Safety Alert

Date: June 19, 2014

To: Users of the Digital Terminal Procedures Publication (d-TPP) DVD.

From: Aeronautical Navigation Products (AeroNav Products)

Subject: Unintended omission of the Desktop Browser for the June 26, 2014 Effective Date and instructions to acquire replacement files for DVD.

The Desktop Browser in the digital Terminal Procedure Publication (d-TPP) DVD, **Effective June 26, 2014, Volume 1407** was omitted in error.

If you normally do not use the Desktop Browser, and you only transfer new and updated chart files and XML, then no further action is required.

However; if you use the Desktop Browser as a graphical aide to locate airports with added, changed, and deleted charts, you will need to download replacement files in order to utilize these features. A zipped file, containing the missing support files for the Desktop Browser, may be downloaded at http://aeronav.faa.gov/d-tpp/1407/Desktop_Browser.zip .

Once downloaded, the zipped file can be extracted on a local folder, and all files from your DVD should be copied into the folder named **d-TPP**. Return to the root folder structure and double-click the **autorun.exe** file. The d-TPP DVD should now function as normal with a selection for **Launch d-TPP Desktop**.
