

Federal Aviation Administration

CHARTING NOTICE

Date: April 28, 2017

To: Users of: digital-Terminal Procedures Publication (d-TPP)

From: Aeronautical Information Services (AIS)

Subject: Searchable Takeoff Minimums and (Obstacle) Departure Procedures and Diverse Vector Area (Radar Vectors)

As of the 3/30/17 (1704) cycle, the digital Terminal Procedures Publication included embedded bookmark information that allows the user to search **Takeoff Minimums and (Obstacle) Departure Procedures and Diverse Vector Area (Radar Vectors)** for specific airports. This will allow the users to search this section by airport identifier, enabling the user to go directly to the page where the searched airport is located.

This search feature works in browsers which support PDF name destination searches and will direct the user to the page of the specific entry. Browser settings may need to be changed to view the pdf in a separate window instead of downloading the file. Certain browsers may not support PDF name destination searches and will not navigate to the page of the specific entry. In this case the search will navigate to the first page of the Takeoff section, where it will be necessary to scroll to find the desired entry.

If you experience any technical difficulties with the files please contact the AIS Customer Operations Team at 1-800-638-8972 or 9-AMC-Aerochart@faa.gov.
