

17-112 (July 11, 2017) UNICOM and Multicom/CTAF Frequencies in NASR. Issue: The FAA Aeronautical Information Manual (AIM) provides information regarding FAA recommended and FCC designated assignment of Multicom/Common Traffic Advisory Frequencies (CTAF). Summary, when no Part-time Control Tower Frequency or FSS Frequency is available: UNICOM Frequency available: CTAF = UNICOM Frequency. UNICOM Frequency not available: CTAF = 122.9. The FAA National Flight Data Center (NFDC) is responsible for the maintenance of UNICOM and Multicom/CTAF Frequencies in NASR. It is recommended that the above guideline be followed for situations when new airports are entered into the database or when UNICOM Frequencies are revised, added or deleted.

Status 10-10-17: Val Watson shared that AJV-5 hosted an internal meeting on this and together folks drafted a NASR SOP for UNICOM and CTAF frequencies; approved by Scott Jerdan. Will meet one more time to sign off on this and also to determine how to handle items from today back.

IOU CLOSED - AJV-5 will complete SOP by next meeting.

Status 01-09-18: On January 8th Cassandra Wexler shared via email that the Standard CTAF and UNICOM Frequencies SOP is complete and has been posted to the AJV-5 KSN under Team B SOPs > Communications (see graphic below and attachment). **CLOSED OUT.**
