Congressman
District 01
U.S. House of Representatives
100 Olde Point Village, Ste. 101
Chester, MD 21619

Reference: Environmental Assessment
Washington D.C. Optimization of Airspace and Procedures in the Metroplex
Early Notification Letter

Dear Congressman Harris:

This notification letter is to inform you that the Federal Aviation Administration (FAA) intends to prepare an Environmental Assessment (EA) to consider the potential environmental impacts of the implementation of the Optimization of Airspace and Procedures in the Metroplex (OAPM) in the Washington DC area (DC OAPM). Attachment 1 is a copy of the Notice that will be published in major newspapers in the Washington DC area (Washington, Baltimore, and Richmond) that notifies the general public of the FAA's intent to prepare an EA.

A "Metroplex" is multiple airports in and around a busy metropolitan area. The DC OAPM would improve the efficiency of the DC Metroplex airspace by optimizing aircraft arrival and departure procedures at a number of airports, including Washington-Dulles International Airport (IAD), Ronald Reagan National Airport (DCA) and Baltimore Washington International Airport (BWI) and Richmond International Airport (RIC). The project may involve changes in aircraft flight paths and/or altitudes in certain areas, but would not require any ground disturbance or increase the number of aircraft operations within the Washington DC Metroplex airspace area.

To evaluate potential environmental impacts of the DC OAPM project, the FAA has established a General Study Area (GSA) to evaluate potential impacts of changes in aircraft routing that are proposed to occur below 10,000 feet above ground level (AGL). Enclosed is a graphic depicting the GSA for the environmental review process.

The FAA has begun preparation of the EA and intends to issue the Draft in late 2013. We welcome your input as we prepare the EA and we are sending this early notification letter for the following reasons:

1. To advise you of the initiation of the EA study;
2. To provide you an opportunity to provide any background information that you may have regarding the study area established for this EA; and
3. To provide you an opportunity to advise the FAA of any issues, concerns, policies or regulations that you may have regarding the environmental analysis that will be undertaken in the EA.

FAA will make a decision as to whether to hold public workshop(s) following publication of the Draft EA. If the decision is to hold public workshop(s), FAA will provide public notice of the public workshop(s) and the availability of the Draft EA at a future date. If applicable, the FAA plans to hold separate consultations with the appropriate Tribal Governments and their designated Tribal Historic Preservation Office in accordance with Executive Order 13175. The appropriate Tribal Governments and their designated Tribal Historic Preservation Office will be determined after the GSA is finalized.

FAA is currently working on additional details related to this project, and will be coordinating with the appropriate agencies and tribes in the near future. If you desire to provide comments and/or have any questions about the information provided, please provide them by letter or email, before January 18, 2013, at the following address:

Barry A. Knight
Manager, Operations Support Group
Eastern Service Center

Attachment – Public Notice and General Study Area graphic

**U.S. DEPARTMENT OF TRANSPORTATION
Federal Aviation Administration**

Notice of the Federal Aviation Administration's (FAA) intention to prepare a Draft Environmental Assessment for the Optimization of Airspace and Procedures in the Washington D.C. Metroplex (DC OAPM).

SUMMARY: The FAA is issuing this notice to advise the public it intends to prepare a Draft Environmental Assessment (EA) for the DC OAPM Metroplex, which involves flight procedure optimization for Washington-Dulles International Airport (IAD), Ronald Reagan National Airport (DCA), Baltimore Washington International Airport (BWI), Richmond International Airport (RIC) as well as numerous satellite airports. The EA will be conducted pursuant to the National Environmental Policy Act of 1969 and its implementing Regulations found at Title 40, Code of Federal Regulations, Sections 1500-1508.

The purpose of the proposed DC OAPM is to improve the efficiency of the controlled airspace (a generic term referring to airspace where air traffic control service is provided) using more current navigation technology called Area Navigation (RNAV). The FAA has not made any decisions about the final content of the EA.

SUPPLEMENTARY INFORMATION:

Air traffic procedures operating in the airspace near Washington-Dulles International Airport (IAD), Ronald Reagan National Airport (DCA), Baltimore Washington International Airport (BWI), and Richmond International Airport (RIC), (the major EA Airports), will be evaluated in the draft EA. The current procedures, which are intended to provide an orderly flow of traffic in and out of a busy metropolitan area, are dependent upon navigational aids on the ground and/or air traffic controller issued radar vectors. Ground-based navigational aids have limited capabilities, which dictate the location of a route in/out of the airspace. Radar vectors involve multiple communication transmissions between an air traffic controller and a pilot. RNAV technology is not limited to ground-based navigational aids and not subject to the same limitations. Therefore, RNAV-based procedures can direct pilots along more direct routes with predictable location and altitude information. A predictable procedure would involve less communication between an air traffic controller and a pilot; therefore reducing workload for both individuals. The application of RNAV technology for the DC Metroplex would enhance efficient use of the airspace.

Proposed Action

The EA is expected to evaluate at least two alternatives, the No Action and the proposed DC OAPM alternative (the Proposed Action). The FAA has not finalized the proposed DC OAPM at this time. The proposed DC OAPM as it is currently being configured consists of optimizing aircraft routes within the controlled airspace into and out of the DC Metroplex. The primary components of the proposed DC OAPM would include:

- **ESTABLISHING UPDATED DEPARTURE ROUTES AND/OR FIXES FROM THE EA AIRPORTS.** Aircraft departing from the EA Airports would transition to the high altitude routes using optimized routes based on RNAV technology.

- **ESTABLISHING UPDATED ARRIVAL ROUTES AND/OR FIXES INTO THE EA AIRPORTS.** Aircraft bound for the EA Airports would use optimized procedures to transition from a high altitude route to an existing approach route.

Implementation of the proposed DC OAPM is not anticipated to increase the number of aircraft operations at IAD, DCA, BWI, RIC, or satellite airports, or involve physical construction of any facilities.

General Study Area

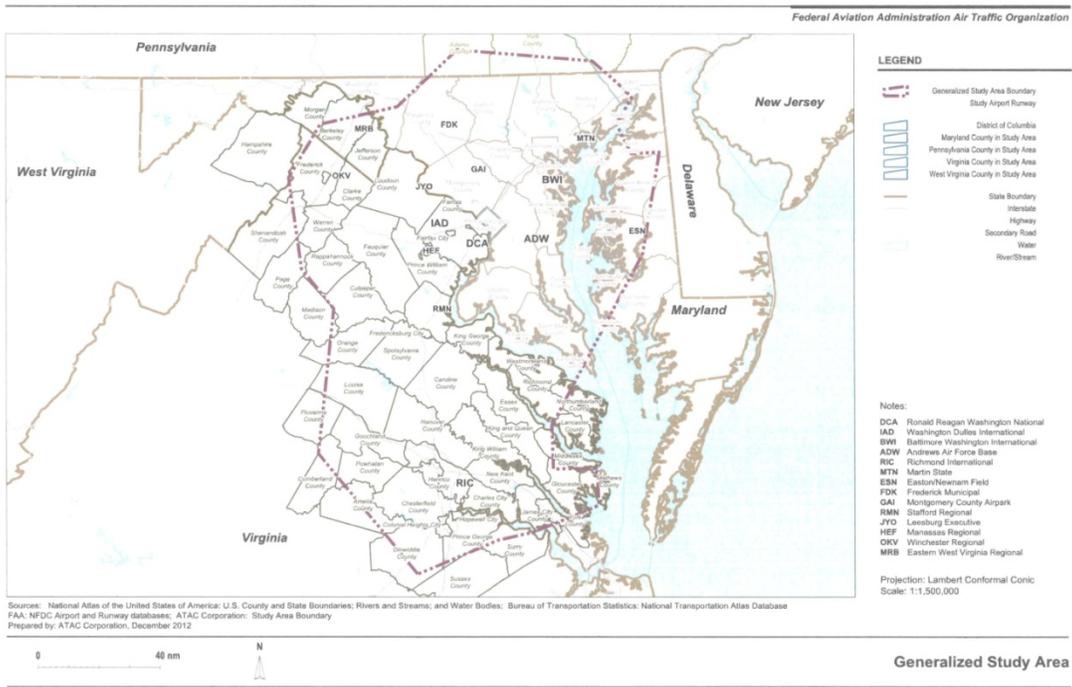

Using radar data for the EA study airports and the initial proposed design changes, the FAA has identified a general study area in which changes to aircraft routing would occur as a result of the Proposed Action.

The general study area will be used to evaluate and compare the potential impacts of the Proposed Action and reasonable alternatives. This evaluation will occur where departing aircraft are anticipated to be at altitudes below 10,000 feet above ground level (AGL) and arriving aircraft at altitudes below 7,000 feet AGL under the Proposed or the No Action alternative. The FAA may also consider traffic flying over tribal lands, national parks or national wildlife refuges below 18,000 feet AGL to evaluate and compare the potential impacts of the Proposed Action and the No Action alternative.

PUBLIC WORKSHOPS

FAA will make a decision as to whether to hold public workshop(s) following publication of the Draft EA. If the decision is to hold public workshop(s), FAA will provide public notice of the public workshop(s) and the availability of the Draft EA at a future date.

LEGAL NOTICES

**U.S. DEPARTMENT OF TRANSPORTATION
Federal Aviation Administration**

Notice of the Federal Aviation Administration's (FAA) intention to prepare a Draft Environmental Assessment for the Optimization of Airspace and Procedures in the Washington D.C. Metroplex (DC OAPM).

SUMMARY: The FAA is issuing this notice to advise the public it intends to prepare a Draft Environmental Assessment (EA) for the DC OAPM Metroplex, which involves flight procedure optimization for Washington-Dulles International Airport (IAD), Ronald Reagan National Airport (DCA), Baltimore Washington International Airport (BWI), Richmond International Airport (RIC) as well as numerous satellite airports. The EA will be conducted pursuant to the National Environmental Policy Act of 1969 and its implementing Regulations found at Title 40, Code of Federal Regulations, Sections 1500-1508.

The purpose of the proposed DC OAPM is to improve the efficiency of the controlled airspace (a generic term referring to airspace where air traffic control service is provided) using more current navigation technology called Area Navigation (RNAV). The FAA has not made any decisions about the final content of the EA.

SUPPLEMENTARY INFORMATION:

Air traffic procedures operating in the airspace near Washington-Dulles International Airport (IAD), Ronald Reagan National Airport (DCA), Baltimore Washington International Airport (BWI), and Richmond International Airport (RIC), (the major EA Airports) will be evaluated in the draft EA. The current procedures, which are intended to provide an orderly flow of traffic in and out of a busy metropolitan area, are dependent upon navigational-aids on the ground and/or air traffic controller issued radar vectors. Ground-based navigational aids have limited capabilities, which dictate the location of a route in/out of the airspace. Radar vectors involve multiple communication transmissions between an air traffic controller and a pilot. RNAV technology is not limited to ground-based navigational aids and not subject to the same limitations. Therefore, RNAV-based procedures can direct pilots along more direct routes with predictable location and altitude information. A predictable procedure would involve less communication between an air traffic controller and a pilot, therefore reducing workload for both individuals. The application of RNAV technology for the DC Metroplex would enhance efficient use of the airspace.

Proposed Action

The EA is expected to evaluate at least two alternatives, the No Action and the proposed DC OAPM alternative (the Proposed Action). The FAA has not finalized the proposed DC OAPM at this time. The proposed DC OAPM as it is currently being configured consists of optimizing aircraft routes within the controlled airspace into and out of the DC Metroplex. The primary components of the proposed DC OAPM would include:

ESTABLISHING UPDATED DEPARTURE ROUTES AND/OR FIXES FROM THE EA AIRPORTS. Aircraft departing from the EA Airports would transition to the high altitude routes using optimized routes based on RNAV technology.

ESTABLISHING UPDATED ARRIVAL ROUTES AND/OR FIXES INTO THE EA AIRPORTS. Aircraft bound for the EA Airports would use optimized procedures to transition from a high altitude route to an existing approach route.

Implementation of the proposed DC OAPM is not anticipated to increase the number of aircraft operations at IAD, DCA, BWI, RIC or satellite airports or involve physical construction of any facilities.

General Study Area

Using radar data for the EA study airports and the initial proposed design changes, the FAA has identified a general study area in which changes to aircraft routing would occur as a result of the Proposed Action.

The general study area will be used to evaluate and compare the potential impacts of the Proposed Action and reasonable alternatives. This evaluation will occur where departing aircraft are anticipated to be at altitudes below 10,000 feet above ground level (AGL) and arriving aircraft at altitudes below 7,000 feet AGL under the Proposed or the No Action alternative. The FAA may also consider traffic flying over tribal lands, national parks or national wildlife refuges below 18,000 feet AGL to evaluate and compare the potential impacts of the Proposed Action and the No Action alternative.

PUBLIC WORKSHOPS

FAA will make a decision as to whether to hold public workshops following publication of the draft EA. If the decision is to hold public workshop(s), FAA will provide public notice of the public workshop(s) and the availability of the Draft EA at a future date.

Federal Aviation Administration**

Notice of the Federal Aviation Administration's (FAA) intention to prepare a Draft Environmental Assessment for the Optimization of Airspace and Procedures in the Washington D.C. Metroplex (DC OAPM).

SUMMARY: The FAA is issuing this notice to advise the public it intends to prepare a Draft Environmental Assessment (EA) for the DC OAPM Metroplex, which involves flight procedure optimization for Washington-Dulles International Airport (IAD), Ronald Reagan National Airport (DCA), Baltimore Washington International Airport (BWI), Richmond International Airport (RIC) as well as numerous satellite airports. The EA will be conducted pursuant to the National Environmental Policy Act of 1969 and its implementing Regulations found at Title 40, Code of Federal Regulations, Sections 1500-1508.

The purpose of the proposed DC OAPM is to improve the efficiency of the controlled airspace (a generic term referring to airspace where air traffic control service is provided) using more current navigation technology called Area Navigation (RNAV). The FAA has not made any decisions about the final content of the EA.

SUPPLEMENTARY INFORMATION:

Air traffic procedures operating in the airspace near Washington-Dulles International Airport (IAD), Ronald Reagan National Airport (DCA), Baltimore Washington International Airport (BWI), and Richmond International Airport (RIC), (the major EA Airports), will be evaluated in the draft EA. The current procedures, which are intended to provide an orderly flow of traffic in and out of a busy metropolitan area, are dependent upon navigational aids on the ground and/or air traffic controller issued radar vectors. Ground-based navigational aids have limited capabilities, which dictate the location of a route in/out of the airspace. Radar vectors involve multiple communication transmissions between an air traffic controller and a pilot. RNAV technology is not limited to ground-based navigational aids and not subject to the same limitations. Therefore, RNAV-based procedures can direct pilots along more direct routes with predictable location and altitude information. A predictable procedure would involve less communication between an air traffic controller and a pilot; therefore reducing workload for both individuals. The application of RNAV technology for the DC Metroplex would enhance efficient use of the airspace.

Proposed Action

The EA is expected to evaluate at least two alternatives, the No Action and the proposed DC OAPM alternative (the Proposed Action). The FAA has not finalized the proposed DC OAPM at this time. The proposed DC OAPM as it is currently being configured consists of optimizing aircraft routes within the controlled airspace into and out of the DC Metroplex. The primary components of the proposed DC OAPM would include:

- **ESTABLISHING UPDATED DEPARTURE ROUTES AND/OR FIXES FROM THE EA AIRPORTS.** Aircraft departing from the EA Airports would transition to the high altitude routes using optimized routes based on RNAV technology.
- **ESTABLISHING UPDATED ARRIVAL ROUTES AND/OR FIXES INTO THE EA AIRPORTS.** Aircraft bound for the EA Airports would use optimized procedures to transition from a high altitude route to an existing approach route.

Implementation of the proposed DC OAPM is not anticipated to increase the number of aircraft operations at IAD, DCA, BWI, RIC or satellite airports or involve physical construction of any facilities.

General Study Area

Using radar data for the EA study airports and the initial proposed design changes, the FAA has identified a general study area in which changes to aircraft routing would occur as a result of the Proposed Action.

The general study area will be used to evaluate and compare the potential impacts of the Proposed Action and reasonable alternatives. This evaluation will occur where departing aircraft are anticipated to be at altitudes below 10,000 feet above ground level (AGL) and arriving aircraft at altitudes below 7,000 feet AGL under the Proposed or the No Action alternative. The FAA may also consider traffic flying over tribal lands, national parks or national wildlife refuges below 18,000 feet AGL to evaluate and compare the potential impacts of the Proposed Action and the No Action alternative.

PUBLIC WORKSHOPS

FAA will make a decision as to whether to hold public workshop(s) following publication of the Draft EA. If the decision is to hold public workshop(s), FAA will provide public notice of the public workshop(s) and the availability of the Draft EA at a future date.

RE: BHP ER # 2013-0647-042-A
Environmental Assessment
Washington D.C. Optimization of Airspace and Procedures in the Metroplex
Early Notification Letter

Dear Mr. Kyker:

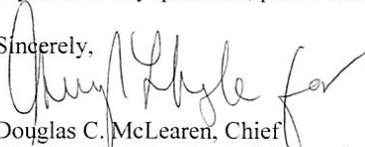

Thank you for submitting information concerning the above referenced project. The Bureau for Historic Preservation (the State Historic Preservation Office) reviews projects in accordance with state and federal laws. Section 106 of the National Historic Preservation Act of 1966, and the implementing regulations (36 CFR Part 800) of the Advisory Council on Historic Preservation, is the primary federal legislation. The Environmental Rights amendment, Article 1, Section 27 of the Pennsylvania Constitution and the Pennsylvania History Code, 37 Pa. Cons. Stat. Section 500 *et seq.* (1988) is the primary state legislation. These laws include consideration of the project's potential effects on both historic and archaeological resources.

Thank you for the early notification letter. We wanted to let you know that our Pennsylvania Cultural Resources Geographic Information System (<http://phmc.info/pagris>) is a map-based inventory of the historic and archaeological sites and surveys stored in our files. In addition, we have included a Data Request form if the information from the CRGIS cannot be used for your project.

We look forward to working with you!

If you have any questions, please contact Cheryl L. Nagle at 717-772-4519 or chnagle@pa.gov.

Sincerely,

Douglas C. McLearn, Chief
Division of Archaeology & Protection

Re: Environmental Assessment
Washington D.C. Optimization of Airspace and Procedures in the Metroplex
Early Notification Letter

Dear Ms. Kyker:

I am the Airport Manager for the Hanover County Airport (KOFK) located in Virginia approximately 13.4 NM Northwest of the Richmond International Airport (KRIC). The airport has over 100 based aircraft and currently has published instrument approaches to Runway 16.

I have received a copy of Mr. Barry Knight's December 19, 2012 letter to Mr. Robert Crum of the Richmond Regional Planning District Commission, advising of plans for an Environmental Assessment for Optimization of Airspace and Procedures in the Metroplex (OAPM) in the Washington D.C. area (DC OAPM).

As requested, I wanted to make sure you were aware of plans to activate Instrument Approaches to Runway 34 (in addition to 16) within the next year.

We currently have several active FAA grant projects for Airspace Obstruction Removal and expect to have required surfaces cleared for activation of the approaches before the end of the year.

Hanover: People, Tradition and Spirit

I have attached copies of the planned Runway 34 approaches for KOFB and since they bring aircraft over top of the Richmond International Airport, should be included for consideration when performing the Environmental Assessment mentioned above.

Please feel free to contact me directly by phone: (804)-365-6208 or Email: rhempe@hanovercounty.gov if you have questions or require any further information or documentation.

Sincerely,

Richard Henry Rempe
Airport Manager

Washington D.C. Optimization of Airspace and Procedures in the Metroplex
Early Notification Letter

MD

Dear Mr. Little:

This notification letter is to inform you that the Federal Aviation Administration (FAA) intends to prepare an Environmental Assessment (EA) to consider the potential environmental impacts of the implementation of the Optimization of Airspace and Procedures in the Metroplex (OAPM) in the Washington DC area (DC OAPM). Attachment 1 is a copy of the Notice that will be published in major newspapers in the Washington DC area (Washington, Baltimore, and Richmond) that notifies the general public of the FAA's intent to prepare an EA.

A "Metroplex" is multiple airports in and around a busy metropolitan area. The DC OAPM would improve the efficiency of the DC Metroplex airspace by optimizing aircraft arrival and departure procedures at a number of airports, including Washington-Dulles International Airport (IAD), Ronald Reagan National Airport (DCA) and Baltimore Washington International Airport (BWI) and Richmond International Airport (RIC). The project may involve changes in aircraft flight paths and/or altitudes in certain areas, but would not require any ground disturbance or increase the number of aircraft operations within the Washington DC Metroplex airspace area.

To evaluate potential environmental impacts of the DC OAPM project, the FAA has established a General Study Area (GSA) to evaluate potential impacts of changes in aircraft routing that are proposed to occur below 10,000 feet above ground level (AGL). Enclosed is a graphic depicting the GSA for the environmental review process.

The Maryland Historical Trust has determined that there are no historic properties affected by this undertaking.

[Signature] Date 1/14/13

16
ARCA

The FAA has begun preparation of the EA and intends to issue the Draft in late 2013. We welcome your input as we prepare the EA and we are sending this early notification letter for the following reasons:

1. To advise you of the initiation of the EA study;
2. To provide you an opportunity to provide any background information that you may have regarding the study area established for this EA; and
3. To provide you an opportunity to advise the FAA of any issues, concerns, policies or regulations that you may have regarding the environmental analysis that will be undertaken in the EA.

FAA will make a decision as to whether to hold public workshop(s) following publication of the Draft EA. If the decision is to hold public workshop(s), FAA will provide public notice of the public workshop(s) and the availability of the Draft EA at a future date. If applicable, the FAA plans to hold separate consultations with the appropriate Tribal Governments and their designated Tribal Historic Preservation Office in accordance with Executive Order 13175. The appropriate Tribal Governments and their designated Tribal Historic Preservation Office will be determined after the GSA is finalized.

FAA is currently working on additional details related to this project, and will be coordinating with the appropriate agencies and tribes in the near future. If you desire to provide comments and/or have any questions about the information provided, please provide them by letter or email, before January 18, 2013, at the following address:

Re: Aircraft flight changes
FR#: 13-205-MU

Dear Mr. Knight:

We have reviewed the above mentioned project to determine its effects to cultural resources. As required by Section 106 of the National Historic Preservation Act of 1966, as amended, and its implementing regulations, 36 CFR 800: "Protection of Historic Properties," we submit our comments.

According to submitted information, the Federal Aviation Administration (FAA) will prepare an Environmental Assessment (EA) to consider the environmental impacts of the implementation of new procedures designed to optimize airspace in the Washington, DC, metro area. The project may involve changes in current flight path and/or altitudes in particular areas. Submitted information states that this project will involve no ground disturbing activities. You have requested that we advise the FAA of any issues or concerns that we might have regarding the environmental analysis that will be part of the EA.

The Generalized Study Area map included with the submission indicates that the flight paths will include Berkeley, Morgan, and Hampshire Counties. Please be advised that there are numerous National Register and eligible properties within all three counties. We request that any EA include an auditory analysis of the potential impact of this project on those areas within the flight path that contain National Register or eligible resources. In addition, if there are National Register or eligible resources that are within the area of potential effect (APE) for the project, we request that you contact local organizations for their input on the EA. A list of local Historic Landmarks Commissions can be accessed on-line at http://www.wvculture.org/shpo/hlc_list.html. We look forward to reviewing the EA and will provide additional comments upon its receipt, or as requested from your agency.

We appreciate the opportunity to be of service. *If you have questions regarding our comments or the Section 106 process, please contact Shirley Stewart Burns, Structural Historian, at (304) 558-0240.*

Sincerely,

Susan M. Pierce

Dear Mr. Kyker:

SUBJECT: Environmental Assessment (EA), Washington D.C. Optimization of Airspace and Procedures in the Metroplex, Early Notification Letter

Thank you for your letter to Governor Martin O'Malley regarding the EA for Washington D.C. Optimization of Airspace and Procedures in the Metroplex, Early Notification Letter. The Governor received your letter and asked me to respond on his behalf.

The Maryland Department of Transportation (MDOT) looks forward to assisting in the Federal Aviation Administration's efforts. MDOT understands that your office has been working directly with representatives of the Maryland Aviation Administration (MAA), a modal agency of MDOT and the owner and operator of Baltimore/Washington International Thurgood Marshall Airport (BWI Marshall), to obtain information that will assist you in the preparation of the EA.

As BWI Marshall is within your General Study Area, we would encourage continued coordination with MAA as you move through the EA process. Please direct correspondence and communication of the EA efforts to Mr. Paul L. Shank, P.E., C.M., Chief Engineer, MAA. Mr. Shank can be reached at 410-859-7061 or by email at pshank@bwiairport.com.

Thank you, again, for your letter. The Governor appreciates hearing from you, and on his behalf, I also thank you for your interest in these issues.

Sincerely,

Darrell B. Mobley
Acting Secretary

MEMORANDUM

DATE: January 22, 2013
TO: Lee Kyker, FAA
FROM: Roberta Rhur, Environmental Impact Review Coordinator
SUBJECT: DCR 13-001, Optimization of Airspace and Procedures in the Metroplex

Division of Natural Heritage

The Department of Conservation and Recreation's Division of Natural Heritage (DCR) has searched its Biotics Data System for occurrences of natural heritage resources from the area outlined on the submitted map. Natural heritage resources are defined as the habitat of rare, threatened, or endangered plant and animal species, unique or exemplary natural communities, and significant geologic formations.

Biotics documents the presence of natural heritage resources in the project area. However, due to the scope of the activity and the distance to the resources, we do not anticipate that this project will adversely impact these natural heritage resources.

Cumberland Marsh, Chotank Creek, Bull Run Mountains, Elklick Woodlands, Ogdens cave and Crows Nest State Natural Area Preserves are in the project vicinity, however, we do not anticipate any adverse effects to the Natural Area Preserve and associated resources due to the project scope and location.

Under a Memorandum of Agreement established between the Virginia Department of Agriculture and Consumer Services (VDACS) and the DCR, DCR represents VDACS in comments regarding potential impacts on state-listed threatened and endangered plant and insect species. The current activity will not affect any documented state-listed plants or insects.

New and updated information is continually added to Biotics. Please contact DCR for an update on this natural heritage information if a significant amount of time passes before it is utilized.

The Virginia Department of Game and Inland Fisheries (VDGIF) maintains a database of wildlife locations, including threatened and endangered species, trout streams, and anadromous fish waters that may contain information not documented in this letter. Their database may be accessed from <http://vafwis.org/fwis/> or contact Gladys Cason (804-367-0909 or Gladys.Cason@dgif.virginia.gov).

*State Parks • Stormwater Management • Natural Heritage • Outdoor Recreation Planning
Dam Safety and Floodplain Management • Land Conservation*

The remaining DCR divisions have no comments regarding the scope of this project. Thank you for the opportunity to comment.

Dear Mr. Kyker,

On December 27, 2012, the Virginia Department of Historic Resources received information on the above referenced project. We understand that an Environmental Assessment will be prepared. We request that the FAA or its agents consult directly with DHR, as necessary, pursuant to Section 106 of the National Historic Preservation Act (as amended) and its implementing regulations codified at 36 CFR Part 800 which require Federal agencies to consider the effects of their undertakings on historic properties.

Dear Mr. Kyker:

We are in receipt of The Early Notification Letter, informing the Calvert County Board of Commissioners that the Federal Aviation Administration intends to prepare an Environmental Assessment (EA), to consider the potential environmental impacts for the implementation of the Optimization of Airspace and Procedures in the Metroplex in the Washington DC area.

We appreciate your advising us of the initiation of the EA study and the opportunity to provide any background information that we may have regarding the study area established for this EA. Calvert County has several private airstrips, however, it is our understanding that they will not be affected by the FAA Environmental Assessment.

Thank you for the opportunity to provide you with any issues, concerns, policies, or regulations we may have regarding the environmental analysis that will be undertaken in the EA; we have none at this time.

We look forward to being notified in the future as this Environmental Assessment proceeds. If you have any further questions, you may contact Patricia Haddon of the Department of Community Planning and Building, at 410-535-1600, extension 2631 or haddonpj@co.cal.md.us.

Sincerely,

STATE CLEARINGHOUSE REVIEW – ADVERSE COMMENTS RECEIVED

State Application Identifier: MD20130103-0002

New Reply Due Date: 03/11/2013

Project Description: Notification/Scoping prior to Environmental Assessment: Washington D.C. Optimization of
Airspace and Procedures in the Metroplex: update departure and arrival routes:
consider two alternatives including "no action"

Project Location: States of Maryland, Pennsylvania, Virginia and West Virginia; and the District of Columbia
Clearinghouse Contact: Bob Rosenbush

Dear M' Kyker:

The State Clearinghouse received these comments regarding the referenced project from Howard County.

Howard County indicated that the proposal lacks coordination and consideration for Howard County's current land use plans and zoning and the impact that a change in flight plans may have on these ordinances. There appears to be no process for considering future citizen input, including citizen concerns, to the (review) process or consideration of the impact of potential changes in noise contour maps. There appears to be no coordination with the Baltimore and Washington Metropolitan Planning Organizations, the Maryland Department of Transportation, or the Maryland Aviation Administration (a modal administration of the Maryland Department of Transportation). Given the concerns provided above, there is concern that, by omission, the Federal Aviation Administration's proposal may not be consistent with Howard County plans and objectives. Consideration of the comments will require an extension of the initial review period. The new reply date is noted above.

We encourage you to make an effort to provide clarifying information or resolve conflicting concerns. You may consult directly with the commenting party. Please send a copy of any correspondence between you and the reviewing agency. Upon request, the Clearinghouse can provide assistance to resolve conflicting concerns.

The Clearinghouse requests a response to the enclosed comments by March 11, 2013 to allow us to expeditiously conclude this review. Your cooperation and attention to the review process is appreciated. Should you have any questions, contact the State Clearinghouse staff person noted above at 410-767-4490 or through e-mail at brosenbush@mdp.state.md.us. Your cooperation and attention to the review process is appreciated

Sincerely,

Linda C. Janey, J.D., Assistant Secretary

STATE CLEARINGHOUSE REVIEW - SUMMARY OF REVIEWER COMMENTS RECEIVED THROUGH MARCH 15, 2013

State Application Identifier: MD20130103-0002

Project Description: Notification/Scoping prior to Environmental Assessment: Washington D.C. Optimization of Airspace and Procedures in the Metroplex: update departure and arrival routes: consider two alternatives including "no action"

Project Location: States of Maryland, Pennsylvania, Virginia, and West Virginia; and the District of Columbia
Clearinghouse Contact: Bob Rosenbush

Dear M' Kyker:

We are forwarding comments made by the Counties of Charles, Howard, Talbot, and Prince George's, and the Maryland Department of Planning, including the Maryland Historical Trust regarding the referenced project for your information.

Charles County commented that during the Environmental Assessment process, it is recommended to coordinate with the following military facilities that are located in Charles County: Blossom Point Research Facility, in Welcome, MD; and Naval Support Facility, in Indian Head, MD. Will Maryland Airport be included in the study? The Applicant may wish to contact: Ms. Amy M. Blessinger, Planner III, phone: 301-645-0650, BlessingA@charlescounty.org and/or Mr. Frank W. Ward, Chief-Codes, Permits and Inspection Services, phone: 301-645-0607, WardF@charlescounty.org

Howard County indicated that the proposal lacks coordination and consideration for Howard County's current land use plans and zoning and the impact that a change in flight plans may have on these ordinances. There appears to be no process for considering future citizen input, including citizen concerns, to the (review) process or consideration of the impact of potential changes in noise contour maps. There appears to be no coordination with the Baltimore and Washington Metropolitan Planning Organizations, the Maryland Department of Transportation, or the Maryland Aviation Administration (a modal administration of the Maryland Department of Transportation). Given the concerns provided above, there is concern that, by omission, the Federal Aviation Administration's proposal may not be consistent with Howard County plans and objectives.

Prince George's County suggested the inclusion of the Andrews Air Force Base in the Environmental Assessment. Andrews Air Force Base is in the Generalized Study Area maps, but not mentioned or discussed in the body of this Notification/Scoping letter.

Martin O'Malley, Governor
Anthony G. Brown, Lt. Governor

Richard Eberhart Hall, AICP, Secretary
Matthew J. Power, Deputy Secretary

M' Lee Kyker
March 5, 2013
Page 2
State Application Identifier #: MD20130103-0002

Talbot County mentioned that it seeks an opportunity to review and comment on the proposed arrival and departure paths in an appropriate venue.

The Maryland Department of Planning mentioned that coordination with local comprehensive plans, zoning and noise ordinances should be considered for all affected counties.

The Maryland Historical Trust determined that this project will have no effect on historic properties.

Should you have any questions, contact the State Clearinghouse staff person noted above at 410-767-4490 or through e-mail at brosenbush@mdp.state.md.us. Your cooperation and attention to the review process is appreciated.

Sincerely

Linda C. Janey, J.D., Assistant Secretary

Dear Mr. Lee Kyker

you are listed as the contact for the OAPM EA for the DC Metroplex area. Have you completed the EA, and may I have a copy?

I am a homeowner in both the SFO metroplex area, and in New York City, and i am working with a New York group, on noise.

thank you for your help

EXAMPLE

The Hon. John Delaney
Congressman
District 06
U.S. House of Representatives
9801 Washingtonian Blvd, Ste. 330
Gaithersburg, MD 20878

Reference: Environmental Assessment
Washington D.C. Optimization of Airspace and Procedures in the Metroplex
Early Notification Letter

Dear Congressman Delaney:

This notification letter is to inform you that the Federal Aviation Administration (FAA) intends to prepare an Environmental Assessment (EA) to consider the potential environmental impacts of the implementation of the Optimization of Airspace and Procedures in the Metroplex (OAPM) in the Washington DC area (DC OAPM). Attachment 1 is a copy of the Notice that will be published in major newspapers in the Washington DC area (Washington, Baltimore, and Richmond) that notifies the general public of the FAA's intent to prepare an EA.

A "Metroplex" is multiple airports in and around a busy metropolitan area. The DC OAPM would improve the efficiency of the DC Metroplex airspace by optimizing aircraft arrival and departure procedures at a number of airports, including Washington-Dulles International Airport (IAD), Ronald Reagan National Airport (DCA) and Baltimore Washington International Airport (BWI) and Richmond International Airport (RIC). The project may involve changes in aircraft flight paths and/or altitudes in certain areas, but would not require any ground disturbance or increase the number of aircraft operations within the Washington DC Metroplex airspace area.

To evaluate potential environmental impacts of the DC OAPM project, the FAA has established a General Study Area (GSA) to evaluate potential impacts of changes in aircraft routing that are proposed to occur below 10,000 feet above ground level (AGL). Enclosed is a graphic depicting the GSA for the environmental review process.

The FAA has begun preparation of the EA and intends to issue the Draft in late 2013. We welcome your input as we prepare the EA and we are sending this early notification letter for the following reasons:

1. To advise you of the initiation of the EA study;
2. To provide you an opportunity to provide any background information that you may have regarding the study area established for this EA; and
3. To provide you an opportunity to advise the FAA of any issues, concerns, policies or regulations that you may have regarding the environmental analysis that will be undertaken in the EA.

FAA will make a decision as to whether to hold public workshop(s) following publication of the Draft EA. If the decision is to hold public workshop(s), FAA will provide public notice of the public workshop(s) and the availability of the Draft EA at a future date. If applicable, the FAA plans to hold separate consultations with the appropriate Tribal Governments and their designated Tribal Historic Preservation Office in accordance with Executive Order 13175. The appropriate Tribal Governments and their designated Tribal Historic Preservation Office will be determined after the GSA is finalized.

FAA is currently working on additional details related to this project, and will be coordinating with the appropriate agencies and tribes in the near future. If you desire to provide comments and/or have any questions about the information provided, please provide them by letter or email, before April 24, 2013, at the following address:

Attn: Lee Kyker

Sincerely,

Barry A. Knight
Manager, Operations Support Group
Eastern Service Center

Attachment – Public Notice and General Study Area graphic

**U.S. DEPARTMENT OF TRANSPORTATION
Federal Aviation Administration**

Notice of the Federal Aviation Administration's (FAA) intention to prepare a Draft Environmental Assessment for the Optimization of Airspace and Procedures in the Washington D.C. Metroplex (DC OAPM).

SUMMARY: The FAA is issuing this notice to advise the public it intends to prepare a Draft Environmental Assessment (EA) for the DC OAPM Metroplex, which involves flight procedure optimization for Washington-Dulles International Airport (IAD), Ronald Reagan National Airport (DCA), Baltimore Washington International Airport (BWI), Richmond International Airport (RIC) as well as numerous satellite airports. The EA will be conducted pursuant to the National Environmental Policy Act of 1969 and its implementing Regulations found at Title 40, Code of Federal Regulations, Sections 1500-1508.

The purpose of the proposed DC OAPM is to improve the efficiency of the controlled airspace (a generic term referring to airspace where air traffic control service is provided) using more current navigation technology called Area Navigation (RNAV). The FAA has not made any decisions about the final content of the EA.

SUPPLEMENTARY INFORMATION:

Air traffic procedures operating in the airspace near Washington-Dulles International Airport (IAD), Ronald Reagan National Airport (DCA), Baltimore Washington International Airport (BWI), and Richmond International Airport (RIC), (the major EA Airports), will be evaluated in the draft EA. The current procedures, which are intended to provide an orderly flow of traffic in and out of a busy metropolitan area, are dependent upon navigational aids on the ground and/or air traffic controller issued radar vectors. Ground-based navigational aids have limited capabilities, which dictate the location of a route in/out of the airspace. Radar vectors involve multiple communication transmissions between an air traffic controller and a pilot. RNAV technology is not limited to ground-based navigational aids and not subject to the same limitations. Therefore, RNAV-based procedures can direct pilots along more direct routes with predictable location and altitude information. A predictable procedure would involve less communication between an air traffic controller and a pilot; therefore reducing workload for both individuals. The application of RNAV technology for the DC Metroplex would enhance efficient use of the airspace.

Proposed Action

The EA is expected to evaluate at least two alternatives, the No Action and the proposed DC OAPM alternative (the Proposed Action). The FAA has not finalized the proposed DC OAPM at this time. The proposed DC OAPM as it is currently being configured consists of optimizing aircraft routes within the controlled airspace into and out of the DC Metroplex. The primary components of the proposed DC OAPM would include:

- **ESTABLISHING UPDATED DEPARTURE ROUTES AND/OR FIXES FROM THE EA AIRPORTS.** Aircraft departing from the EA Airports would transition to the high altitude routes using optimized routes based on RNAV technology.

- **ESTABLISHING UPDATED ARRIVAL ROUTES AND/OR FIXES INTO THE EA AIRPORTS.** Aircraft bound for the EA Airports would use optimized procedures to transition from a high altitude route to an existing approach route.

Implementation of the proposed DC OAPM is not anticipated to increase the number of aircraft operations at IAD, DCA, BWI, RIC, or satellite airports, or involve physical construction of any facilities.

General Study Area

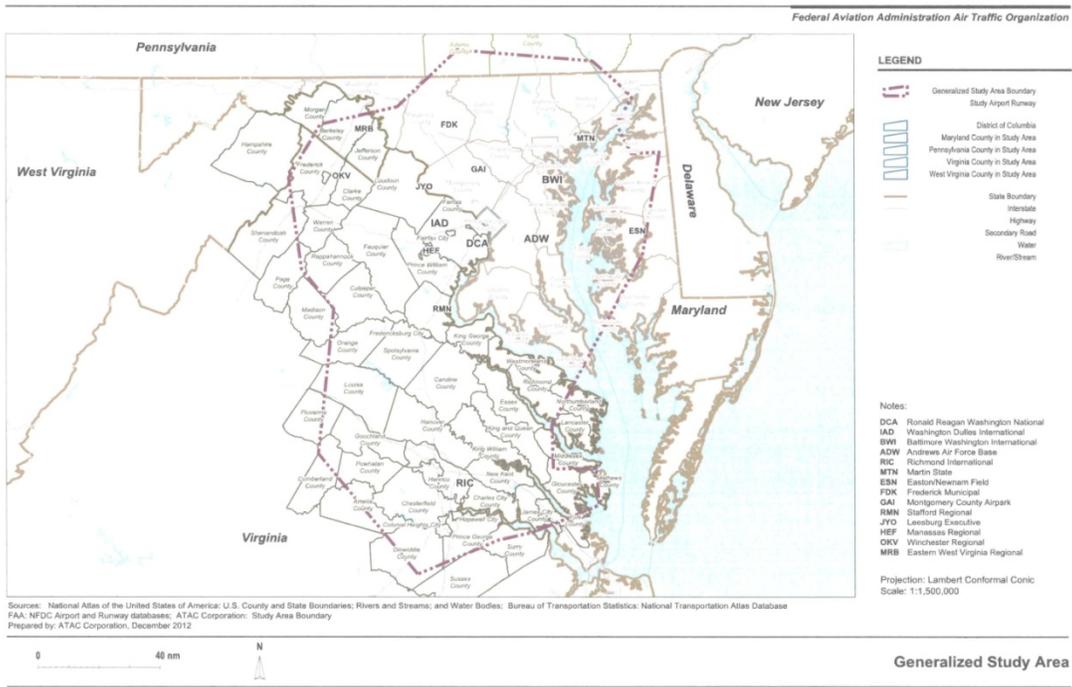

Using radar data for the EA study airports and the initial proposed design changes, the FAA has identified a general study area in which changes to aircraft routing would occur as a result of the Proposed Action.

The general study area will be used to evaluate and compare the potential impacts of the Proposed Action and reasonable alternatives. This evaluation will occur where departing aircraft are anticipated to be at altitudes below 10,000 feet above ground level (AGL) and arriving aircraft at altitudes below 7,000 feet AGL under the Proposed or the No Action alternative. The FAA may also consider traffic flying over tribal lands, national parks or national wildlife refuges below 18,000 feet AGL to evaluate and compare the potential impacts of the Proposed Action and the No Action alternative.

PUBLIC WORKSHOPS

FAA will make a decision as to whether to hold public workshop(s) following publication of the Draft EA. If the decision is to hold public workshop(s), FAA will provide public notice of the public workshop(s) and the availability of the Draft EA at a future date.

EA Study in DC Area Metroplex
Jolene Berry to: 9-ASO-DCOAPMcomment

04/03/2013 04:08 PM

I received your letter this week regarding the Environmental Assessment in Washington, DC Optimization of Airspace and Procedures in the Metroplex. Please include me in all correspondents and meetings about this study as it has potential to affect the airspace for the Manassas Regional Airport. If you would like to have any public meetings/workshops at Manassas, please let me know and we would be glad to host.

Mr Kyker,

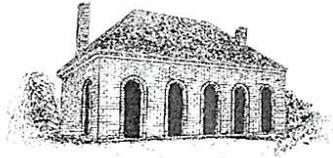

The 89th Operations Support Squadron (89 OSS) received notification of the FAA's intent to prepare and EA to consider the potential environmental impacts of the implementation of the Optimization of Airspace and Procedures in the Metroplex in the Washington DC area.

As the 89 OSS Airspace Manager, I'm seeking a good point of contact for the proposed arrival and departure procedure changes impacting Joint Base Andrews (KADW). Your assistance with this matter is greatly appreciated.

V/r,

//SIGNED//

Re: Environmental Assessment - Washington D.C. Optimization of Airspace and Procedures in the Metroplex
Early Notification Letter

Dear Ms. Kyker:

I have been asked on behalf of the Hanover County Board of Supervisors Chairman, Honorable W. Canova Peterson IV, to provide comments in reference to the March 25, 2013 letter sent advising of plans for an Environmental Assessment for Optimization of Airspace and Procedures in the Metroplex (OAPM) in the Washington D.C. area (DC OAPM).

Hanover County's Airport, (KOPF) has over 100 based aircraft and is located approximately 13.4 NM Northwest of the Richmond International Airport (KRIC) in Virginia. It actively serves as a Virginia Department of Aviation designated reliever facility with published instrument approaches to Runway 16. When considering the plans for optimizing the airspace and procedures, I wanted to make sure you include our plans to activate instrument approaches to Runway 34 (in addition to Runway 16) as inbound air traffic to Runway 34 will originate over the Richmond International Airport.

The County has multiple active FAA grant projects underway for Airspace Obstruction Removal and expects to have required surfaces cleared to enable activation of these approaches before the end of the year. If you desire copies of the planned instrument approaches for use with the environmental assessment, or would like additional specific airport or airspace information, please contact:

Richard Henry Rempe
Airport Manager
Hanover County Public Works
7516 County Complex Road
Hanover, VA 23069
Telephone: (804) 365-6208
Email: rrempe@hanovercounty.gov

Sincerely,

Cecil R. Harris Jr.
County Administrator

College Park, GA 30337

Dear Ms. Kyker

This letter is in response to the FAA letter "Environmental Assessment, Washington D.C. Optimization of Airspace and Procedures in the Metroplex, Early Notification Letter" dated 25 Mar 13. Thank you for the opportunity to comment and your consideration for our concerns.

The Air Force District of Washington (AFDW) and subordinate unit, the 11th Wing, have several interests in the region but do not have enough information about FAA's proposed changes to provide sufficient feedback. Additionally, we are unclear what information FAA needs from our organization to support the analysis. We request a meeting or teleconference in order to better understand the effort and potential impacts prior to development and distribution of the draft environmental assessment.

We propose a June meeting and look forward to further discussion. The Joint Base Andrews primary contact representing the 11th Wing is Mr. David Humphreys, Community Planner, (301) 981-1168 or david.humphreys@afncr.af.mil. An alternate contact representing AFDW is Mr. David Sumner, AFDW Command Planner, (240) 612-6223 or david.sumner@afncr.af.mil.

Sincerely

A handwritten signature in cursive script that reads "Lynda E. Lowin".

Stone Ridge - Gum Spring Aircraft Noise - DC OAPM Study.pdf

Mr. Kyker, DCOAPM POCs,

This may have been forwarded via Congressman Wolf's office, but I wanted to ensure the study POCs had this on behalf of the residents referred to in the attached.

I am writing to you on behalf of hundreds of frustrated residents in the Stone Ridge - Gum Spring Rd corridor. Noise levels from Dulles airport departing aircraft have reached unacceptable levels in our communities. It is depriving residents of sleep and making it increasingly difficult to enjoy outdoor activities.

How can you help? The FAA currently has a impact study underway for the DC area. We would be grateful for your assistance in raising our concerns to them so they can be included in their assessment activities.

Attached is a short one-page PDF the briefly reviews the noise issues and possible solutions the FAA study group (DC OAPM) should consider.

Thank you for your time, and I look forward to any additional questions you may have.

Michael Skowrunski

-Resident of Loudoun County

--

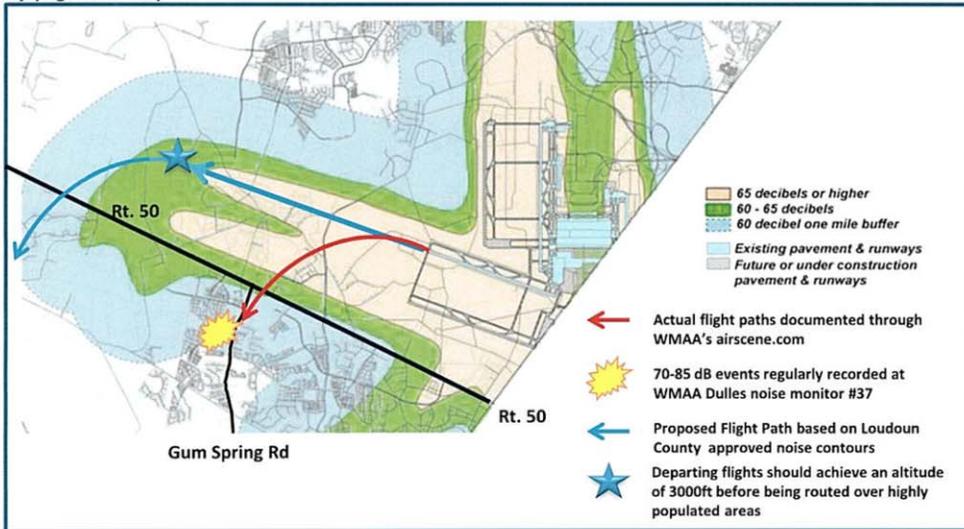

Mike

gvoice: 703.791.9199

PLEASE HELP! Flight paths impacting the Stone Ridge / Gum Spring Rd corridor

Background: The Stone Ridge/Gum Spring Rd corridor has seen tremendous growth in the last 10 years. Current outbound flight paths from Dulles Airport Runway 12/30 take aircraft over heavily populated communities at altitudes below 2000ft. **These flight paths does not honor the intent of the approved noise contours in Loudoun County (Figure below)**

Impact: Residents of this area are under tremendous stress from noise pollution of these flight paths. **Noise disturbances begin at 6am and continue through 11:30pm impacting family's ability to sleep.** These communities were built within the 60 dB one mile buffer but are exposed to higher noise levels than many areas within the 65+dB noise contour - which is not deemed acceptable for residential use.

Our communities need your help!!

The FAA is currently conducting a DC Optimization of Airspace and Procedures (DC OAPM) Study to be completed in 2013. More information is available at: http://oapmenvironmental.com/dc_metroplex/dc_introduction.html

- Their goal is to evaluate the potential environmental impacts and are in the process of establishing a Primary Study Area, consisting of the four major airports, to evaluate potential impacts of changes in aircraft routing that are proposed to occur below 10,000 feet above ground level (AGL).

Please contact the DC OAPM lead and ask them to consider revising flight paths so that noise impacts on these communities may be reduced. – DC OAPM Point of Contact: Lee Kyker, DCOAPM@faa.gov
