CHARTING NOTICE

Date: January 21, 2022

To: Users of digital-US Terminal Procedures Publications

From: Aeronautical Information Services

Subject: Process change for creation of PDF files

Beginning with the January 27, 2022 effective date, there was a process change in the creation of the PDF files. We have been made aware that this change inadvertently created issues for some digital users.

We are working to resolve the issue with our new PDF processor. In the interim, we are reverting to the previous version of the application. This version was used to process the December 30, 2021 Change Notice.

The February 24, 2022 effective files will be processed using the previous version of the PDF processor. We will continue to use this version of the PDF processor until further notice.

We will keep you informed of future changes to our PDF processor, via an updated Charting Notice. If you have questions or concerns regarding this change, please submit an inquiry via the Aeronautical Information Portal: https://www.faa.gov/air_traffic/flight_info/aeronav/aero_data/
