CHARTING NOTICE

Date: May 21, 2021
To: Users of the Aeronautical Data Delivery Service (ADDS) Website
From: FAA Aeronautical Information Services
Subject: Update to Website Functionality

Aeronautical Data Delivery Service

This notice serves to alert users of the ADDS (Aeronautical Data Delivery Service) website that there will be changes to the functionality of the site's platform effective May 25th, 2021. These changes are primarily enhancements to the user experience, and should not impact the ability to download data or access data via API (Application Programming Interface).

There will be no changes to either the site URL (Uniform Resource Locator) or API URLs.

This change is being implemented by the ArcGIS Online platform, and by the FAA.

For more details, please use this link: <https://www.esri.com/arcgis-blog/products/arcgis-hub/sharing-collaboration/how-arcgis-hub-makes-it-simple-to-share-engaging-content/>

ACTION: Users who access the data through the existing APIs should not be impacted. Users who interact with the datasets directly on the ADDS site will notice some differences to the display formatting.
