior Aviation Planner

Charlotte Optimization of Airspace and Procedures in the Metroplex Early Notification
Letter

To addressee and all CC parties:

Thank you for sharing information regarding the upcoming EA study. As a homeowner and a concerned citizen in the City of Charlotte, I am hugely impacted by the noise level of planes flying over my home in the University area of North Charlotte. My home is directly under the flight path of planes landing on runway 05/23.

The noise level is not only disruptive to my life outdoors; it is significantly impacting my quality of life both inside and out. I enjoy my neighborhood and I have invested heavily in my home over the past 19 years. However, like most in Charlotte, I cannot afford to pick up and move as our home values have not recovered from the 2008 recession. If I could, I would. It is that bad!

I always thought of my home as an investment, and as such, I have made significant upgrades, some for my personal pleasure but more recently many to reduce the noise level inside my home. Just recently, I installed triple pane vinyl glass windows to reduce the noise level to avoid being awoken at 6:00 am in the morning. I found the new windows have helped but to a much lesser degree than I thought at a cost of over \$10,000.00. You would have thought triple pane windows would have eliminated the noise inside, but for a light sleeper like me it has not. I started to upgrade my attic space but I am now thinking that is a waste of money. I have too found that I cannot enjoy the outdoors in my own yard without the disruptive noise level overhead, sometime so relentless that a plane is flying over every 1-3 minutes, many every 30-45 seconds during peak times.

Furthermore, I work from home and during the earlier cooler months I tried leaving my windows opened. How nice it would have been to enjoy the cool weather and nice flow of air inside your home. However, my co-workers complained my speakerphone was cutting in and out to the point that my voice would often cut off during a conversation. Needless to say, the occurrence was contributed to the noise from the planes flying overhead. I had to shut my windows and turn on my AC which ended up increasing my personal costs once again and I had to waste valuable energy and resources unnecessarily.

I can no longer sit on my deck to read the newspaper or use a phone or IPAD to watch a news story or entertainment event as the noise level overrides any pleasures. I find myself

trying to schedule my outdoor activities as to when I think the planes will not fly over. This is no way to live. I now characterize myself as a hostage to my home where I have to keep my doors and windows closed, I have to come inside during peak flight times, and I have to now factor in the flight times when I choose to work outdoors in my yard. I have to make an effort to be conscious when I go outside to have a conversation with my neighbors, as I know how frustrating it is to have a conversation where you have to pause often or literally scream on occasions. I am frustrated and angry that I did nothing to deserve this. I pay my taxes and I invested in my home to make my neighborhood better, but I am personally incurring expenses to manage something for which I have come to believe I have no control. I am now beginning to explore how to redirect my investments to make minimal changes so that I can move from a home that I thought would take me through retirement.

My points above illustrate how horrific the situation is for us in North Charlotte. I share this with you to request that public comment is desperately needed so the citizens of Charlotte can have a voice, impact study or otherwise.

A recent meeting attended by Charlotte City Council Representatives and Charlotte Douglas Airport officials, which had limited notification and limited general communication exposure, was attended by 20-25 representatives and filled the room we used. We did not get a chance to voice our concerns and our experiences. We learned a lot but it did nothing to resolve our concerns. We are now asking Charlotte Douglas International Airport, the City Council, the FAA and any and all other parties to hear us and allow us to share our experiences. City forums and meetings are needed to address the problem so that we can ask that issues regarding runway 05/23 be addressed immediately.

I cannot personally wait 5-7 years before the runway is demolished to make way to build another parallel runway which may eliminate my concern. My only hope would be for the City Council, Charlotte Mayor, and the FAA to ask the Charlotte Douglas International Airport begin addressing the building of a new runway sooner than later (1-2 years completion) and shut down runway 05/23 in the interim and use only in an emergency situation.

I personally used the Charlotte Douglas Airport while the runway was shut down for safety reasons and I had no problem departing or arriving in Charlotte. The Airport claims the shutdown reduced their capacity by 11%-12%, but as a user I did not have a negative experience. **A reduction in capacity to satisfy the concerns of the citizens is far more paramount than growing the airport.** To have less noise and no longer having to be a hostage to my home, I will gladly accept a 12% reduction, or even a greater reduction in capacity, including longer time wait experiences both in the airport or the air to have my quality of life back.

Additionally, my understanding is the safety issues regarding the cross directional use of 05/23 runway were never resolved, or if resolved, in a very limited manner that does not provide absolute certainty that a calamity will not occur. The safety risks alone should be

of grave concern to the City, FAA and Airport officials if such a disaster were to occur. Almost 25% of the residents of Charlotte use the Airport, so a serious issue will not only impact the lost of life for individuals across the world given it's International use, but it will also be as significant blow to Charlotte residents and the City of Charlotte. Limiting the use of runway 05/23 to emergency situations not only addresses the safety issues, risk issues, life and death issues but also addresses the noise concerns. **I ask that the FAA via this letter reevaluate their decision and reexamine the situation.**

No life or limb should be weighed against addressing the capacity needs of the Airlines. It is now becoming clear that the needs for the citizens of Charlotte versus the plans for Charlotte Douglas growth are at odds. Many friends and neighbors have expressed concerns that they do not want to see Charlotte Douglas to become Hartsfield, O'Hara, or LaGuardia, SFO, or any other large airport, where capacity needs outweigh the increase in risk and quality of life. Yes, other large airports have the same cross diagonal runway issues but that does not mean we cannot be smarter. We have grown our airport that is significant in size, but to be the best you don't have to be the largest. The Charlotte Douglas Airport has an obligation to the City of Charlotte and its Citizens. We are now to understand the Airport's allegiance is to the Airlines who pay for their services. The City of Charlotte who owns the Airport should now step up to ensure there is a balanced approach and that the Citizens of Charlotte feel they have a voice in its outcome.

I repeat, the concerns expressed herein merits your attention and I request all copied should immediately press for public forums, meetings, and begin immediate actions to address the concerns voiced by the Citizens of Charlotte. **I respectfully request you seek public comment so you can hear our concerns to help bring about noise elimination and return our quality of life we so desperately seek and deserve.**

Charlotte Optimization of Airspace and Procedures in the Metroplex
Early Notification Letter

Dear Lt. Col. Hobbs:

This notification letter is to inform you that the Federal Aviation Administration (FAA) intends to prepare an Environmental Assessment (EA) to consider the potential environmental impacts of the implementation of the Optimization of Airspace and Procedures in the Metroplex (OAPM) in the Charlotte area (CLT OAPM). Attachment 1 is a copy of the Notice that will be published in major newspapers in the Charlotte area (Charlotte, N.C. and Columbia, S.C.) that notifies the general public of the FAA's intent to prepare an EA.

A "Metroplex" is multiple airports in and around a busy metropolitan area. The CLT OAPM would improve the efficiency of the Charlotte Metroplex airspace by optimizing aircraft arrival and departure procedures at a number of airports, including:

- Charlotte/Douglas International Airport
- Charlotte-Monroe Executive Airport
- Concord Regional Airport
- Donaldson Center Airport
- Greenville Downtown Airport
- Greenville Spartanburg International Airport
- Rowan County Airport
- Piedmont Triad International Airport
- Rock Hill (York County) Airport-Bryant Field
- Smith Reynolds Airport
- Spartanburg Downtown Memorial Airport
- Statesville Regional Airport
- Hickory Regional Airport

The project may involve changes in aircraft flight paths and/or altitudes in certain areas, but would not require any ground disturbance or increase the number of aircraft operations within the Charlotte Metroplex airspace area.

To evaluate potential environmental impacts of the CLT OAPM project, the FAA has established a General Study Area to evaluate potential impacts of changes in aircraft routing that are proposed to occur below 10,000 feet above ground level (AGL). Enclosed is a graphic depicting the General Study Area for the environmental review process.

The FAA has begun preparation of the EA and welcomes your input. We are sending this early notification letter for the following reasons:

1. To advise you of the initiation of the EA study;
2. To provide you an opportunity to provide any background information that you may have regarding the study area established for this EA; and
3. To provide you an opportunity to advise the FAA of any issues, concerns, policies or regulations that you may have regarding the environmental analysis that will be undertaken in the EA.

FAA will make a decision as to whether to hold public workshop(s) following publication of the Draft EA. If the decision is to hold public workshop(s), FAA will provide public notice of the public workshop(s) and the availability of the Draft EA at a future date. If applicable, the FAA plans to hold separate consultations with the appropriate Tribal Governments and their designated Tribal Historic Preservation Office in accordance with Executive Order 13175. The appropriate Tribal Governments and their designated Tribal Historic Preservation Office will be determined after the General Study Area is finalized.

FAA is currently working on additional details related to this project, and will be coordinating with the appropriate agencies and tribes in the near future. If you desire to provide comments and/or have any questions about the information provided, please provide them by letter or email, before July 22, 2014, at the following address:

Attachment – Public Notice and General Study Area graphic

**U.S. DEPARTMENT OF TRANSPORTATION
Federal Aviation Administration**

Notice of the Federal Aviation Administration's (FAA) intention to prepare a Draft Environmental Assessment for the Optimization of Airspace and Procedures in the Charlotte Metroplex (CLT OAPM).

SUMMARY: The FAA is issuing this notice to advise the public it intends to prepare a Draft Environmental Assessment (EA) for the CLT OAPM Metroplex, which involves flight procedure optimization for Charlotte/Douglas International Airport (CLT) as well as numerous satellite airports. The EA will be conducted pursuant to the National Environmental Policy Act of 1969 and its implementing Regulations found at Title 40, Code of Federal Regulations, Sections 1500-1508.

The purpose of the proposed CLT OAPM is to improve the efficiency of the controlled airspace (a generic term referring to airspace where air traffic control service is provided) using more current navigation technology called Area Navigation (RNAV). The FAA has not made any decisions about the final content of the EA.

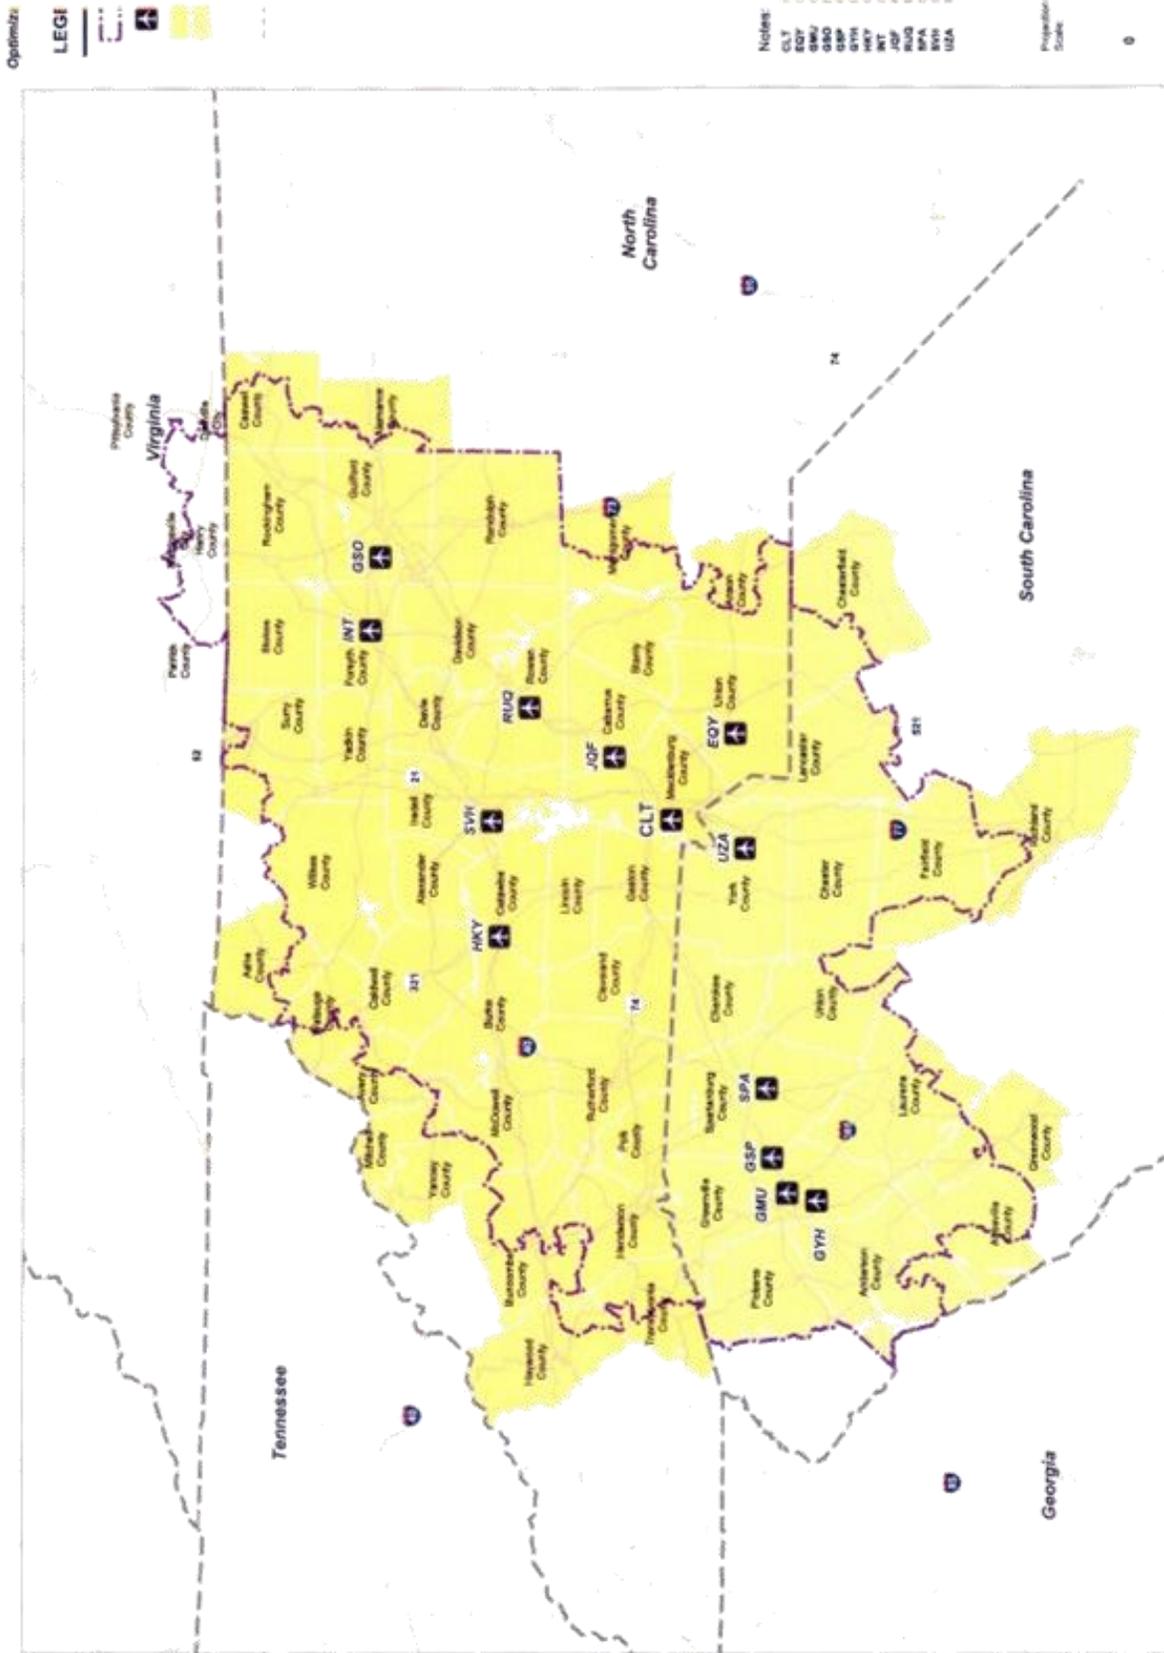

SUPPLEMENTARY INFORMATION:

Air traffic procedures operating in the airspace around Charlotte/Douglas International Airport (CLT) will be evaluated in the draft EA. The current procedures, which are intended to provide an orderly flow of traffic in and out of a busy metropolitan area, are not optimized due to existing airspace configuration and a lack of efficiently designed RNAV procedures. RNAV-based procedures can direct pilots along more direct routes with predictable location and altitude information. A predictable procedure would involve less communication between an air traffic controller and a pilot; therefore reducing workload for both individuals. Optimizing RNAV procedures as well as developing additional new RNAV procedures for the CLT Metroplex would enhance efficient use of the airspace.

Proposed Action

The EA is expected to evaluate at least two alternatives, the No Action and the proposed CLT OAPM alternative (the Proposed Action). The FAA has not finalized the proposed CLT OAPM at this time. The proposed CLT OAPM as it is currently being configured consists of optimizing aircraft routes within the controlled airspace into and out of the CLT Metroplex. The primary components of the proposed CLT OAPM would include:

- **ESTABLISHING UPDATED DEPARTURE ROUTES AND/OR FIXES FROM THE EA AIRPORTS.** Aircraft departing from the EA Airports would transition to the high altitude routes using optimized routes based on RNAV technology.
- **ESTABLISHING UPDATED ARRIVAL ROUTES AND/OR FIXES INTO THE EA AIRPORTS.** Aircraft bound for the EA Airports would use optimized procedures to transition from a high altitude route to an existing approach route.

RE: CLT Metroplex Assessment

Dear Ms. Ashley:

By now you should have received communications from one of my constituents, Mr. Michael Armstrong respectfully requesting that a public comment forum be conducted here in Charlotte, NC for input to the Metroplex Assessment. As the District 4 representative on Charlotte City Council, I also strongly support this request.

In a well-attended community meeting held several weeks ago, residents came to voice their concerns over airline noise affecting their neighborhoods. While the meeting was much appreciated and informative, residents quickly realized that local airport personnel have no real authority to address their concerns, unlike the FAA. Residents have shared stories similar to the one so passionately described by Mr. Armstrong in his letter to you.

As a member of the Charlotte City Council, I am keenly aware of the importance of CLT as a crucial component of our region's growth and economic development. We are proud of our airport, and how it has, and continues to grow over the last 80+ years under the direction of Charlotte City government. All I am asking at this time is that the citizens of Charlotte be given an opportunity to be heard through their collective voices at an open forum in order to provide input to the Metroplex Assessment. I thank you in advance for your consideration of this request.

Sincerely,

A handwritten signature in black ink that reads "Gregory A. Phipps".

Greg Phipps, Council Member

CC: Anthony Foxx, U.S. Secretary of Transportation

Office of the City Council District 4 Gregory A. Phipps

Re: Environmental Assessment
Charlotte Optimization of Airspace and Procedures in the Metroplex
Early Notification Letter

Dear Ms. Ashley:

On June 18, 2014, we received an Early Notification Letter, dated June 11, 2014, for the Environmental Assessment of the Charlotte Optimization of Airspace and Procedures on the Metroplex (CLT OAPM) project. A number of South Carolina counties fall within the General Study Area for this project. *Based on the information provided, I am responding on behalf of the South Carolina Department of Health and Environmental Control, Bureau of Air Quality (Bureau).*

The Bureau is tasked with implementing the Federal Clean Air Act (1990, as amended) in the State of South Carolina. The Bureau is required to ensure compliance with the National Ambient Air Quality Standards (NAAQS) for criteria pollutants. Currently two criteria pollutants are of particular concern in South Carolina:

- **Ozone** – The 2008 8-hour ozone standards (primary and secondary) are currently set at 0.075 parts per million (ppm). The area represented in this proposal is meeting the 2008 ozone standards. The Environmental Protection Agency (EPA) is currently reviewing the 2008 ozone standard and the proposal of a new standard is anticipated.
- **Particulate Matter 2.5** (Particulates 2.5 microns in size and smaller) – The 2012 standard for maximum daily concentration is set at 35 micrograms per cubic meter. The 2012 standard for the maximum annual concentration is set at 12 micrograms per cubic meter. The area represented in this proposal is meeting the 2012 particulate matter 2.5 standards.

Presently the eastern portion of York County has been designated nonattainment for the 2008 8-hour ozone NAAQS. For more information on which areas have been designated nonattainment,

SOUTH CAROLINA DEPARTMENT OF HEALTH AND ENVIRONMENTAL CONTROL
2600 Bull Street • Columbia, SC 29201 • Phone: (803) 898-3432 • www.scdhec.gov

please visit <http://www.epa.gov/oar/oaqps/greenbk>. A project involving a nonattainment area may be subject to prescriptive requirements such as Transportation Conformity or air quality modeling.

The Early Notification Letter states that the Federal Aviation Administration will coordinate with the appropriate agencies regarding the Environmental Assessment. The Bureau is particularly interested in criteria pollutant emissions and the potential for impacts to air quality monitor readings, and would like to receive the results of any air quality modeling associated with the Environmental Assessment.

Any necessary environmental permits for the subject project must be obtained in accordance with applicable state and federal regulations. If applicable, please contact the Bureau of Water at (803) 898-4300 and the Bureau of Land and Waste Management at (803) 898-2000 for input regarding those program areas' assessments of this proposed project.

Thank you for the opportunity to comment on this project. Should you have any further questions or comments concerning this matter, please do not hesitate to contact me at (803) 898-4122 or at robertln@dhec.sc.gov.

Sincerely,

L. Nelson Roberts, Jr., Manager
Air Quality Standards and Assessment Section
SCDHEC Bureau of Air Quality

RE: Section 106 Consultation for the proposed Charlotte Optimization of the Airspace and Procedures in the Metroplex (CLT OAPM) Project

Dear Dr. Cherry:

On June 11, 2014, the FAA sent you a letter providing early notification of the preparation of an Environmental Assessment (EA) for the Charlotte Optimization of the Airspace and Procedures in the Metroplex (CLT OAPM) Project. The CLT OAPM Project is considered an undertaking subject to review under Section 106 of the National Historic Preservation Act of 1966 (NHPA)(16 U.S.C. § 470 et seq.) and its implementing regulations at 35 C.F.R. Part 800. The purpose of this letter is to request further information on potential historic or cultural resources in the project area in advance of a formal invitation to consultation under Section 106 of the NHPA, as well as to invite you to meet to further discuss the project.

Project Description

A Metroplex is a geographic area covering several airports, serving major metropolitan areas. A variety of factors have combined to reduce the efficiency of airspace within the CLT Metroplex. The FAA proposes to optimize the efficiency of aircraft routes and the supporting airspace management structure through the implementation of the CLT OAPM Project. This would entail implementation of RNAV-defined Instrument Flight Procedures that improve upon existing, but less efficient ground-based and/or radar vector procedures.

General Study Area

The General Study Area identified in the EA being prepared for the CLT OAPM Project encompasses areas surrounding the Metroplex airports. These airports include:

- Charlotte/Douglas International Airport
- Charlotte-Monroe Executive Airport
- Greenville Downtown Airport
- Piedmont Triad International Airport (Greensboro)
- Greenville Spartanburg International Airport
- Donaldson Center Airport
- Hickory Regional Airport
- Smith Reynolds Airport
- Concord Regional Airport
- Rowan County Airport

- Spartanburg Downtown Memorial Airport
- Statesville Regional Airport
- Rock Hill (York Co) Airport-Bryant Field

The General Study Area was delineated using flight paths identified with radar data. The General Study Area boundary represents the area where arriving aircraft cross 2010 Census tract boundaries at 7,000 feet above ground level (AGL) and departing aircraft cross at 10,000 feet AGL.

Table 1 lists the historic properties currently listed on the National Register of Historic Places (NRHP) that have been identified within the General Study Area. Historic properties are defined as resources that are currently listed or eligible for listing in the NRHP. The properties identified within the General Study Area are depicted on Exhibit 1. We request that you review the list of historic properties provided in Table 1 and advise us whether there are additional historic resources that should be included for purposes of this analysis.

Definition of Area of Potential Effects

Federal regulations define the Area of Potential Effect (APE) as the geographic area or areas within which an undertaking may directly or indirectly cause alteration in the character or use of historic properties, if any such properties are present. The APE is influenced by the scale and nature of the undertaking and may vary for different kinds of effects caused by the undertaking. For purposes of the CLT OAPM project, the FAA proposes to delineate an APE based on the boundary of the General Study Area.

Proposed Methodology for Determination of Adverse Effects

The FAA proposes to identify potential adverse effects to historic resources by following a two-step process. First, noise exposure levels will be calculated at unique points within the APE representing the locations of the NRHP-listed historic properties provided in Table 1 as well as any additional properties identified based on this request for further information. Second, noise exposure levels will be calculated at points arranged at 0.5 nautical mile intervals on an evenly spaced grid that covers the entire General Study Area. In the event that noise changes meeting the criteria described below are identified at a point on the evenly spaced grid, the area at and around the grid point would be further investigated for the presence of historic properties that are eligible for but not currently listed on the NRHP.

The analysis of potential adverse effects to historic resources will begin with the determination of whether there are changes in noise exposure, measured in decibels (dB), when comparing the Proposed Action with the No Action Alternative, of:

- DNL 1.5 dB in areas exposed to aircraft noise of DNL 65 dB and higher (significant increases);
- DNL 3.0 dB in areas exposed to aircraft noise of between DNL 60 and DNL 64.9 dB (reportable increases); and
- DNL 5.0 dB in areas exposed to aircraft noise of between DNL 45 and DNL 59.9 dB (reportable increases).

If a reportable or significant increase in noise is detected, the FAA would consider further whether the increase would result in an adverse effect on historic properties. Those points with calculated changes described above will be identified as potentially affected properties.

Because of the nature of the CLT OAPM Project, no activities that would require ground disturbance are anticipated. Therefore, the determination of adverse effects would be primarily limited to identification of indirect effects related to diminishing the integrity of a property's location, design, setting, materials, workmanship, feeling, or association.

As a point of reference, there exist tribal resources within the APE. Therefore, the FAA will initiate consultation with the appropriate Tribal Historic Preservation Officers.

CLT OAPM Environmental Assessment

As disclosed above, an EA is currently being prepared under the National Environmental Policy Act (NEPA) for the CLT OAPM Project. All information as required under 35 C.F.R. Part 800 will be included as part of the EA analysis.

Request for Further Information and Concurrence

We request that you please review the attached list of properties, proposed APE, proposed methodology, and potential adverse effects criteria. Based on your review, we would appreciate any additional information you may have pertaining to eligible properties and request your concurrence with our proposed APE definition methodology and potential adverse effects criteria. Should you have any questions, please do not hesitate to contact Ms. Kristi Ashley at Kristi.Ashley@faa.gov or (404) 305-5607.

Sincerely,

Myron A. Jenkins
Manager, Operations Support Group
Eastern Service Center

U.S. Department
of Transportation
**Federal Aviation
Administration**

Air Traffic Organization
Eastern Service Center

1701 Columbia Avenue
College Park, GA 30337

December 1, 2014

The Hon. Joe Wilson
Congressman
District 002
U.S. House of Representatives
1700 Sunset Blvd. (US 378), Suite 1
West Columbia, SC 29169

Example

Reference: Charlotte Optimization of Airspace and Procedures in the Metroplex (CLT OAPM) Draft Environmental Assessment (EA) - Notice of Availability

Dear Congressman Wilson:

This letter is to inform you that the Federal Aviation Administration (FAA) has prepared a Draft Environmental Assessment (EA) to consider the potential environmental impacts of the implementation of the Charlotte Optimization of Airspace and Procedures in the Metroplex (CLT OAPM) project.

A "Metroplex" is a major metropolitan area with multiple airports, where heavy air traffic and environmental constraints combine to hinder efficient aircraft movement. The CLT OAPM project would improve the efficiency of the national airspace system in the Charlotte Metroplex by optimizing aircraft arrival and departure procedures at a number of airports.

The Study Airports include:

- Charlotte/Douglas International Airport
- Charlotte-Monroe Executive Airport
- Concord Regional Airport
- Donaldson Center Airport
- Greenville Downtown Airport
- Greenville Spartanburg International Airport
- Hickory Regional Airport
- Piedmont Triad International Airport
- Rock Hill (York County) Airport-Bryant Field
- Rowan County Airport
- Smith Reynolds Airport
- Spartanburg Downtown Memorial Airport
- Statesville Regional Airport

The project would involve changes in aircraft flight paths and altitudes in certain areas. Specifically, the FAA proposes to publish and implement optimized standard arrival and departure instrument procedures, serving air traffic flows into and out of airports in the Charlotte Metroplex. The proposed action would not require any ground disturbance or increase the number of aircraft operations within the Charlotte Metroplex airspace area. The analysis of potential environmental impacts in the EA was conducted in accordance with FAA Order 1050.1E, *Environmental Impacts: Policies and Procedures*.

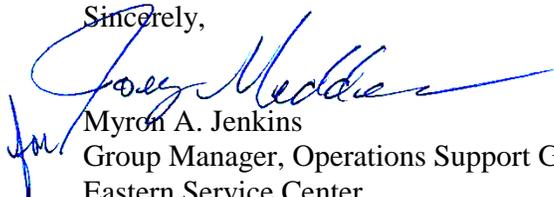

On December 5, 2014, the Draft EA will be released and made publicly available for review and comment. The documents will be available at www.metroplexenvironmental.com.

If you desire to provide comments, please provide them by letter or email before January 5, 2015 to the undersigned at the following address:

Kristi Ashley, Environmental Specialist
Eastern Service Center - Operations Support Group
1701 Columbia Avenue
College Park, GA 30337
9-ASO-ATO-CLTOAPM@faa.gov

FAA would like to thank you for your interest in this project. If you have any questions about the information provided, please feel free to contact me.

Sincerely,

Myron A. Jenkins
Group Manager, Operations Support Group
Eastern Service Center

Attachment: Public Workshop Notice

FAA PUBLIC WORKSHOPS

The FAA invites the public to attend public information workshops for the Draft EA. During the workshops, representatives from the FAA and its Consultant Team will be available to answer questions about the project. The workshops will be open-house format and participants can attend anytime at the times and locations listed below:

NORTH LOCATION December 9, 2014

West Mecklenburg High School Cafeteria
7400 Tuckaseegee Road
Charlotte, NC 28214
5:00PM-8:30PM

SOUTH LOCATION December 10, 2014

Olympic High School Cafeteria
4301 Sandy Porter Road
Charlotte, NC 28273
5:00PM-8:30PM

Those interested in attending the public workshop who have special communication or accommodation needs are encouraged to contact Bill Keller of ATAC Corp. at **(408) 736-2822** at least 2 days prior to the workshop. The workshop locations are ADA compatible. Every reasonable effort to accommodate special needs will be made.

Public Notice: FAA Charlotte Optimization of Airspace and Procedures in the Metroplex (CLT OAPM) Draft Environmental Assessment (EA) Document Release

In accordance with the National Environmental Policy Act (NEPA), the FAA is releasing a Draft Environmental Assessment (EA) that will be available for public review and comment. The EA considers the potential environmental impacts of the implementation of the Charlotte Metroplex Area Optimization of Airspace and Procedures in the Metroplex (CLT OAPM) project.

A “metroplex” is a major metropolitan area with multiple airports, where heavy air traffic and environmental constraints combine to hinder efficient aircraft movement. The CLT OAPM project would improve the efficiency of the national airspace system in the Charlotte Metroplex by optimizing aircraft arrival and departure procedures at a number of airports.

The Study Airports include: Charlotte/Douglas International Airport; Charlotte-Monroe Executive Airport; Concord Regional Airport; Donaldson Center Airport; Greenville Downtown Airport; Greenville Spartanburg International Airport; Piedmont Triad International Airport; Rock Hill (York County) Airport-Bryant Field; Smith Reynolds Airport; Spartanburg Downtown Memorial Airport; Statesville Regional Airport; Rowan County Airport; and Hickory Regional Airport.

The CLT OAPM project would involve changes in aircraft flight paths and altitudes in certain areas. Specifically, the FAA proposes to publish and implement optimized standard arrival and departure instrument procedures, serving air traffic flows into and out of airports in the Charlotte Metroplex. The proposed action would not require any ground disturbance or increase the number of aircraft operations within the Charlotte Metroplex airspace area. The analysis of potential environmental impacts in the EA was conducted in accordance with FAA Order 1050.1E, “Environmental Impacts: Policies and Procedures.”

On December 5, 2014, the Draft EA will be released online at <http://www.metroplexenvironmental.com>. The General Study Area covers areas above and near the Study Airports and involves the airspace above portions of 39 counties in North Carolina, 15 counties in South Carolina, and three counties and two independent cities in Virginia.

The FAA invites the public to attend public information workshops for the Draft EA. During the workshops, representatives from the FAA and its Consultant Team will be available to answer questions about the project. The workshops will be an open-house format and participants can attend any time during the times and locations listed below:

NORTH LOCATION

December 9, 2014

West Mecklenburg High School Cafeteria
7400 Tuckaseegee Road
Charlotte, NC 28214
5:00PM-8:30PM

SOUTH LOCATION

December 10, 2014

Olympic High School Cafeteria
4301 Sandy Porter Road
Charlotte, NC 28273
5:00PM-8:30PM

Those interested in attending the public workshop who have special communication or accommodation needs are encouraged to contact Bill Keller of ATAC Corporation at **(408) 736-2822** at least 2 days prior to the workshop. The workshop locations are ADA compatible. Every reasonable effort to accommodate special needs will be made.

The FAA encourages parties to review the Draft EA and provide written comments during the public comment period. Please be aware that your name, physical address, email address, or other personally identifiable information in your comment may be publicly available at any time. You may include a request to withhold your personal identifying information; however, the FAA cannot guarantee that the FAA will be able to do so. Written comments will be accepted by the FAA via letter until January 5, 2015 to the undersigned at the following physical address:

CHARLOTTE OAPM DRAFT EA
Eastern Service Center-Operations Support Group
1701 Columbia Avenue
College Park, GA 30337

Written comments will be accepted by the FAA via email until January 5, 2015 to the attention of "CHARLOTTE OAPM DRAFT EA" at the following email address:
