RECOMMENDATION DOCUMENT

FAA Control # 12-01-251

Subject:

Note on the Legend of the IFR ENROUTE LOW ALTITUDE – ALASKA chart, Air Traffic Services and Airspace Information section – T000 Low Altitude RNAV Route

Background/Discussion:

The note currently states: “Low Altitude RNAV Route TSO-145a/146a required”
The note needs to be updated to allow for subsequent equipment revisions.

Recommendations:

Change note on the Legend of the IFR ENROUTE LOW ALTITUDE – ALASKA chart to as follows:

“Low Altitude RNAV Routes require TSO-C145 or C146 (any revision)”

Comments: This recommendation affects

This recommendation affects WAAS users in Alaska by providing them with a more accurate description of equipment requirements.

MEETING 12-01: Proposal submitted by Catherine Majauskas, FAA/AFS-470, to revise the equipment requirement note for T-Routes on the IFR Low Altitude Alaska Enroute charts. Final iteration of note “Low Altitude RNAV Route TSO-C145 or C146 required” was approved by Mr. Kel Christianson, FAA/AFS-470. Ms. Valerie Watson, FAA/AJV-3B, will submit an EC for the change to the MPOC/IACC.
