Federal Aviation Administration

CHARTING NOTICE

Date: March 4, 2021

To: Users of FAA Data Portal (FAA Got Data Portal)

From: Aeronautical Information Services

Subject: Inactive Visual Charts API on FAA Data Portal

On February 25, 2021 the FAA's VFR Charts went to a 56-day charting cycle with the exception of the U.S. and Alaska VFR Planning Wall Charts. This has rendered the Data Portal API unusable for all VFR charts (https://www.faa.gov/data/aero_data/). The FAA is working on implementing a fix and will provide an update on a resolution. For now, please refer to the Aeronautical Information Services' Digital Products page - https://www.faa.gov/air_traffic/flight_info/aeronav/digital_products/ to manually download the VFR charts you need.
